The Lotus Europa was Colin Chapman and Lotus 's first mid-engined road car, and was produced from 1966 through to 1975. Originally designed to slot into the Lotus range below the Elan as a low cost replacement for the Lotus 7, the Europa eventually sat alongside the Elan and Plus 2 as a comparable sports car in its own right. Starting with the design philosophy behind the development of the Europa, this book provides detailed technical descriptions of all the major versions of the model, starting with the Renault-powered Series 1 through to the Lotus Twin Cam powered Special. It looks at the cars on the road, and the racing Type 47 derived from the road cars which competed in the small capacity Group 6 class, as well as featuring in historic racing today. With owners ' impressions and interviews with ex-Lotus employees, the book provides a valuable insight into owning, running, and racing these iconic cars.

The Tongue and Quill has been a valued Air Force resource for decades and many Airmen from our Total Force of uniformed and civilian members have contributed their talents to various editions over the years. This revision is built upon the foundation of governing directives and user's inputs from the unit level all the way up to Headquarters Air Force. A small team of Total Force Airmen from the Air University, the United States Air Force Academy, Headquarters Air Education and Training Command (AETC), the Air Force Reserve Command (AFRC), Air National Guard (ANG), and Headquarters Air Force compiled inputs from the field and rebuilt The Tongue and Quill to meet the needs of today's Airmen. The team put many hours into this effort over a span of almost two years to improve the content, relevance, and organization of material throughout this handbook. As the final files go to press it is the desire of The Tongue and Quill team to say thank you to every Airman who assisted in making this edition better; you have our sincere appreciation!

The wedge-shaped V12 Lamborghini flagships were always spectacular – in shape, sound and performance. The Murci é lago was an evolution of the Countach and the Diablo, and was as iconic in its time as its illustrious predecessors were in theirs. This book examines the Murcielago in detail, while casting a look back through Lamborghini ' s troubled history, to understand how the Murci é lago came into being. Ferruccio Lamborghini, Patrick Minram, Megatech, Chrysler, and finally VW-Audi, all played their part in the birth of this modern classic. The book touches on the people and organisations involved in the production of this iconic car, before examining each of the model variants, and discusses the joys and tribulations of ownership.

Legend has it that Google deploys over two billion application containers a week. How 's that possible? Google revealed the secret through a project called Kubernetes, an open source cluster orchestrator (based on its internal Borg system) that radically simplifies the task of building, deploying, and maintaining scalable distributed systems in the cloud. This practical guide shows you how Kubernetes and container technology can help you achieve new levels of velocity, agility, reliability, and efficiency. Authors Kelsey Hightower, Brendan Burns, and Joe Beda—who 've worked on Kubernetes at Google and other organizations—explain how this system fits into the lifecycle of a distributed application. You will learn how to use tools and APIs to automate scalable distributed systems, whether it is for online services, machine-learning applications, or a cluster of Raspberry Pi computers. Explore the distributed system challenges that Kubernetes addresses Dive into containerized application development, using containers such as Docker Create and run containers on Kubernetes, using the docker image format and container runtime Explore specialized objects essential for running applications in production Reliably roll out new software versions without downtime or errors Get examples of how to develop and deploy real-world applications in Kubernetes

The Journey of Not Knowing: How 21st Century Leaders Can Chart a Course Where There Is NoneBy Julie BenezetThe Journey of Not Knowing

is a fast paced, entertaining read that gets to the heart of a critical state in today's business climate and society overall: the constantly changing, ambiguous 21st Century and the uncharted waters ahead. This book will inspire leaders of any size organization to come to grips with the scariness of the unknown while it advances a new approach to leadership that leverages the discomfort of the new as a powerful source of inspiration rather than a deterrent to building a better future. Written by former Amazon executive, coach and lawyer Julie Benezet, the book combines storytelling, business experience and human psychology to create a roadmap through the ambiguity of building something better in the context of the realities of humans in organizational life. The book tells a story of a day in the life at Arrow, Inc., a fictional company. It follows the defended behaviors throughout that day of its eight very recognizable leadership team members as they work first to avoid and then finally to solve the mystery of why a client fired them. The reward of the discovery is a critical piece of new business and substantial personal growth. To get there, each of team members must face their past, present and future. The memorable characters in the book are persons with whom the readers may cringingly identify. The book creates a framework them to confront their own resistance to change, and tools to start them on their way toward pursuing new possibilities for their lives once they can confront and embrace the scariness of the unknown. The author opens the book with a description of an experience at Amazon that led to her belief about leadership and the unknown. It ends with a primer on the Journey of Not Knowing leadership model, using the Arrow story to illustrate its principles. The Journey of Not Knowing forms the core of a leadership program that been attended by executives from around the world over the past five years. (www.journeyofnotknowing.com)
