The 2015 guidelines still recommend traditional CPR cycles of 30 chest compressions to two rescue breaths for one-rescuer CPR in all age groups and for

two-rescuer CPR in adults. The 15:2 ratio of compressions to breaths remains in the 2015 guidelines for two-rescuer CPR for children and infants.

2020 American Heart Association Guidelines for ...

The recovery period after cardiac arrest is now considered a key element of survival, according to updated guidelines for emergency CPR and heart care that also tackle health disparities and opioid overdoses. The new guidelines issued Wednesday by the American Heart Association provide science-based recommendations to maximize someone's chance of surviving cardiac arrest, which occurs when the heart suddenly stops beating.

wrong. Ideally, the sequence is pretty easy. The victim collapses from a heart attack or other heart problem and is unresponsive and isn't breathing.

How to perform CPR: Guidelines, procedure, and ratio

The 2020 AHA Guidelines for CPR and ECC reflect the latest global resuscitation science and treatment recommendations derived from the 2020 International Consensus on CPR and ECC with Treatment Recommendations (CoSTR). This AHA Guideline is

considered the gold standard with regard to clinical recommendations in the practice of resuscitation science not only in North America, but around the world.
