Inside the complex and misunderstood world of professional street skateboarding. On a sunny Sunday in Los Angeles, a crew of skaters and videographers watch as one of them attempts to land a "heel flip" over a fire hydrant on a sidewalk in front of the Biltmore Hotel. A staff member of the hotel demands they leave and picks up his phone to call the police. Not only does the skater land the trick, but he does so quickly, and spares everyone the unwanted stress of

having to deal with the cops. This is not an uncommon occurrence in skateboarding, which is illegal in most American cities and this interaction is just part of the process of being a professional street skater. This is just one of Gregory Snyder's experiences from eight years inside the world of professional street skateboarding: a highly refined, athletic and aesthetic pursuit, from which a large number of people profit. Skateboarding LA details the history of skateboarding, describes basic and complex tricks, tours some of LA's most famous spots, and provides an enthusiastic appreciation of this dangerous and creative practice. Particularly concerned with public spaces,

Snyder shows that skateboarding expresses their passion, dedication offers cities much more than petty and creativity. Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the

chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill

set.

Academic interest in cycling has burgeoned in recent years with significant literature relating to the health and environmental benefits of cycling, the necessity for cycle-specific infrastructure, and the embodied experiences of cycling. Based upon primary research in a variety of contexts such as London, Shanghai and Taipei, this book demonstrates that recent developments in urban cycling policy and practice are closely linked to broader processes of capital accumulation. It argues that cycling is increasingly caught up in discourses around smart cities that emphasise technological solutions to environmental problems and neoliberal ideas on individual responsibility and bio-political conduct, which only results in solutions that prioritise those who are already mobile. Accordingly,

the central argument of the book is not that the popularisation of cycling is inherently bad, but that the manner in which cycling is being popularised gives cause for social and environmental concern. Ultimately the book argues that cycling has now become a vehicle for sustaining pro-growth agendas rather than subverting them or shifting to sustainable no-growth/de-growth and less technologically driven visions of modernity. This book makes an innovative contribution to the fields of Cycling Studies, Mobilities and Transport and will be of interest to students and academics working in Human Geography, Transport Studies, Urban Studies, Urban Planning, Public Policy, Sociology and Sustainability.
