National Instruments Corporation i LabVIEW Code Interface Reference Manual About This Manual The LabVIEW Code Interface Reference Manual discusses Code Interface Nodes and external subroutines for users who need to access code written in conventional programming languages. The manual includes information about shared external subroutines, libraries of Labview Reference Manual

Function and VI Reference Manual LabVIEW loads the referenced VI into memory when you load the top-level VI. When the Static VI Reference function outputs a strictly typed VI reference, LabVIEW reserves the referenced VI as long as the top-level VI is running. LabVIEW closes this reference when the top-level VI is no longer in memory.
