UPDATED FOR 2020 WITH A NEW PREFACE BY NATE SILVER "One of the more momentous books of the decade." —The New York Times Book Review Nate Silver built an innovative system for predicting baseball performance, predicted the 2008 election within a hair 's breadth, and became a national sensation as a blogger—all by the time he was thirty. He solidified his standing as the nation's foremost political forecaster with his near perfect prediction of the 2012 election. Silver is the founder and editor in chief of the website FiveThirtyEight. Drawing on his own groundbreaking work, Silver examines the world of prediction, investigating how we can distinguish a true signal from a universe of noisy data. Most predictions fail, often at great cost to society, because most of us have a poor understanding of probability and uncertainty. Both experts and laypeople mistake more confident predictions for more accurate ones. But overconfidence is often the reason for failure. If our appreciation of uncertainty improves, our predictions can get better too. This is the " prediction paradox " : The more humility we have about our ability to make predictions, the more successful we can be in planning for the future. In keeping with his own aim to seek truth from data, Silver visits the most successful forecasters in a range of areas, from hurricanes to baseball to global pandemics, from the poker table to the stock market, from Capitol Hill to the NBA. He explains and evaluates how these forecasters think and what bonds they share. What lies behind their success? Are they good—or just lucky? What patterns have they unraveled? And are their forecasts really right? He explores unanticipated commonalities and exposes unexpected juxtapositions. And sometimes, it is not so much how good a prediction is in an absolute sense that matters but how good it is relative to the competition. In other cases, prediction is still a very rudimentary—and dangerous—science. Silver observes that the most accurate forecasters tend to have a superior command of probability, and they tend to be both humble and hardworking. They distinguish the predictable from the unpredictable, and they notice a thousand little details that lead them closer to the truth. Because of their appreciation of probability, they can distinguish the signal from the noise. With everything from the health of the global economy to our ability to fight terrorism dependent on the quality of

our predictions, Nate Silver ' s insights are an essential read.

Those Barren Leaves Lady Fiasco

Those Barren Leaves is a satirical novel by Aldous Huxley, published in 1925. The title is derived from the poem 'The Tables Turned' by William Wordsworth which ends with the words: Enough of Science and of Art; Close up those barren leaves; Come forth, and bring with you a heart That watches and receives. Stripping the pretensions of those who claim a spot among the cultural elite, it is the story of Mrs. Aldwinkle and her entourage, who are gathered in an Italian palace to relive the glories of the Renaissance. For all their supposed sophistication, they are nothing but sad and superficial individuals in the final analysis.

Honey Santana—impassioned, willful, possibly bipolar, self-proclaimed “queen of lost causes”—has a scheme to help rid the world of irresponsibility, indifference, and dinnertime sales calls. She's taking rude, gullible Relentless, Inc., telemarketer Boyd Shreave and his less-than-enthusiastic mistress, Eugenie—the fifteen-minute-famous girlfriend of a tabloid murderer—into the wilderness of Florida's Ten Thousand Islands for a gentle lesson in civility. What she doesn't know is that she's being followed by her Honey-obsessed former employer, Piejack (whose mismatched fingers are proof that sexual harassment in the workplace is a bad idea). And he doesn't know he's being followed by Honey's still-smitten former drug-running ex-husband, Perry, and their wise-and-protective-way-beyond-his-years twelve-year-old-son, Fry. And when they all pull up on Dismal Key, they don't know they're intruding on Sammy Tigertail, a half white-half Seminole failed alligator wrestler, trying like hell to be a hermit despite the Florida State coed who's dying to be his hostage . . . Will Honey be able to make a mensch of a “greedhead”? Will Fry be able to protect her from Piejack—and herself? Will Sammy achieve his true Seminole self? Will Eugenie ever get to the beach? Will the Everglades survive the wild humans? All the answers are revealed in the delectably outrageous mayhem that propels this novel to its Hiasen-of-the-highest-order climax. **BONUS:** This edition includes an excerpt from Carl Hiasen's *Bad Monkey*.

The Stranjan Series Simon and Schuster

From the Pulitzer Prize – winning author of *The Looming Tower*, and the pandemic novel *The End of October*: an unprecedented, momentous account of Covid-19—its origins, its wide-ranging repercussions, and the ongoing global fight to contain it "A book of panoramic breadth ... managing to surprise us about even those episodes we ... thought we knew well ... [With] lively exchanges about spike proteins and nonpharmaceutical interventions and disease waves, Wright's storytelling dexterity makes all this come alive." —The New York Times Book Review From the fateful first moments of the outbreak in China to the storming of the U.S. Capitol to the extraordinary vaccine rollout, Lawrence Wright's *The Plague Year* tells the story of Covid-19 in authoritative, galvanizing detail and with the full drama of events on both a global and intimate scale, illuminating the medical, economic, political, and social ramifications of the pandemic. Wright takes us inside the CDC, where a first round of faulty test kits lost America precious time . . . inside the halls of the White House, where Deputy National Security Adviser Matthew Pottinger's early alarm about the virus was met with confounding and drastically costly skepticism . . . into a Covid ward in a Charlottesville hospital, with an idealistic young woman doctor from the town of Little Africa, South Carolina . . . into the precincts of prediction specialists at Goldman Sachs . . . into Broadway's darkened theaters and Austin's struggling music venues .

. . . inside the human body, diving deep into the science of how the virus and vaccines function—with an eye-opening detour into the history of vaccination and of the modern anti-vaccination movement. And in this full accounting, Wright makes clear that the medical professionals around the country who've risked their lives to fight the virus reveal and embody an America in all its vulnerability, courage, and potential. In turns steely-eyed, sympathetic, infuriated, unexpectedly comical, and always precise, Lawrence Wright is a formidable guide, slicing through the dense fog of misinformation to give us a 360-degree portrait of the catastrophe we thought we knew.

President Nixon's former counsel illuminates another presidency marked by scandal Warren G. Harding may be best known as America's worst president. Scandals plagued him: the Teapot Dome affair, corruption in the Veterans Bureau and the Justice Department, and the posthumous revelation of an extramarital affair. Raised in Marion, Ohio, Harding took hold of the small town's newspaper and turned it into a success. Showing a talent for local politics, he rose quickly to the U.S. Senate. His presidential campaign slogan, "America's present need is not heroics but healing, not nostrums but normalcy," gave voice to a public exhausted by the intense politics following World War I. Once elected, he pushed for legislation limiting the number of immigrants; set high tariffs to relieve the farm crisis after the war; persuaded Congress to adopt unified federal budget creation; and reduced income taxes and the national debt, before dying unexpectedly in 1923. In this wise and compelling biography, John W. Dean—no stranger to controversy himself—recovers the truths and explodes the myths surrounding our twenty-ninth president's tarnished legacy.
