"[T]he authors recognize
the role the nurse has in
empowering patients to
take charge of their
health by using social
media responsibly... the
information presented in
this book can be useful
to nurses in a variety of
settings and with
different levels of
understanding regarding
social media. The
authors masterfully
present information on
Web 2.0 and Health 2.0
applications for nurses at
the point of care,
educators, advanced
practice practitioners,
administrators, and
nursing students." --
Michelle E. Block, RN,
PhD, Nursing Science
Quarterly This book
clearly and

comprehensively presents the knowledge and skills nurses and health professionals need in order to effectively use the Internet and interactive social media to educate health consumers. By understanding and using Web 2.0 and Health 2.0 applications and technology, nurses will have access to a critical tool for improving the health of individuals, families, and communities, as well as enhancing their own professional development. The different types of health care information sites available on the Internet are addressed along with criteria for evaluating them. The text provides a framework for understanding the devices that support

social media and depicts the many scenarios in which social media can be used to promote health. Also included are examples of research studies related to health care informatics. Each chapter begins with clear and concise learning objectives and explanations of related terms. A theoretical foundation for understanding the concepts in the chapter is included, along with web-based resources that support additional in-depth learning. Discussion questions and exercises stimulate the development of critical thinking skills and promote point-of-care applications. Advances in technology and point-of-care use expected to come in the near future are woven throughout.

The text will be of value for all nurse education and practice settings. Key Features: Provides easily understood information on interactive social media applications and their implications for nursing and health delivery Illustrates how to use social networking tools and sites effectively Describes the types of health care information websites available and how to evaluate them Addresses the many devices that support social media and when to use them Includes a database of tools and resources to assist educators, students, administrators, and practitioners in their use of the Internet and social media
