Addressing a field that has been dominated by astronomers, physicists, engineers, and computer scientists, the contributors to this collection raise questions that may have been overlooked by physical scientists about the ease of establishing meaningful communication with an extraterrestrial intelligence. These scholars are grappling

with some of the enormous challenges that will face humanity if an information-rich signal emanating from another world is detected. By drawing on issues at the core of contemporary archaeology and anthropology, we can be much better prepared for contact with an extraterrestrial civilization, should that day ever come. Breakthrough research has revealed that through living a brain-healthy lifestyle, we can reduce our “brain age” to improve memory, hone sharpness, and reduce health risks as we age. It’s normal for the brain to short-circuit every now and then—you put your keys in the

fridge, or can’t find the pair of glasses on top of your head. But what if there was a way to eat, exercise, and live that could eliminate these “senior moments?” Ageless Brain offers a plan to sharpen your memories and mind so that at 40, you have the quick, agile brain you had at 30. Based on groundbreaking scientific research, this plan is filled with brain-healthy foods, exercises, and little ways you can positively impact your most vital organ every day by de-stressing, adjusting your attitude, and constantly interacting with the world through play. Scientists have discovered that the human brain

continually generates new neurons—forging new pathways and connections in our minds—well into old age, as long as we pursue brain-healthy lifestyles from what we eat and how much we sleep, to how we exercise and handle stress. Exercising and nourishing our brains just like we do any other ailing organ encourages this growth—improving not only our mental fitness but also our physical fitness as a side effect. With *Ageless Brain*, you will:

- Discover the 10 Commandments of an ageless brain
- Reduce key risk-factors for Alzheimer ' s
- Identify and avoid brain poisons lurking in food, medicines, and home
- Learn to play and engage your brain more in everyday life
- Drop unsafe levels of blood pressure, cholesterol, and sugar—as well as belly fat
- Keep your brain nourished with 45 recipes

"On these pages, Eve Adams rises up, loves, rebels—her times, eerily resembling our own."  
—Joan Nestle, cofounder of the Lesbian Herstory Archives and author of *A Restricted Country* • 2022 Lambda Literary Awards Finalist  
Historian Jonathan Ned Katz uncovers the forgotten story of

radical lesbian Eve Adams and her long-lost book *Lesbian Love Born Chawa Zloczewer* into a Jewish family in Poland, Eve Adams emigrated to the United States in 1912, took a new name, befriended anarchists, sold radical publications, and ran lesbian-and-gay-friendly speakeasies in Chicago and New York. Then, in 1925, Adams risked all to write and publish a book titled *Lesbian Love*. Adams's bold activism caught the attention of the young J. Edgar Hoover and the US Bureau of Investigation, leading to her surveillance and arrest. Adams was convicted of publishing an obscene book and of attempted sex with a policewoman sent to entrap her. Adams was jailed and then deported back to Europe, and ultimately murdered by Nazis in Auschwitz. In *The Daring Life and Dangerous Times of Eve Adams*, acclaimed historian Jonathan Ned Katz has recovered the extraordinary story of an early, daring activist. Carefully distinguishing fact from fiction, Katz presents the first biography of Adams, and the publisher reprints the long-lost text of Adams's rare, unique book *Lesbian Love*. Social class remains a fundamental

presence in British life in the twenty-first century. It is woven into the very fabric of social and political discourse, undiminished by the end of mass industry; unaugmented despite the ascendancy of 'ordinary working people' and other substitute phrases. Absent from this landscape, however, is any compelling Marxist expression or analysis of class. In *Class Matters*, Charles Umney brings Marxist analysis out of the 19th century textiles mill, and into the call centres, office blocks and fast food chains of modern Britain. He shows how core Marxist concepts are vital to understanding increasing pay inequality, decreasing job security, increasing routinisation and managerial control of the labour process. Providing a critical analysis of competing perspectives, Umney argues that class must be understood as a dynamic and exploitative process integral to capitalism - rather than a descriptive categorisation - in order for us to better understand the gains capital has made at the expense of labour over the last four decades.

In an era of climate change, the need to manage our water resources effectively for future generations has become an increasingly significant challenge. Indigenous management practices have

been successfully used to manage inland water systems around the world for thousands of years, and Indigenous people have been calling for a greater role in the management of water resources. As First Peoples and as holders of important knowledge of sustainable water management practices, they regard themselves as custodians and rights holders, deserving of a meaningful role in decision-making. This book argues that a key (albeit not the only) means of ensuring appropriate participation in decision-making about water management is for such participation to be legislatively mandated. To this end, the book draws on case studies in Australia and New Zealand in order to elaborate the legislative tools necessary to ensure Indigenous participation, consultation and representation in the water management landscape. This is the first book to examine in-depth Japan's relations with Africa. Japan's dependence on raw materials from South Africa made it impossible for Tokyo in the 1970s and 1980s to support other African states in their fight against the minority government and its policy of apartheid. Kweku Ampiah's detailed analysis of Japan's political, economic and diplomatic relations with sub-Saharan Africa from 1974 to the early 1990s makes it clear that Japan was lukewarm in the struggle against apartheid. Case studies of Tanzania and Nigeria dissect Japan's trade, aid and investment policies in sub-Saharan Africa more

widely.

Volume 1 (A and B) covers international organizations throughout the world, comprising their aims, activities and events. **Garments without Guilt?** Springer Nature Sri Lanka's apparel sector holds an enviable place in the imaginary of its competitors for having a niche position amongst global retailers, given its claims of producing 'garments without guilt'. Exploitative labour conditions are not part of the industry's portfolio – ethicality, eco-friendly production and unblemished conditions of work are. Sri Lanka's transition away from a protracted ethnic war has meant that the industry portrays itself as investing in the former war zone to create jobs without reflection on how its vaunted mantle, the deployment of ethical codes effectively, themselves may be under duress. This book uses an analytical framing informed by labour and feminist perspectives to explore how labour struggles in the post-1977 period in Sri Lanka provided important resistance to capitalist processes and continue to shape the industry both within and outside of the shop floor. It studies contextual moments in the country's recent history to rupture the dominant narrative and record the

centrality of labour in the success of the country's apparel industry.
