The only title written for Canadian pre-health courses, Human Biology, Anatomy, and Physiology for the Health Sciences focuses on human-related biology topics such as cells, metabolism, evolution, and inheritance as well as the physiological systems. Class-tested, this text has been praised by students as clear, concise, and easy to understand. Author Wendi Roscoe has taken care to write a book that is truly engaging and relevant for students, using examples of diseases or conditions that help students understand how normal physiology can go wrong, while not compromising the depth and breadth of content required for an

introductory course.

on everyday health concerns, the Fifth Edition of *Biology of Humans: Concepts, Applications, and Issues* continues to personalize the study of human biology with a conversational writing style, stunning art, abundant applications, and tools to help you develop critical-thinking skills. The authors give you a practical and friendly introduction for understanding how their bodies work and for preparing them to navigate today's world of rapidly expanding—and shifting—health information. Each chapter now opens with new “Did You Know?” questions that pique your interest with intriguing and little-known facts about the topic that follows. The Fifth Edition also features a new “Special Topic” chapter (1a) titled “Becoming a

Patient: A Major Decision,” which discusses how to select a doctor and/or a hospital, how to research health conditions, and more. Lab Manual to accompany Essentials of Biology McGraw-Hill Science/Engineering/Math For people and governments around the world, the onset of the COVID-19 pandemic seemed to place the preservation of human life at odds with the pursuit of economic and social life. Yet this simple alternative belies the complexity of the entanglements the crisis has created and revealed, not just between health and wealth but also around morality, knowledge, governance, culture, and everyday subsistence. Didier Fassin and Marion Fourcade have assembled an eminent team of scholars from across the social sciences, conducting research on six continents, to reflect on the multiple ways the coronavirus has entered, reshaped, or exacerbated existing trends and structures in every part of the globe. The contributors show how the disruptions caused by the pandemic

have both hastened the rise of new social divisions and hardened old inequalities and dilemmas. An indispensable volume, *Pandemic Exposures* provides an illuminating analysis of this watershed moment and its possible aftermath. Human Molecular Biology Laboratory Manual McGraw-Hill Science, Engineering & Mathematics Designed for the one-semester human biology course, this full-color manual offers activities for 23 laboratory sessions in a variety of formats to allow the instructor to customize these exercises to the needs of their course. The lab manual's depth of coverage invites students to explore fundamental concepts of human biology in a laboratory setting. *Concepts of Biology* WCB/McGraw-Hill This best selection collection of preserving recipes is also an engaging mix of memories and anecdotes of childhood and travel. K: A Common Law Approach to Contracts is a highly focused, case-based contract law text from the distinguished writing team of George and Korobkin. In addition to offering a comprehensive treatment of the basic issues of contract law, this stimulating casebook emphasizes development of analogical reasoning skills throughout. Each section is limited to three types of materials--brief narrative, judicial opinions and discussion problems--and is designed to teach students how to read opinions, analyze issues, distinguish material

from immaterial facts, and apply holdings to similar problems. Hallmark features: Highly regarded author team has written more than 50 law journal articles and several legal texts. Lean, focused, case-based text can be taught in a one-semester course. Comprehensive treatment of first-year contract law. Each section organized to promote methods of legal reasoning, including: A brief narrative that states a basic, fundamental proposition of contract law and guidance as to the second order doctrinal issues raised. Edited judicial opinions. Provocative discussion problems, designed for analysis from the perspectives of the judge and the opposing parties. Judicial opinions include classic and contemporary cases in contract law. Discussion problems simulate the fact patterns students will be given in final exam. Step-by-step discussion

of how to teach cases through the Socratic method. PowerPoint slides that provide a framework for discussion of core concepts. Hypotheticals and discussion problem answers.
