A LA Times Bestseller “...[A] compelling history of our city’s last half century, as conveyed through the life of one of our most impactful leaders. ...” — Los Angeles Mayor Karen Bass
This is the story of Zev Yaroslavsky, the son of Ukrainian Jews who immigrated to the United States in the early 1920s. His memoir charts the journey of a young social activist who battled to free Soviet Jews before becoming one of the most consequential elected officials in Southern California. Fiercely independent, he combined an activist’s passion with a seasoned politician’s

skill to challenge the region’s power brokers. He fought the Los Angeles Police Department’s excessive force and political spying policies, led the effort to ban local taxes from funding the 1984 Olympics, teamed with President Clinton to avert a catastrophic county bankruptcy, helped develop L.A.’s modern transit system, won a bruising battle with real estate interests to save the Santa Monica Mountains from rapacious development, and was pivotal in the development of Walt Disney Concert Hall and the modernization of the iconic Hollywood Bowl. “I may be part of the establishment,” he said on the day he was first sworn into office, “but the establishment is not part of me.”

In order to celebrate the fifteenth anniversary - the third lustrum - of our Center, we at CHEPS decided to collectively write a book on

the issue of how higher education institutions deal with the demand for change. Institutional change is without any doubt one of the burning issues for researchers in higher education and policy studies in general, but even more so for administrators at the institutional level (institutional leadership, deans) and planners of higher education in public life (government agencies, intermediary organisations, international organisations). Whereas the lustrum book we wrote for our second lustrum concentrated on comparative policy studies, many of them

focusing on comparisons between different national higher education systems, this time the object of our analyses is the institution itself. Today's higher education institutions are faced by demands from a multitude of actors - from inside the institution (students, staff) as well as from the institution's environment (governments, employers, research councils, sponsors). These demands require changes in policy, practice, systems, and culture. The ways in which institutions respond to these demands and how their behaviour may be understood and predicted is the challenge tackled by the authors of this volume, each from their own perspective and each looking at different aspects of the educational organisation.

"[This book provides an] analysis and discussion of every aspect of bankruptcy law, including an overview of bankruptcy; invoking

bankruptcy relief (with a very detailed explanation of the means test); the automatic stay; jurisdiction and procedure; property of the estate; trustee's avoiding powers; payment of claims; executory contracts and unexpired leases; exemptions; discharge; reorganization under Chapter 11; debt adjustments under Chapter 13; debt adjustments under Chapter 12; and cross-border cases under chapter 15. The 2005 BAPCPA amendments and the extensive case law thereunder are explained and critiqued. All relevant Supreme Court cases through the 2015 Term are discussed in depth, including, for example, Stern, Wellness, Arkison, Caulkett, Schwab, Ransom, Lanning, Baker Botts, and many more."--

Bankruptcy in America, in stark contrast to its status in most other countries, typically signifies not a debtor's last gasp but an opportunity to catch one's breath and recoup. Why has the nation's legal system evolved to allow both corporate and individual debtors greater control over their fate than imaginable elsewhere? Masterfully probing the political dynamics behind this question, David Skeel here provides the first complete account of the remarkable journey American bankruptcy law has taken from its beginnings in 1800, when Congress lifted the country's first bankruptcy code right out of

English law, to the present day. Skeel shows that the confluence of three forces that emerged over many years--an organized creditor lobby, pro-debtor ideological currents, and an increasingly powerful bankruptcy bar--explains the distinctive contours of American bankruptcy law. Their interplay, he argues in clear, inviting prose, has seen efforts to legislate bankruptcy become a compelling battle royale between bankers and lawyers--one in which the bankers recently seem to have gained the upper hand. Skeel demonstrates, for example, that a fiercely divided bankruptcy commission and the 1994 Republican takeover of Congress have yielded the recent, ideologically charged battles over consumer bankruptcy. The uniqueness of American bankruptcy has often been noted, but it has never been explained. As different as twenty-first century America is from the horse-and-buggy era origins of our bankruptcy laws, Skeel shows that the same political factors continue to shape our unique response to financial distress.

Examines the complex ecology of quasi-public and privatized institutions that mobilize and administer many of the political, administrative, and fiscal resources of today 's metropolitan regions In recent decades metropolitan regions in the United States have witnessed the rise of multitudes of " shadow governments " that often

supersede or replace functions traditionally associated with municipalities and other local governments inherited from the urban past. Shadow governments take many forms, ranging from billion-dollar special authorities that span entire urban regions, to public–private partnerships and special districts created to accomplish particular tasks, to privatized gated communities, to neighborhood organizations empowered to receive private and public funds. They finance and administer public services ranging from the prosaic (garbage collection and water utilities) to the transformative (economic development and infrastructure). Private Metropolis demonstrates that this complex ecosystem of local governance has compromised and even eclipsed democratic processes by moving important policy decisions out of public sight. The quasi-public institutions of urban governance generally escape the budgetary and statutory restraints imposed on traditional local governments and protect policy decisions from the limitations and vagaries of electoral politics. Moving major policy decisions into a privatized and corporatized realm facilitates efficiency and speed, but at the cost of democratic oversight. Increasingly, the urban electorate is left

debating symbolic issues only tangentially connected to the actual distribution of the resources that affect people’s lives. The essays in *Private Metropolis* grapple with the difficult and timely questions that arise from this new ecology of governance: What are the consequences of the proliferation of special authorities, privatized governments, and public–private arrangements? Is the trade-off between democratic accountability and efficiency worth it? Has the public sector, with its messiness and inefficiencies—but also its checks and balances—ceded too much power to these new institutions? By examining such questions, this book provokes a long-overdue debate about the future of urban governance. Corporate bankruptcy is becoming an increasingly important topic in today’s turbulent environment. The bankruptcy decision can be a matter of life and death for the organization dealing with distress, but the impact of the phenomenon is magnified by the variety of business relationships in which companies typically are involved. If you are considering or need to know more about bankruptcy, this book will help you through all the important steps. Since bankruptcy affects customers, supply chain or network partners, managerial and non-managerial employees, landlords, and others, understanding the bankruptcy process can facilitate best-practice development and the protection of the organization’s interests both before and after a bankruptcy petition. This book does not attempt to provide

advice; each case is unique and should be addressed by competent legal counsel. Rather, you ' ll be provided with an overview of the fundamental principles and processes of both Chapter 11 reorganizations and Chapter 7 liquidations, incorporating examples drawn from relevant legal decisions, research findings, and common experience to highlight the issues involved and provide a basis for discussion. The author also includes details on a number of special topic areas, including small business bankruptcies, governance issues, contractual agreements and obligations such as franchising and collective bargaining agreements, and newly emerging issues surrounding the use of derivatives.
