Sensors, and Command, Control, Communications, and Intelligence (C3I) Technologies for Homeland Security, Defense, and Law Enforcement Applications XVI Cambridge University Press

This book reinvigorates the debate about the origins and development of police culture within our changing social, economic and political landscape. An in-depth analysis and appreciation of the police socialisation, identity and culture literature is combined with a comprehensive four-year longitudinal study of new recruits to a police force in England. The result offers new insights into the development of, and influences upon, new police recruits who refer to themselves as a "new breed" of police officer. Adding significantly to the police culture literature, this original and empirically based research also provides valuable insights into the challenges of modern policing in an age of austerity. Scholars of policing and criminal justice, as well as police officers themselves will find this compelling reading.

A collection of papers deals with the range of activities and considerations of the psychologist working within a law enforcement agency, including stress, suicide, mental health, the police personality, and hostage negotiation. Following a discussion of the police psychologist, training programs for police sergeants which instruct them in the warning signs of emotional problems are portrayed. Chapters focusing on psychological consultation include discussions of an evaluation of police behavioral science services, police consultations, and a jail division study. Psychological research in an urban police department is also considered, and a series of papers on mental health considers police officers as mental health agents and mental health in police work and training. A section on psychological testing includes consideration of selection and promotion, police profiles and psychological assessment, and the psychological assessment of barricaded suspects and hostage negotiators. A section on stress deals with some organizational stresses on police officers, stress and adaptation in police work, and the management of job-related stress. Other general topics discussed are police divorce, police suicide, police officer wives, the use of suggestibility in hostage negotiations, hypnosis, psychics and major crimes, crime and delinquency, and grant proposals for various projects centered in psychological concerns in a police department.

Can the police reduce crime? In 1991, when the first Executive Session on Policing concluded, the answer to that question was generally described as being in the eye of the beholder. Based on the scientific and practical knowledge available at the time, some well-respected criminologists and police scholars concluded that the police were not able to reduce crime. Promising evidence, however, suggested that if the police changed their approach to crime control and prevention, then they might be able to reduce crime. This book outlines the changes in the nature of police crime control conversations resulting from an unprecedented growth in rigorous evaluation research on what works in police crime prevention; examines what it means to be a leader within the policing field, and advocates for reframing leadership through the adoption of "learning organizations" to increase the capacity to fight crime; describes "rightful policing," which looks at elements of procedural justice in police encounters with the public as a way to organize police work; advocates for democratic ideals within law enforcement to combat the mindset that law enforcement officers are at war with the people they serve; presents the ideas for what police executives might do to alleviate the problems of race in contemporary policing; examines the term "black-on-black" violence, a simplistic and emotionally charged definition of urban violence that can be problematic when used by political commentators, politicians and police executives; summarizes current understanding of the effects of ongoing trauma on young children, how these effects impair adolescent and young adult functioning, and the possible implications of this for policing; and finally, describes strategies police organizations could employ to more effectively measure their performance.

Essential Strategies to Deal with Potential Conflict and Hostility that Hampers Police Service to Our Communities Scholar's Choice

This insightful volume examines key research questions concerning police decision to arrest as well as police-led diversion. The authors critically evaluate the tentative answers that empirical evidence provides to those questions, and suggest areas for future inquiry. Nearly seven decades of empirical study have provided extensive knowledge regarding police use of arrest. However, this research highlights important gaps in our understanding of factors that shape police decision-making and what is required to alter current police practice. Reviewing this research base, this brief takes stock of what is known empirically about all aspects related to the use of arrests, providing important insights on the knowledge needed to make

evidence-based policy decisions moving forward. With the potential to better impact policy and programs for alternatives to arrest, this brief will appeal to researchers and practitioners in evidence-based policing and police decision-making, as well as those interested in alternatives to arrest and related fields such as public policy.

Plenary Papers of the 1999 Conference on Criminal Justice Research and Evaluation--enhancing Policy and Practice Through Research Univ of California Press

Over the past ten to fifteen years the police in many Western European countries have undergone a series of profound organisational changes. The police now appear to operate at a greater distance from citizens, they are more impersonal and decontextualized and have become more dependent on digitalised data systems. These changes are captured through the concept of the 'abstract police' and in this international collection of essays, leading policing scholars use this concept to make sense of contemporary changes to police organisations. Drawing on empirical evidence from a wide range of policing contexts, the individual chapters address major questions about current developments in policing: How are police organisations being shaped by the social, cultural, technological and political contexts in which they operate? How does the concept of the abstract police help understanding of the complex interplay between change and continuity in policing? Is the emergence of an abstract police the unintended outcome of processes of rationalization or a deliberate response to the new complexities of late modernity?

Violent crime has been rising sharply in many American cities after two decades of decline. Homicides jumped nearly 17 percent in 2015 in the largest 50 cities, the biggest one-year increase since 1993. The reason is what Heather Mac Donald first identified nationally as the "Ferguson effect": Since the 2014 police shooting death of Michael Brown in Ferguson, Missouri, officers have been backing off of proactive policing, and criminals are becoming emboldened. This book expands on Mac Donald's groundbreaking and controversial reporting on the Ferguson effect and the criminal-justice system. It deconstructs the central narrative of the Black Lives Matter movement: that racist cops are the greatest threat to young black males. On the contrary, it is criminals and gangbangers who are responsible for the high black homicide death rate. The War on Cops exposes the truth about officer use of force and explodes the conceit of "mass incarceration." A rigorous analysis of data shows that crime, not race, drives police actions and prison rates. The growth of proactive policing in the 1990s, along with lengthened sentences for violent crime, saved thousands of minority lives. In fact, Mac Donald argues, no government agency is more dedicated to the proposition that "black lives matter" than today's data-driven, accountable police department. Mac Donald gives voice to the many residents of high-crime neighborhoods who want proactive policing. She warns that race-based attacks on the criminal-justice system, from the White House on down, are eroding the authority of law and putting lives at risk. This book is a call for a more honest and informed debate about policing, crime, and race.

Critical Reflections on Evidence-Based Policing Harvard University Press

Because police are the most visible face of government power for most citizens, they are expected to deal effectively with crime and disorder and to be impartial. Producing justice through the fair, and restrained use of their authority. The standards by which the public judges police success have become more exacting and challenging. Fairness and Effectiveness in Policing explores police work in the new century. It replaces myths with research findings and provides recommendations for updated policy and practices to guide it. The book provides answers to the most basic questions: What do police do? It reviews how police work is organized, explores the expanding responsibilities of police, examines the increasing diversity among police employees, and discusses the complex interactions between officers and citizens. It also addresses such topics as community policing, use of force, racial profiling, and evaluates the success of common police techniques, such as focusing on crime "hot spots." It goes on to look at the issue of legitimacy "how the public gets information about police work, and how police are viewed by different groups, and how police can gain community trust. Fairness and Effectiveness in Policing will be important to anyone concerned about police work: policy makers, administrators, educators, police supervisors and officers, journalists, and interested citizens.

It is clear from discussions that growing hostility between labor and management is hampering efforts of law enforcement agencies to reduce crime and the fear of crime in their respective communities. The goal of this research paper is to provide chiefs of police with information that will help them better understand labor-management relations in law enforcement and give them ideas and strategies to consider using to improve labor-management relations in their own jurisdictions. Input has been sought from labor, management, labor commissioners and arbitrators so all points of view can be represented in this paper.

This groundbreaking work examines Latin America's prison crisis and the failure of mass incarceration policies. As crime rates rose over the past few decades, policy makers adopted incarceration as the primary response to public outcry. Yet, as the number of inmates increased, crime rates only continued to grow. Presenting new cross-national data based on extensive surveys of inmates throughout the region, this book explains the transformation of prisons from instruments of incapacitation, deterrence, and rehabilitation to drivers of violence and criminality. Bergman and Fondevila highlight the impacts of internal drug markets and the dramatic increase in the number of imprisoned women. Furthermore, they show how prisons are not isolated from society - they are sites of active criminal networks, with many inmates maintaining fluid criminal connections with the outside world. Rather than reducing crime, prisons have become an integral part of the crime problem in Latin America.
