Enterprise resource planning (ERP) refers to large commercial software packages that promise a seamless integration of information flow through an organization. Traditionally, separate units were created within an organization to carry out various tasks, and these functional areas would create their own information systems thereby giving rise to systems that were not integrated. ERP strives to provide a solution to these problems. Enterprise Resoure Planning Solutions and Management examines the issues that need to be further studied and better understood to ensure successful implementation and deployment of ERP systems.

Whilst Information Systems has the potential to widen our view of the world, it often has the opposite effect by limiting our ability to interact, facilitating managerial and state surveillance or instituting strict hierarchies and personal control. In this book, Bernd Stahl offers an alternative and critical perspective on the subject, arguing that the ongoing problems in this area could be caused by the misconceptualization of the nature and role of IS. Stahl discusses the question of how IS can be used to actually overcome oppression and promote emancipation, breaking the book into four sections. The first section covers the theory of critical research in IS, giving a central place for the subject of ethics. The second section discusses the philosophical underpinnings of this critical research. The third and largest section gives examples of the application of critical work in IS. The final section then reflects on the approach and suggests ways for further development.

Business and Society: Stakeholder Relations, Ethics and Public Policy by Lawrence/Weber/Post, has continued through several successive author teams to be the market-leader in its field. For over thirty years, Business and Society has been updated and reinvented in response to societyâ€™s relationship to business. Business and Society, 11e highlights why government regulation is sometimes required as well as new models of business-community collaboration. Business and Society, 11e is a book with a point of view. Lawrence, Weber and Post believe that businesses have social (as well as economic) responsibilities to society; that business and government both have important roles to play in the modern economy; and that ethics and integrity are essential to personal fulfillment and to business success. The book is designed to be easily modularized; an instructor who wishes to focus on a particular portion of the material may select individual chapters or cases to be packaged in a Primis custom product.
