Sudden unexpected shifts could occur during periods of acceleration which could cause the Pedal to skip forward suddenly. To minimize this problem, avoid rapid acceleration and always ride sitting on the Seat. Do not stand on the pedal. Unexpected shifts under rapid acceleration or while standing could cause you to lose control of the bike."

What has been experience of real people with the LandRider Bikes that they have purchased. Anything can be made to look good on an Infomercial. I'm wondering about real life experience. How is the ride? Are they sturdy? How much assembly? Looking to buy bikes for my wife and myself. We are in our 40's and in decent shape. This would be recreational, mostly on bikepaths, parks, etc. Would ...
