From Queensland's inception as a self-governing colony in December 1859 the issue of labour relations has preoccupied governments and shaped the experiences of its working men and women. However, despite the often turbulent nature of labour relations in Queensland there has, prior to this book, been no attempt to provide an overview of the system as a whole. This important addition to Queensland's sesquicentenary celebrations redresses this failure, looking at the diverse range of experiences that, together, made up a unique system of labour relations - including those of employers, women workers, indigenous workers, unions, the Queensland Industrial Relations Commission, labour law, industrial disputation, the workings of health and safety system and life in regional areas. It

is argued that, overall, Queensland's system of industrial regulation was central to its economic and social development. Despite past emphasis on the large-scale strikes that periodically raked the state this book finds that consensus normally prevailed.

systems. Insider corporate governance systems in countries such as Germany, so the argument goes, should converge or be transformed by global product and capital market pressures to the 'superior' shareholder oriented 'outsider' corporate governance model prevalent in the UK and the US. What these pressures from globalization are, how they manifest themselves, whether they are likely to cause such a convergence/transformation and whether these pressures will continue, lie at the heart of the exploration in this volume. The *Globalization of Corporate Governance* provides a detailed analysis of the evolution of the key corporate governance systems in the UK, the US and Germany from the perspective of the development of economic globalization. As such it is a valuable resource for those interested in how economic and legal reforms interact to produce change within corporate governance systems.

Skilled migration is rapidly rising as countries vie for the 'best and brightest' migrants to fill labour market shortages or to add to their stock of 'knowledge workers'. The 'knowledge economy', and the increasing value placed on human capital over physical capital, has led to what some describe as a 'war over skills'. Within this context, the way in which Australia seeks to attract skilled permanent and temporary migrants is put under the spotlight in this very timely publication. Are we open and flexible or defensive and

protectionist? This book compares the policies of Australia with those of other nations. What makes this book unique is the input of lawyers, for the first time in Australia, in the discussion of issues. Their challenge to existing selection policies, taxation systems and recognition mechanisms provides a major new contribution to these topics.
