Precisely, it is around 20 years old, since the debate started somwhen at the beginning of the 90s. Much, much time has passed and much, much has changed since then in GNU/X emacs land. But otherwise, you're completely right. Emacs feels today what running a Lisp Machine must have been back in the day, and it's wonderful.

I just had a look at lisperati! Pretty cool and straightforward tutorial (LISP spells). It would be even cooler if there was another option detailed to run lisp apart from franz telnet (did not work when I tried) - such as slime+closure CL or lisp in a box. Also, tutorial starts with something like: (setf objects '(whiskey-bottle bucket frog ...

Racket is a descendant of Lisp, a programming

language renowned for its elegance, power, and challenging learning curve. But while Racket retains the functional goodness of Lisp, it was designed with beginning programmers in mind. Realm of Racket is your introduction to the Racket language.
