Pandemics: What Everyone Needs to Know®, Peter Doherty, who won the Nobel Prize for his work on how the immune system recognizes virus-infected cells, offers an essential guide to one of the truly life-or-death issues of our age. In concise, question-and-answer format, he explains the causes of pandemics, how they can be counteracted with vaccines and drugs, and how we can better prepare for them in the future. Doherty notes that the term "pandemic" refers not to a disease's severity but to its ability to spread rapidly over a wide geographical area. Extremely lethal pathogens are

usually quickly identified and confined. Nevertheless, the rise of high-speed transportation networks and the globalization of trade and travel have radically accelerated the spread of diseases. A traveler from Africa arrived in New York in 1999 carrying the West Nile virus; one mosquito bite later, it was loose in the ecosystem. Doherty explains how the main threat of a pandemic comes from respiratory viruses, such as influenza and SARS, which disseminate with incredible speed through air travel. The climate disruptions of global warming, rising population

---

density, and growing antibiotic resistance all complicate efforts to control pandemics. But Doherty stresses that pandemics can be fought effectively. Often simple health practices, especially in hospitals, can help enormously. And research into the animal reservoirs of pathogens, from SARS in bats to HIV in chimpanzees, show promise for our prevention efforts. Calm, clear, and authoritative, Peter Doherty's *Pandemics* is one of the most critically important additions to the *What Everyone Needs to Know®* series. *What Everyone Needs to Know®* is a

British engineering, the Land Rover Defender is the ultimate off-roader that has delighted owners for generations. Combining military utility with classic and distinctive design, the Defender had been a ubiquitous presence on the automobile scene since its release more than half a century ago. But 68 years since the first model came on the market, the production line came to a halt in January 2016. This presents the perfect opportunity to look back over the Land Rover's history, from its first iteration as a utility vehicle in 1948, to the 21st Century special editions. Landy fans and petrol-heads alike will love Land Rover Defender, a highly illustrated collection of classic and limited edition models, filled with specs, stats, and images of Defenders both at home and abroad. From its reputation as the essential go-anywhere vehicle, the Defender has even won some famous fans, and owners can include the Queen, Sir Winston Churchill and actor Steve McQueen amongst their numbers. In recent years, the Defender has gained a second life as a city vehicle, and proves itself to be just as at home bombing around the streets of London as it always has been in the West Country mud or on the African savannah. The last model came off the production line in February 2016, and Land Rover Defender will be a treasure trove for car lovers and Landy owners alike.
