Decades of research
have demonstrated
that the parent-child
dyad and the

environment of the
family â €"which
includes all primary
caregivers â €"are at
the foundation of
children's well- being
and healthy

development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents

themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is

increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to

healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Traces the economic, political, and social evolution of New York State's fourth largest city during the twentieth century. *Yonkers in the Twentieth Century* chronicles the decline and rebirth of the fourth largest city in New York State, once known as "the Queen City of the Hudson" and "the City of Gracious Living." Previously an industrial powerhouse, the city's factories turned out essential items that helped the United States win two world wars.

Following World War II, the industrial base of Yonkers eroded as companies moved away, contributing to an increase in poverty. To address the housing needs of its low-income residents, Yonkers built public housing, resulting in a nearly thirty-year court case that, for the first time in United States history, linked school and housing segregation. The case was finally settled in the early years of the twenty-first century, a time that also witnessed the continuation of the city's economic redevelopment efforts along the Hudson River and contiguous downtown area. Striving to once

again become “the Queen City of the Hudson,” Yonkers is being rebuilt beginning at its historic waterfront. “Yonkers in the Twentieth Century provides readers an in-depth perspective of our city that has not yet been told. From the glory days at the dawn of the twentieth century to its later turbulent decades, Marilyn E. Weigold thoughtfully takes us through the vibrant history of our city, affording us the knowledge needed to appreciate our past so to best plan for our future. I encourage those who have an insatiable interest and pride in Yonkers to explore Weigold’s comprehensive

narrative and take a step back in time.” — Mike Spano, Mayor of the City of Yonkers “Yonkers has such an interesting and vibrant history that it needs to be preserved and told. This book is a major accomplishment providing a comprehensive look at the life of the city and will leave a lasting legacy for residents, historians, and all those who appreciate and value knowing how we got to where we are today.” — James J. Work in the 21st Century
An Introduction to Industrial and Organizational Psychology
"Downton Abbey" meets The Selection
in this dystopian tale of love and betrayal
Sixteen-year-old Madeline Landry is practically Gentry royalty. Her ancestor developed the nuclear energy that has replaced electricity, and her parents exemplify the glamour of the upper class.
As for Madeline, she

would much rather read a book than attend yet another debutante ball. But when she learns about the devastating impact the Gentry lifestyle—her lifestyle—is having on those less fortunate, her whole world is turned upside down. As Madeline begins to question everything she has been told, she finds herself increasingly drawn to handsome, beguiling David Dana, who seems to be hiding secrets of his own. Soon, rumors of war

and rebellion start to spread, and Madeline finds herself at the center of it all.

Ultimately, she must make a choice between duty—her family and the estate she loves dearly—and desire. Fans of Ally Condie, Kiera Cass, Veronica Roth, and even Jane Austen will be enthralled by this breathtaking read.

management and labor economists. A History of Modern Psychology John Wiley & Sons (Book). Once in a while a photographer gains the trust of an artist or a band, and his work fuses with that of the artist in such a way that the two become married in the public consciousness. One can think of David Duncan's pictures of Picasso at work or

Alfred Wertheimer's pictures of Elvis backstage in 1956. Elliott Landy's chronicle of The Band from 1968-1969 is of similar importance. He was trusted so deeply that this group of photographs is as intimate a portrait of a group of musicians inventing a new music as you are ever likely to come across. Today we call that music "Americana,"

and it is played all over the world by everyone from Mumford and Sons to the Zac Brown Band. But in 1968, when Elliott first started making these pictures, it was played by six musicians in the town of Woodstock, New York Bob Dylan and a group called The Hawks. They later changed their name to The Band. They had been The Hawks for five years when Bob

Dylan pulled them out of Tony Mart's dive bar on the Jersey Shore to be his band.

sites, adverse impact, age differences and stereotypes, distribution of work performance, and the problems of selecting new employees using research based on incumbent employees Questions established beliefs in the field, especially issues that have been characterized as "not a problem," such as differential validity,

Mile, an inspiring and moving story of three men racing to achieve the impossible -- the perfect four-minute mile. There was a time when running the mile in four minutes was believed to be beyond the limits of human foot speed. In 1952, after suffering defeat at the Helsinki Olympics, three world-class runners each set out to break this barrier: Roger

Bannister was a young English medical student who epitomized the ideal of the amateur; John Landy the privileged son of a genteel Australian family; and Wes Santee the swaggering American, a Kansas farm boy and natural athlete. Spanning three continents and defying the odds, these athletes'

collective quest captivated the world. Neal Bascomb's bestselling adult account adapted for young readers delivers a breathtaking story of unlikely heroes and leaves us with a lasting portrait of the twilight years of the golden age of sport. *Yonkers in the Twentieth Century* John Wiley & Sons A leading authority on abusive

relationships offers women detailed guidelines on how to improve and survive an abusive relationship, discussing various types of abusive men, analyzing societal myths surrounding abuse, and answers questions about the warning signs of abuse, how to identify abusive behavior, how to know if one is in danger, and more.

Reprint. Secrets of the Sprakkar John Wiley & Sons The Canadian first lady of Iceland pens a book about why this tiny nation is leading the charge in gender equality, in the vein of The Moment of Lift. Iceland is the best place on earth to be a woman—but why? For the past twelve years, the World Economic Forum's Global Gender Gap Report

has ranked Iceland number one on its list of countries closing the gap in equality between men and women. What is it about Iceland that enables its society to make such meaningful progress in this ongoing battle, from electing the world's first female president to passing legislation specifically designed to help even the playing field at work and

at home? The answer is found in the country's *sprakkar*, an ancient Icelandic word meaning extraordinary or outstanding women. Eliza Reid—Canadian born and raised, and now first lady of Iceland—examines her adopted homeland's attitude toward women: the deep-seated cultural sense of fairness, the influence of current and historical

role models, and, crucially, the areas where Iceland still has room for improvement. Throughout, she interviews dozens of *sprakkar* to tell their inspirational stories, and expertly weaves in her own experiences as an immigrant from small-town Canada. The result is an illuminating discussion of what it means to move

through the world as a woman and how the rules of society play more of a role in who we view as equal than we may understand. What makes many women's experiences there so positive? And what can we learn about fairness to benefit our society? Like influential and progressive first ladies Eleanor Roosevelt, Hillary Rodham Clinton, and
