This work is a comparative study of nineteenth-century English-Canadian and French Canadian novel prefaces, a previously unexplored literary topic. As a study in Comparative Literature - with the application of a specific literary framework and methodology - the study conforms to theoretical and methodological postulates formulated in and prescribed by this framework when applied. This a priori postulate necessitates that the research on and the presentation of the Canadian novel preface be carried out in a specific manner, as follows. First, the study will establish the hypothesis that the preface to nineteenth-century English-Canadian and French-Canadian novels is a genre in its own right. This hypothesis will rest on the following: 1) a taxonomical survey of related terms meaning "preface"; 2) a survey of secondary literature of works

dealing with the preface; 3) a discussion of the theoretical framework and methodology of the Empirical Theory of Literature and its appropriateness for the study of the preface; and 4) a discussion of the process of the compilation of the corpus of nineteenth-century Canadian novel prefaces (Chapter one). In a second step, the theoretical postulate outlined in the hypothesis will be put into practice by the development and production of a preface typology (Chapter two). In a third step, further tenets of the Empirical Theory of Literature will be tested on the corpus of the prefaces (Chapter three). In a fourth step, the prefaces will be analysed following the tenets formulated in and prescribed by the systemic framework applied (Chapter four).

p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial} The Jeep CJ, the icon that started it all, is the most popular off-road vehicle of all time. The look, style, and functionality of the CJ made it instantly popular and recognizable the world over, in no doubt partly due to its military presence in World War II. The Jeep Wrangler platform had the difficult task of replacing the extremely popular CJ platform. Outwardly similar in appearance, the YJ, TJ, and JK that followed all had significant design improvements, as can be expected when a platform has a life span of more than five decades. The YJ was the first Chrysler release after it purchased AMC in the mid-1980s, and it was aimed at taming the original CJ for more comfort and, arguably, a larger audience. The TJ that followed next was an evolutionary update, significant in that it featured a coil spring suspension and the celebrated return of round headlights, for a more traditional look compared to the square lights of the YJ. In *Jeep TJ 1997-2006: How to Build & Modify*, everything you need to know about how to modify your TJ for off-road use is covered. Beginning with why you should choose a TJ for modification, Jeep expert Michael Hanssen takes you through all the different systems needing modification, including engine modifications and swaps, transmission swaps, transfer case and driveshafts modifications, axles and traction systems, suspensions and lifts, wheels, tires, brakes, chassis protection, electrical, and winches. Included in every chapter are step-by-step modification instructions to help walk you through the process. If you want

to build a TJ for serious off-road trail use, or you just want a capable and great-looking Jeep for around town, this book has you covered.

From bestselling author Nicole Alexander comes an epic novel of bravery, loyalty and impossible love that takes the reader on a spellbinding journey from the streets of early Sydney to the heart of Australia's wild, untamed lands. New South Wales, 1837, and settlers in search of fertile country are venturing far outside the colony. Literally cutting a swathe through the bush with their bare hands, they lay claim to territory beyond government jurisdiction - and the reach of the law. As she accepts a position on one such farm, seventeen-year-old Kate Carter is unaware she is entering a land of outlaws, adventurers and murderous natives. Because the first people of this new world will no longer accept the white man's advance, and retaliatory attacks on both sides have made it a frontier on the brink of war. Into Kate's path comes Bronzewing, a young white man schooled by a settler family yet raised within an Aboriginal tribe. Caught between two worlds, Bronzewing strives to protect his adopted people and their vanishing civilisation. But as he and Kate will discover, 'beyond the outer limits' is a beautiful yet terrifying place, where it's impossible to know who is friend and who is enemy . . . The Lancer name conjures up many different images. For some, it evokes memories of the first-generation cars, introduced in 1973, which fought with the best on the Safari Rally and came out the victors. Others will remember the second-generation models--especially the turbocharged versions, the original Mitsubishi wolf in sheep's clothing--and who could not be aware of the Evolution (Evo) series, launched in 1992? Forged in the fierce heat of WRC competition and honed by years of continuous development, the Lancer Evolution is not only

one of the greatest rally cars of all time, it is also a desirable high-performance road car, too. Written in Japan with the full cooperation of Mitsubishi and key staff members, this is the definitive international story of all the world's Lancers, whether they carried Mitsubishi, Dodge, Colt, Plymouth, Valiant, Eagle, Proton, or Hyundai badges, with special emphasis on the Evolution models.

Identifying the Jeep CJ series vehicles as the most popular off-road vehicles of all time may actually qualify as an understatement. They really are that popular. The CJ series arguably started after World War II with the CJ-2A being introduced to the masses, and while the early CJs have their share of enthusiasts, the largest group of enthusiasts began their love affair with the AMC-powered Jeep CJ-5s beginning in 1972. Joined by the longer-wheelbase CJ-7 models introduced in 1976, the CJ models were wildly popular through their discontinuation in 1986, when the Wrangler was introduced. These were the only models originally equipped with V-8 engines in any meaningful way. This era combined the ruggedness of the early Jeeps with some of the advancements and horsepower of a more modern era; it makes a platform that is both fun to own and to modify. Jeep guru Michael Hanssen covers all of the systems that can be upgraded to improve your Jeep's performance. Upgrades include suspension components such as springs, shocks, and steering modifications; driveline components including differentials, transmissions, transfer cases, and axles; engine upgrades including engine swaps; wheel and tire upgrades; aftermarket accessories; and armor such as skid plates, bumpers, brake upgrades, and more. Whether you are looking to get into serious off-roading or just want to make your classic CJ a little more fun, this book will be a valuable tool in your shop or library. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial}

The human life alternates between the great, external macrocosm and the invisible inner microcosm. Steiner discusses the various paths of self-development that lead across these two thresholds and to the transformation of human soul-forces into spiritual organs of perception. A brief synopsis: The world behind the tapestry of sensory perceptions; human life between macrocosm and microcosm. The planets and their connection with our sleeping and waking life; consciousness soul, mind soul, and sentient soul. The inner path of the mystic; the cycle of the year; the ability to see through matter; the "greater guardian of the threshold." The nature and development of human soul faculties; the "lesser guardian of the threshold"; the sun at midnight; the results of "sins of omission." The Egyptian mysteries of Osiris and Isis; initiation experiences; the Rosicrucian path; mystics of the Middle Ages. Initiation in the "northern mysteries"; the necessity of suppressing the ego; conscious assent into the macrocosm and the higher worlds; the world of archetypal images. The four spheres of the higher worlds; the threshold of the spirit world; forces for developing clairvoyant consciousness in the world of archetypal images. The macrocosm mirrored in the human being; the nervous system as an inner solar system; the image of purified blood and the conquest of our lower nature in the symbol of the Rose Cross. Spiritual organs of perception and the strengthening powers of sleep; the thinking of the heart; the ego viewed from twelve perspectives. Reading the akashic record; the transition from intellect to heart thinking; four-dimensional space; intellectual questions have no meaning in relation to conditions before the intellect itself existed. Human and planetary evolution; adaptation to the different states of Earth's existence; the breathing process should not be influenced directly unless knowledge has become prayer.
