The British Land Rover 4x4 has grown from 1948 to become one of the world's leading automotive brands. Exactly how it all came together back in the late 1940's and early 50's has been the topic of interest and debate for many years. This was until two Australian enthusiasts, Michael Bishop and Alex Massey quite literally stumbled across senior member of the original Land Rover development team, Arthur Goddard living in Brisbane, Australia in 2009. The discovery led to many of the myths and tales surrounding the early vehicles to be heard as it happened from Arthur's point of view. Then to a trip by Arthur to visit his old work place in Solihull and to the vehicle that he helped bring to life back in 1948. The book contains both a technical and human side to this incredible story as well as a great reunion between Arthur and his old colleague Spen King who went onto design the Range Rover in the 1960's. This is truly a unique story from the time of post War World two Britain to modern day Australia and how the iconic 4x4 grew up so quickly in the 1950's to become the world leader that it is today.

There has rarely been a British success story like the Land-Rover. Developed in a short time and on a small budget, it was launched in 1948 and having passed through many revisions is still a world leader today. The Series detailed in Land Rover takes the reader from the beginning to 1985, and the many surviving examples, supported by a comprehensive parts and restoration industry, are seeing a solid increase in values. Here James Taylor, the premier historian of the marque, provides a detailed study of the Land-Rover's evolution through the period and the variants and special-purpose versions that were produced. Uniquely, it is the

manufacturer's own sales brochures and advertising that supply the illustrations, which number some 400 images and serve not only to correctly depict the vehicles but also to re-create the atmosphere of the times when they were made.
