Social Work Law and Ethics Exam*

University of Chicago Press

This book examines ethics at the intersection of law and justice. If law and justice are concerned with collectively establishing the general terms on which the plurality called "we" share the earth as social beings, then ethics concerns the individual Self's particular moral relationship with the Other. Law, the acknowledged offspring of politics, represents the kind of might that most people accept as legitimate, at least most of the time. Justice, on the other hand, is supposed to vigilantly stand guard over law: to protect us against its biases and excesses, or, at the very least, to rise up and reproach the law whenever it permits or encourages injustice. But what if the belief that a particular legally-authorized state of affairs is "just" – a common enough feeling, especially amongst the privileged – or even "unjust" and in need of correction, were itself in need of a vigilant guardian? This book argues that ethics can and should stand guard over whatever image of justice and/or just law one happens to believe in. The book thus attempts to steer a perilous course between two looming moral hazards: ethics interpreted as the rational production of ethically correct behavior (as in Kant) and ethics interpreted as the spontaneous eruption of pre-rational compassion for the suffering of the Other, come what may (as in Levinas). In the end, the book characterizes ethical life in the law as the more-or-less constant experience of the paradoxical nature of this choice – a feeling of inescapable personal responsibility for the fate of the Other. Based on the author's well-established expertise in the area, this book will appeal to students, scholars and others with interests in legal theory and moral and political philosophy.

New Trajectories in Law American Bar Association

How do lawyers resolve ethical dilemmas in the everyday context of their practice? What are the issues that commonly arise, and how do lawyers determine the best ways to resolve them? Until recently, efforts to answer these questions have focused primarily on rules and legal doctrine rather than the real-life situations lawyers face in legal practice. The first book to present empirical research on ethical decision making in a variety of practice contexts, including corporate litigation, securities, immigration, and divorce law, *Lawyers in Practice* fills a substantial gap in the existing literature. Following an introduction emphasizing the increasing importance of understanding context in the legal profession, contributions focus on ethical dilemmas ranging from relatively narrow ethical issues to broader problems of professionalism, including the prosecutor's obligation to disclose evidence, the management of conflicts of interest, and loyalty to clients and the court. Each chapter details the resolution of a dilemma from the practitioner's point of view that is, in turn, set within a particular community of practice. Timely and practical, this book should be required reading for law students as well as students and scholars of law and society.

Medical Law and Ethics Ethics and Law for School Psychologists is the single best source of authoritative information on the ethical and legal issues school psychologists face every day. Designed specifically to meet the unique needs of psychologists in school settings, this book includes the most up-to-date standards and requirements while providing an introduction to ethical codes, ethical decision making, and the legal underpinnings that protect the rights of students and their parents. This new seventh edition has been extensively updated with the

latest research and changes to the law, with an increased focus on ethical-legal considerations associated with the use of digital technologies. Coverage includes new case law on privacy rights, electronic record keeping, the 2014 Standards for Educational and Psychological Testing, digital assessment platforms, the latest interpretations of the Individuals with Disabilities Education Act, and more. Ethics texts for counseling and psychology are plentiful, and often excellent—but this book is the only reference that speaks directly to the concerns and issues specific to psychologists in school settings. Case vignettes, end-of-chapter questions, and discussion topics facilitate deeper insight and learning, while updated instructor's resources bring this key reference right into the classroom. Keeping up with the latest research and legal issues is a familiar part of a psychologist's duties, but a practice centered on children in an educational setting makes it both critical and more complex. Ethics and Law for School Psychologists provides a central resource for staying up to date and delivering ethically and legally sound services within a school setting.

California Dental Law and Ethics for Dental Assistants Routledge

Law, Ethics and the Biopolitical explores the idea that legal authority is no longer related to national sovereignty, but to the 'moral' attempt to nurture life. The book argues that whilst the relationship between law and ethics has long been a central concern in legal studies, it is now the relationship between law and life that is becoming crucial. The waning legitimacy of conventional conceptions of sovereignty is signalled the renewal of a version of natural law, evident in discourses of human rights, that de-emphasises the role of a divine law-giver in favour of an Aristotelian conception of the natural purpose of life and the 'common good'. Synthesising elements of legal scholarship on sovereignty, theories of biopolitics and biopower, as well as recent developments in the domains of ethics, Amy Swiffen examines the invocation of 'life' as a foundation for legal authority. The book documents the connection between law, life and contemporary forms of biopolitical power by critically analysing the fundamental principles of the bioethical paradigm. Unique in its critical and cross-disciplinary approach, Law, Ethics and the Biopolitical will be of interest to students and teachers in the areas of law and society, law and literature, critical legal studies, social theory, bioethics, psychoanalysis, and biopolitics.
