I Am A Lawyer That Means
Bloomsbury Publishing USA

In addition to a standard first-year legal writing curriculum, most law schools now require upper-level students to write a sophisticated legal research paper on a topic of their choice. Students often struggle through the scholarly writing process, from finding a topic to polishing a final paper, and many never fully develop and defend a thesis. *Scholarly Writing: Ideas, Examples, and Execution* offers a lifeline to students, guiding them through the process of constructing their legal research papers from start to finish. With over 10 years combined experience teaching scholarly writing to J.D. and LL.M. students, the authors identify common roadblocks for student writers, and offer advice and techniques for how to successfully overcome these roadblocks. The book walks students through a five-step process for researching and writing scholarly papers and follows five published student papers from idea to final execution as a method of

illustrating the principles advocated in the text. This example-based approach sets this book apart from others; the authors not only tell students how to approach their papers, but through annotated excerpts of example papers, they show students how to approach their papers. The book includes up-to-date information about legal research and organizational tools. It also includes "bright ideas" that supplement the text with ideas and examples for student writers. The text may be used as either a required text for a course in *Scholarly Legal Writing* or a companion guide for students working on scholarly legal writing projects independently.

The Best Lawyer Are Born in August West Academic Publishing
The globalization of science, engineering, and medical research is proceeding rapidly. The globalization of research has important implications for the U.S. research enterprise, for the U.S. government agencies, academic institutions, and companies that support and perform research, and for the world at large. As science and technology capabilities grow around the world, U.S.-based organizations are finding that international collaborations and partnerships provide unique opportunities to enhance research and training. At the same time, significant obstacles exist to smooth collaboration across national borders. Enhancing

international collaboration requires recognition of differences in culture, legitimate national security needs, and critical needs in education and training. In response to these trends, the Government-University-Industry Research Roundtable (GUIRR) launched a Working Group on International Research Collaborations (I-Group) in 2008, following its meeting on New Partnerships on a Global Platform that June. As part of I-Group's continuing effort, a workshop on Examining Core Elements of International Research Collaboration was held July 26-27, 2010 in Washington, DC. One primary goal of the workshop is to better understand the risks involved in international research collaboration for organizations and individual participants, and the mechanisms that can be used to manage those risks. Issues to be addressed in the workshop include the following: (1) Cultural Differences and Nuances; (2) Legal Issues and Agreements; (3) Differences in Ethical Standards; (4) Research Integrity and the Responsible Conduct of Research; (5) Intellectual Property; (6) Risk Management; (7) Export Controls; and (8) Strategies for Developing Meaningful International Collaborations. The goal for the workshop and the summary, *Examining Core Elements of International Research Collaboration*, is to serve as an information resource for participants and others interested in international research collaborations. It will also aid I-Group in setting its future goals and priorities.
