Revelation Rowman & Littlefield

The Final Battle for Earth presents events contained in the Book of Revelation (a 2000-year-old prophetic book in the Holy Bible) as a well-orchestrated divine plan to take over the control of the earth from Satan. This final battle to crush Satan and his minions will be accompanied by a series of cataclysmic natural and anthropogenic events (hunger, economic crisis, war, pandemics), and unprecedented natural disasters that may be attributed to climate change. There is a consensus that the earth is facing a dangerous future. The United Nations projects that almost half of humanity is at risk of dying. While the scientific community link this danger to climatic impacts, many Christians believe that the end of age is imminent. Cryptic details of the events surrounding the Second Coming of Christ and end of age carefully hidden in the Revelation, predict a series of catastrophic events that will cause the death of over half of the world's population. The Final Battle for Earth thoughtfully outlines the end-time events and challenges long-held ideas and theories concerning the end-time--especially those surrounding the fall of Satan, the great the tribulation, the rapture, the first resurrection, the Battle of Armageddon, and what is expected of Christians during the end-time.

This book is a "journey book." Sitting down at a computer and producing the story has been a grand trek. I have learned that there is a principle in nature that some things need to mellow, calm down, and soak in. The refusal of winemakers to take a wine before its time is a notion I am coming to understand. It works with writers as well. Like a fetus signaling its mother that it is time to head for the hospital, a literary work stays in the mind until its time. In my education, I have read of the battles of great Church leaders who were eventually thrown out of their churches. In my denominational education, I was largely led to see them as heretics, rebels, eccentrics, revolutionaries, apostates, and as generally representing a lower form of spirituality. Church education often asked me to surrender my biases in favor of accepting a new set of assumptions—my denominational ones. We were to be critical of

everything except our organization. I submit that there is danger in that. This book will cover incidents from the first forty years of my life as a religious addict. You may find something here that you can identify with.

The Great Controversy Between Christ and Satan: From the Destruction of Jersualem to the End of the Controversy
Review and Herald Pub Assoc

The final book of the Bible, Revelation prophesies the ultimate judgement of mankind in a series of allegorical visions, grisly images and numerological predictions. According to these, empires will fall, the "Beast" will be destroyed and Christ will rule a new Jerusalem. With an introduction by Will Self.

"The Lord has shown me that Satan was once an honored angel in heaven, next to Jesus Christ. His countenance was mild, expressive of happiness like the other angels. His forehead was high and broad, and showed great intelligence. His form was perfect. He had noble, majestic bearing. And I saw that when God said to his Son, Let us make man in our image, Satan was jealous of Jesus. He wished to be consulted concerning the formation of man. He was filled with envy, jealousy and hatred. He wished to be the highest in heaven, next to God, and receive the highest honors. Until this time all heaven was in order, harmony and perfect subjection to the government of God."-Ellen G White

This book approaches environmentalism via two academic disciplines, sociology and philosophy. Both have concerns about the environment's ability not only to sustain itself but to thrive. The authors argue that rather than simple sustainability, we must promote thriving for the sake of protecting the environment and all living things. In this greatly expanded second edition, the authors have updated data and examples, introduced new topics and concepts, and emphasized the need to lessen our dependence on fossil fuels. Numerous topics are explored, from the differences between sustainability and thriving, and the overuse of plastic, to mass extinction, the role of natural disasters and more. The Covid-19 pandemic offers an added perspective on the

relationship between disease and the environment.

Christopher, the leader of an elite U.S. special operations unit undertakes one of the most important missions of his military career, attempting to rescue a French journalist kidnapped by ISIS, while distracted with trusting God over himself. He is confused and angry with God and ineffective in his leadership, however, Jackson, the team-deputy and long-time mentor and friend provides much-needed stability for Christopher and the team. The operation reinforces in Christopher that God was not to be trusted when needed most and Jackson leaves the mission searching for God and meaning to his life, as the men prepare to return to Washington D.C for debriefing. As Christopher and his team redeploy from the rescue mission back to Washington D.C., they find themselves out of work as the National Security Advisor deactivates the Christopher-led unit pending an investigation into the failed journalist rescue. Things go from bad to worse for Christopher and Jackson as the two disgraced soldiers are thrust, unbeknownst to them, into the midst of the Rapture. They attempt to keep the chaos of a post-rapture world at bay, in a series of globetrotting missions, from rural Virginia to Brazil, ancient Babylon to remote Alaska. The actions of the president and others leave the world on the brink of World War. Christopher continues throughout each mission to trust himself above God. He refuses to listen to the Holy Spirit-inspired advice that those around him provide and the question lingers will he reconcile and surrender his pain to God.

Covering the Millerite movement of the 1830s and 1840s, sabbatarian Adventism prior to organization of the denomination, and the Seventh-day Adventist Church since its organization in 1861-63, this volume provides a comprehensive history of the denomination. The first major element of the book is a chronology of Adventist history that begins with William Miller's conclusion in 1818 that the Second Advent of Jesus would occur about 1843 and extends through the Science and Theology Conferences of 2002-04. The interpretive introduction that follows places the emergence of Adventism within the context of the Second Great Awakening, describes the development of sabbatarian Adventism from its early opposition to church organization to its highly institutionalized and bureaucratically structured contemporary form, and examines the denomination's geographical expansion from a small North American sect to a global church. The dictionary entries that constitute the bulk of the volume address individuals, organizations, institutions, and doctrines that have been important in the history of the church, including dissident movements and individuals who have emerged as critics of the denomination and its beliefs. Second, there are entries on the development and current situation of Adventism in many individual countries. Finally, thematic entries on such subjects as art, music, literature, health care, and women address other elements important to understanding church life. The dictionary entries are followed by a bibliography of scholarly and popular works published by the denomination, commercial and academic presses, and individuals and organizations.

The missionary work of the Seventh-day Adventist Church started in Southern Malawi in 1902, and histories of churches are usually told from that starting point. This book uses a different approach, it tells the story of Lunjika Mission (earlier called Mombera Mission) which begins in 1932, showing how the SDA Church met a new culture, that of the strongly patrilineal Ngoni and their neighbours to the North, and how it dealt with other churches that had started missionary work in that broad area up to two generations before.

"An audacious and concrete proposal...Half-Earth completes the 86-year-old Wilson's valedictory trilogy on the human animal and our place on the planet."

—Jedediah Purdy, *New Republic* In his most urgent book to date, Pulitzer Prize – winning author and world-renowned biologist Edward O. Wilson states that in order to stave off the mass extinction of species, including our own, we must move swiftly to preserve the biodiversity of our planet. In this "visionary blueprint for saving the planet" (Stephen Greenblatt), *Half-Earth* argues that the situation facing us is too large to be solved piecemeal and proposes a solution commensurate with the magnitude of the problem: dedicate fully half the surface of the Earth to nature. Identifying actual regions of the planet that can still be reclaimed—such as the California redwood forest, the Amazon River basin, and grasslands of the Serengeti, among others—Wilson puts aside the prevailing pessimism of our times and "speaks with a humane eloquence which calls to us all" (Oliver Sacks).
