The book is about me and my interaction with students, faculty, and everyone else. I want to move through my life from birth to the present. The 85 years of life have been eventful, and I am grateful for those who helped me arrive at this point in life. I want to convey the events that guided me through my early years, grade, high school, Army,

marriage, college, teaching, and retirement. Each day was a learning experience. The goal was to make teaching more rewarding to the students. Many assignments that are included were not present when I started in 1965. My work during the summers helped me understand the innovations – NC (numerical control), CNC (computer numerical control), EDM (electric discharge machining). That learning helped me convey that knowledge to the students. Included are jobs made by the students that were designed to provide similar experiences found in the machining industry. There are stories about students and teachers that filled my days as a teacher. Lastly, there are assignments a person can try. My only comment is, “ don ’ t do the last two because they are difficult. ” That was a favorite comment to get students to work the difficult problems. Cambridge University Press

His reputation is legendary. His life an adventure. His pursuers merciless. Florian Homm. A 6-foot-5 colossus. A wrecking ball. An unscrupulous hedge fund manager. The ugly face of the new turbo-charged capitalism. A mover and shaker, at 26, of millions for South American governments and the fabulously wealthy. A cold-hearted mercenary, he disemboweled companies auctioning off the best pieces to the highest bidder. A man who had scores of homes, two jets and hundreds of millions of dollars, but who still didn't have one thing: enough—instead he was driven to consume beyond excess. As if in a daze, Florian Homm forged through his life with brutal efficiency. It began in

Oberursel, a small town in Germany, and led him through Harvard into the heart of the financial markets. Both brilliant and charismatic, his career took off like a comet in the world's toughest business. In the course of his working life, he profited from the bankruptcy of the Vulkan shipping company in Bremen, rehabilitated the German soccer club Borussia Dortmund, and was gunned down in Venezuela. But even then, after a close shave with death, Florian Homm knew only one way forward: the race to the top. Until his recklessness caught up with him in a hard beat. It's the story of a brilliant financial juggler, a runaway, a fugitive, the notorious enfant terrible of the European financial world.

"Antiracist Teaching" is about awakening students to their own humanity. In order to teach about this awakening one must be in the process of awakening oneself. The author shares personal anecdotes to illustrate the kinds of changes he experienced as a result of his antiracist teaching. His book explores the questions, Why is teaching about racism and white privilege to white students so difficult? and What can educators do to become more effective antiracist teachers for all of their students? Amico examines the cognitive and emotive obstacles that students experience in the classroom and argues that understanding these difficulties can lead to their resolution. He considers a variety of different approaches to antiracist teaching and endorses a dialogic approach. Dialogue is the centerpiece of students classroom experiences; students engage in dialogue at nearly every class meeting. The dialogic approach is effective in a variety of different learning settings from K 12 classrooms, trainings, retreats, workshops, and community organizations to the college classroom. Further, the book discusses how to bring antiracist teaching into the core of university curricula."
