TW Index is a complete and detailed index of everything that has appeared in the SDC Turning Wheels magazine since its inception in 1972. Of greatest importance are the advice items that are indexed by subject (engines, brakes, steering, etc.), model AND

year including all individual letters that appear in the Co-Operator column. Historical items are also indexed by subject as well as by the vehicle (model and year) they relate to. If you own, for instance, a 1959 Hawk, TW Index will give you instant access to everything that has been published about your car and much more. Each listing, of course, refers you to the specific issue of "Turning Wheels" and cites the page on which the item begins. Rated "excellent" by Fred Fox and Bob Palma. 1972 through 1992 with 10,711 references on 159 pages.

This e-book details the most interesting and important characteristics of the automobiles, car maintenance, styling features, car body style, the standard classification of the cars, an history of the automobiles, introduction in the automotive industry, and the traffic code, rules and signs. An automobile, usually called a car (an old word for carriage)

or a truck, is a wheeled vehicle that carries its own engine. Older terms include horseless carriage and motor car, with “ motor ” referring to what is now usually called the engine. It has seats for the driver and, almost without exception, for at least one passenger. The automobile was hailed as an environmental improvement over horses when it was first introduced. Before its introduction, in New York City, over 10,000 tons of manure had to be removed from the streets daily. However, in 2006 the automobile is one of the primary sources of worldwide

air pollution and cause of substantial noise and health effects.
