This sweeping new history recognizes that the Civil War was not just a military conflict but also a moment of profound transformation in Americans' relationship to the natural world. To be sure, environmental factors such as topography and weather powerfully shaped

the outcomes of battles and campaigns, and the war could not have been fought without the horses, cattle, and other animals that were essential to both armies. But here Judkin Browning and Timothy Silver weave a far richer story, combining military and environmental history to forge a comprehensive new narrative of the war's significance and impact. As they reveal, the conflict created a new disease environment by fostering the spread of microbes among vulnerable soldiers, civilians, and animals; led to large-scale modifications of the landscape across several states; sparked new thinking about the human relationship to the natural world; and demanded a reckoning with disability and death on an ecological scale. And as the guns fell silent, the change

continued; Browning and Silver show how the war influenced the future of weather forecasting, veterinary medicine, the birth of the conservation movement, and the establishment of the first national parks. In considering human efforts to find military and political advantage by reshaping the natural world, Browning and Silver show not only that the environment influenced the Civil War's outcome but also that the war was a watershed event in the history of the environment itself.

Against the backdrop of America's escalating urban rebellions in the 1960s, an unexpected cohort of New York radicals unleashed a series of urban guerrilla actions against the city's racist policies and contempt for the poor.

Their dramatic flair, uncompromising vision, and skillful ability to link local problems to international crises riveted the media, alarmed New York's political class, and challenged nationwide perceptions of civil rights and black power protest. The group called itself the Young Lords. Utilizing oral histories, archival records, and an enormous cache of police records released only after a decade-long Freedom of Information Law request and subsequent court battle, Johanna Fernandez has written the definitive account of the Young Lords, from their roots as a street gang to their rise and fall as a political organization. Led predominantly by poor and working-class Puerto Rican youth, and consciously fashioned after the Black Panther Party, the Young Lords confronted race and class inequality and questioned American foreign policy. Their imaginative, irreverent protests and media conscious tactics won significant reforms and exposed U.S. mainland audiences to the country's quiet imperial project in Puerto Rico. In riveting style, Fernandez demonstrates how the Young Lords redefined the character of protest, the color of politics, and the cadence of popular urban culture in the age of great dreams.

In search of answers and action, the award-winning poet and essayist Lisa Wells brings us *Believers*, introducing trailblazers and outliers from across the globe who have found radically new ways to live and reconnect to the Earth in the face of climate change. We find ourselves at the end of the world. How, then, shall we live? Like most of us, Lisa Wells has spent years overwhelmed by increasingly urgent news of climate change on an apocalyptic scale. She did not need to be convinced of the stakes, but she could not find practical answers. She embarked on a pilgrimage, seeking wisdom and paths to action from outliers and visionaries, pragmatists and iconoclasts. *Believers* tracks through the lives of these people who are dedicated to repairing the earth and seemingly undaunted by the task ahead. Wells meets an itinerant gardener and misanthrope leading a group of nomadic activists in rewilding the American desert. She finds a group of environmentalist Christians practicing “watershed discipleship” in New Mexico and another group in Philadelphia turning the tools of violence into tools of farming—guns into ploughshares. She watches the world’s greatest tracker teach others how to read a trail, and visits botanists who are restoring land overrun by invasive species and destructive humans. She talks with survivors of catastrophic wildfires in California as they try to rebuild in ways that acknowledge the fires will come again. Through empathic, critical portraits, Wells shows that these trailblazers are not so far beyond the rest of us. They have had the same realization, have accepted

that we are living through a global catastrophe, but are trying to answer the next question: How do you make a life at the end of the world? Through this miraculous commingling of acceptance and activism, this focus on seeing clearly and moving forward, Wells is able to take the devastating news facing us all, every day, and inject a possibility of real hope. Believers demands transformation. It will change how you think about your own actions, about how you can still make an impact, and about how we might yet reckon with our inheritance.

A strikingly original exploration of what it might mean to be authentically human in the age of artificial intelligence, from the author of the critically-acclaimed *Interior States*. "Meghan O'Gieblyn is a brilliant and humble philosopher, and her book is an explosively thought-provoking, candidly personal ride I wished never to end ... This book is such an original synthesis of ideas and disclosures. It introduces what will soon be called the O'Gieblyn genre of essay writing." —Heidi Julavits, author of *The Folded Clock* For most of human history the world was a magical and enchanted place ruled by forces beyond our understanding. The rise of science and Descartes's division of mind from world made materialism our ruling paradigm, in the process asking whether our own consciousness—i.e.,

souls—might be illusions. Now the inexorable rise of technology, with artificial intelligences that surpass our comprehension and control, and the spread of digital metaphors for self-understanding, the core questions of existence—identity, knowledge, the very nature and purpose of life itself—urgently require rethinking. Meghan O'Gieblyn tackles this challenge with philosophical rigor, intellectual reach, essayistic verve, refreshing originality, and an ironic sense of contradiction. She draws deeply and sometimes humorously from her own personal experience as a formerly religious believer still haunted by questions of faith, and she serves as the best possible guide to navigating the territory we are all entering.

Red River to Appomattox Knopf Books for Young Readers The Harry Potter series of books and movies are wildly popular. Many Christians see the books as largely if not entirely harmless. Others regard them as dangerous and misleading. In his book *A Landscape with Dragons*, Harry Potter critic Michael O'Brien examines contemporary children's literature and finds it spiritually and morally wanting. His analysis, written before the rise of the popular Potter books and films, anticipates many of the problems Harry Potter critics point to. *A Landscape with Dragons* is a controversial, yet thoughtful study of what millions of young people are reading and the possible impact such reading may have on them. In this study of the pagan invasion of children's culture, O'Brien, the father of six, describes his own coming to

terms with the effect it has had on his family and on most families in Western society. His analysis of the degeneration of books, films, and videos for the young is incisive and detailed. Yet his approach is not simply critical, for he suggests a number of remedies, including several tools of discernment for parents and teachers in assessing the moral content and spiritual impact of this insidious revolution. In doing so, he points the way to rediscovery of time-tested sources, and to new developments in Christian culture. If you have ever wondered why a certain children's book or film made you feel uneasy, but you couldn't figure out why, this book is just what you need. This completely revised, much expanded second edition also includes a very substantial recommended reading list of over 1,000 books for

An Environmental History of the Civil War Houghton Mifflin Harcourt
A new look at the Civil War battle that led to Stonewall Jackson's death: A Publishers Weekly Best Book of the Year and "tour de force in military history" (Library Journal). From the award-winning, national bestselling author of *Gettysburg*, this is the definitive account of the Chancellorsville campaign, from the moment "Fighting Joe" Hooker took command of the Army of the Potomac to the Union's stinging, albeit temporary, defeat. Along with a vivid description of the experiences of the troops, Stephen Sears provides "a stunning analysis of how terrain, personality, chance, and other factors affect fighting and distort strategic design" (Library Journal). "Most notable is his use of Union military intelligence reports to show

how Gen. Joseph Hooker was fed a stream of accurate information about Robert E. Lee's troops; conversely, Sears points out the battlefield communications failures that hampered the Union army at critical times . . . A model campaign study, Sears's account of Chancellorsville is likely to remain the standard for years to come." —Publishers Weekly
