This laser cutting/engraving machine is best suited for commercial purposes. Connected to a USB port the machine provides a high-quality engrave on compatible surfaces. It works with just about all non-metal materials. These include solid woods, plywood, density board, PVC, acrylic, and cortical. It also engraves leather, felt, non-woven fabrics, paper products, double color plate, and PET...

Laser Cutter and Cutting Machines from Epilog Laser
Make your CO2 laser machine capable of engraving and marking all types of bare metals, by adding a fiber laser to your laser machine. Dual-source laser machines, such as those in the Fusion Pro series, will allow you to increase your product diversity, thus growing the capabilities and services your business offers. The ability to engrave and/or cut all kinds of materials will give your...

A laser engraving machine consists of three main parts: a laser, a controller, and a surface. The laser is a drawing tool: the beam emitted from it allows the controller to trace patterns onto the surface. The controller determines the direction, intensity, speed of movement, and spread of the laser beam aimed at the surface. The surface is chosen to match the type of material the laser can...

Amazon.co.uk: laser engraving machine
Laser machines can cut wood, paper, plastic, fabric, foam, and much more with such high precision and speed, giving lasers a clear advantage over other types of cutting technologies. Epilog’s laser systems are designed to be as easy to use as a paper printer, you can create a design in a graphic software program of your choice and print it directly to the laser cutting machine.
