This book confronts the failings of current global economics to deliver the equity, sustainability and community empowerment which humanity now needs to handle a troubled future. The volume proposes an economy built from our society, not the other way around. The Kyoto Manifesto was built, layer by layer, over a period of 4 years,

based on broad-ranging international symposia held in Kyoto between 2014 and 2017, hosted by the Center for the Creative Economy, Doshisha University. Not stopping at theory and untested ideas however, the Manifesto proposes practical action that will make a difference, including in the problematic technological and ecological context of humanity 's immediate and long-term future.

The book is unique and innovative for it moves adventurously across very broad territory. The Manifesto draws from world philosophic arguments, including, specifically, a critique of “ liberalism ” , further, exploring sociology, cultural anthropology, politics, primatology and early humanity, even quantum physics. Argument is set within mainstream post-1972 economics and political economics as well as

direct practical experience working to empower disadvantaged communities through the United Nations. Most importantly, the book's analysis is deeply informed by the practice of searching for what is "sacred", the ultimate essence of our humanity, what we can be as a human race—empowered, fulfilled individuals, deeply sharing and caring for each other across our separate

cultures and lives. Stomu Yamash ' ta ' s OnZen performances, set the context for the Symposia, bringing different religions and cultures together across their dividing boundaries into a coherent search for peace and harmony through sacred music. Informed by alternate cultural paradigms for economics, the book probes deeply into philosophies and practices that already

exist within Eastern and Western societies, and offer lessons for our future. The result is an economics that stresses harmony with nature, and balance in social relations. It places an emphasis on community—human sharing and trust—as a platform for our future, not separate from the global economy but integrated into its very foundations. This is a book for all who care: a plan for our sustainable

future built from the best of what our humanity is and can offer.

The very existence of an employment relationship places the human rights of a worker at risk. Employers can, and frequently do, exercise their managerial and disciplinary powers in a manner that interferes with the most fundamental rights of the

---

individual worker. Adequate safeguards against such infringements are necessary if individuals are to receive full protection of their rights. This book examines how far the labour laws of England and Wales offer such guarantees, with a particular focus on dismissal law. The chapters reflect on the relationship between employment, labour, and human rights before conducting a detailed and critical analysis of the scope, shape, and application of domestic employment law. The framework for evaluation is drawn from the case law of the

European Court of Human Rights, as it develops a principled and tailored approach to how the rights contained in the European Convention on Human Right should be enforced in working relationships. Statutory mechanisms, such as the law of unfair dismissal, and common law causes of action are examined and found to be lacking in their capacity to vindicate and enforce the human rights of workers. This book culminates in the proposal and elaboration upon an innovative solution, the Bill of Rights for Workers, that would

draw on the successes of human rights and labour law instruments to render the Convention rights directly enforceable in the relationship between a worker and their employer.

Skilled migration is rapidly rising as countries vie for the 'best and brightest' migrants to fill labour market shortages or to add to their stock of 'knowledge workers'. The 'knowledge economy', and the increasing value placed on human capital over physical capital, has led to what some

---

describe as a 'war over skills'. Within this context, the way in which Australia seeks to attract skilled permanent and temporary migrants is put under the spotlight in this very timely publication. Are we open and flexible or defensive and protectionist? This book compares the policies of Australia with those of other nations. What makes this book unique is the input of lawyers, for the first time in Australia, in the discussion of issues. Their challenge to existing selection policies, taxation systems and recognition mechanisms provides a major new

contribution to these topics. California Public Sector Labor Relations Malthouse Press

Derived from the renowned multi-volume International Encyclopaedia of Laws, this monograph on Russia not only describes and analyses the legal aspects of labour relations, but also examines labour relations practices and developing trends. It provides a survey of the subject that is both usefully

brief and sufficiently detailed to answer most questions likely to arise in any pertinent legal setting. Both individual and collective labour relations are covered in ample detail, with attention to such underlying and pervasive factors as employment contracts, suspension of the contracts, dismissal laws and covenant of non-competition, as well as international private law. The author describes all important details of the law governing hours and wages, benefits, intellectual property

implications, trade union activity, employers' associations, workers' participation, collective bargaining, industrial disputes, and much more. Building on a clear overview of labour law and labour relations, the book offers practical guidance on which sound preliminary decisions may be based. It will find a ready readership among lawyers representing parties with interests in Russia, and academics and researchers will appreciate its value in the study of comparative trends

in laws affecting labour and labour relations. Decisions and Orders of the National Labor Relations Board The focus of globalisation studies is on how global processes can be better regulated in order to deliver both economic growth and social justice. Labour laws provide an excellent case study of the creation of a new framework to reconcile free trade and investment with social objectives. This book, written by a leading authority on international and comparative labour law, provides a thoughtful and comprehensive analysis of the new methods of transnational labour regulation that are emerging in response to globalisation. The author

reassesses orthodox views, from the viewpoint of a theory of comparative institutional advantage, and suggests ways in which transnational regulation can be re-invented in the new global economy This will be of interest to students of law, human rights, industrial relations, globalisation, international trade and development, as well as policy-makers in international and regional organisations, governments, employers' bodies, trade unions and NGOs.
