arms students with a thorough overview of the contemporary law school experience. This isn't the advice of graying professors or battle-scarred practitioners decades removed from the law school. Fresh out of University of Pennsylvania Law School, Robert Miller has assembled a panel of recent law school graduates all of whom are perfectly positioned to shed light on what law school is like today. Law School Confidential invites you to walk in their steps to success and to learn from their mistakes. From taking the LSAT, to securing financial aid, to navigating the notorious first semester, to exam-taking strategies, to applying for summer internships, to getting on the law review, to tackling the bar and beyond...Law School Confidential explains it all. Planet Law School West Academic Publishing How to Crush Law School(c) is the book I wish I could have read the summer before my 1L year. Great law students do not necessarily work harder than their colleagues. Instead, they typically have an informational advantage to combine with their excellent work ethic. In other words,

they are privy to useful bits of wisdom that give them a slight edge over their competition. Unfortunately, only a fraction of law students learn the secrets to success in law school, and thus most law students are at a tremendous disadvantage. How to does one obtain information other law students don't have? How does one gain an edge? How to Crush Law School solves the enigma; it clears up the ambiguities. In this concise book, the author explicitly reveals the secrets to success in law school and shares his most valuable bits of law school wisdom. This step-by-step guide to crushing law school reveals the following: How to prioritize law school tasks and manage time to achieve optimal efficiency; How to manage your mind and utilize neuroscience to perform at your best; How to leverage focus, willpower, habit, motivation, momentum, and positivity to gain an edge; How to approach the various types of law school exam questions, including issue-spotters, traditional essays, and multiple-choice questions; and How to write a

perfect answer on a law school exam. ABOUT THE AUTHOR I don't like to brag about myself in the third person, so my "about the author" may be a bit unusual. Here goes. I graduated from the University of South Carolina, School of Law in 2016, where I served as a research editor for the South Carolina Law Review. While in school, I had the honor of working as a tutor of legal research and writing. I accumulated a lot of law school accolades, including CALI awards in legal writing, advanced legal writing, income tax, and criminal procedure. During law school, I received a joint master's degree from the Vermont Law School in environmental law and police. Thereafter, I clerked for Judge Joseph F. Anderson, Jr. in the United States District Court, and then I clerked for Judge David R. Duncan at the United States Bankruptcy Court. After law school, I went back to business school and received an MBA from the University of South Carolina, where I focused on marketing, new venture analysis, and intellectual property strategy. While

completing my MBA, I worked as a research editor for one of my favorite professors in law school. If you read all of that, thank you for your interest. I'm flattered, and I hope you enjoy the book and crush law school.

The 19th century saw dramatic changes in the legal education system in the United States. Before the Civil War, lawyers learned their trade primarily through apprenticeship and self-directed study. By the end of the 19th century, the modern legal education system which was developed primarily by Dean Christopher Langdell at Harvard was in place: a bachelor's degree was required for admission to the new model law school, and a law degree was promoted as the best preparation for admission to the bar. William P. LaPiana provides an in-depth study of the intellectual history of the transformation of American legal education during this period. In the process, he offers a revisionist portrait of Langdell, the Dean of Harvard Law School from 1870 to 1900, and the

earliest proponent for the modern method of legal education, as well as portraying for the first time the opposition to the changes at Harvard.

"The challenge, then, is not to invent new victims or new scapegoats but to mobilize America for the future. What would it take to ensure that all of us can succeed at getting the job done, the problem solved, and the future more secure?" As a student at Yale Law School in 1974, Lani Guinier attended a class with a white male professor who addressed all the students, male and female, as "gentlemen." To him the greeting was a form of honorific, evoking the values of traditional legal education. To her it was profoundly alienating. Years later Guinier began a study of female law students with her colleagues, Michelle Fine and Jane Balin, to try to understand the frustrations of women law students in male-dominated schools. Women are now entering law schools in large numbers, but too often many still do not feel welcome. As one says, "I used to be very driven, competitive. Then I started to realize that all my effort was getting me nowhere. I just stopped caring. I am scarred forever." After interviewing hundreds of

women with similar stories, the authors conclude that conventional one-size-fits-all approaches to legal education discourage many women who could otherwise succeed and, even more, fail to help all students realize their full potential as legal problem-solvers. In *Becoming Gentlemen* Guinier, Fine, and Balin dare us to question what it means to become qualified, what a fair goal in education might be, and what we can learn from the experience of women law students about teaching and evaluating students in general. Including the authors' original study and two essays and a personal afterword by Lani Guinier, the book challenges us to work toward a more just society, based on ideals of cooperation, the resources of diversity, and the values of teamwork.

Publishing There is a saying about law school that they scare you to death the first year, work you to death the second, and bore you to death the third. Law students today have a pretty good idea what to expect from the initial plunge into the law. Scott Turow's One L, describing his first year at Harvard, has become almost mandatory reading for anyone contemplating law school. And because that level of intensity is what so many expect, that is how the first year usually plays out, complete with ulcers, outlines, and relentless work. But the education does not end after the

---

first year. Law school is a three-year course of study, and the first year often bears little resemblance to the final two. Facing two more years of grueling class work, mounting student loans, increasing pressure to stand out from the crowd, and the never-ending search for the perfect job, upper-class students come to realize that surviving the fall into the deep end is no guarantee they will learn to swim. Letters from Law School is about the second year of law school, after the cold shock of the plunge. This book describes the struggle to come up for air.

Along the way it conveys the author's love of the law and admiration for the role of law in the United States. How to Think About Law School adopts a broader and longer perspective than any of its competitors, beginning with freshman year, and covering each year as an undergraduate, through law school admissions, the three years of law school, and into the beginnings of legal practice. The Handbook provides useful, concrete and

practical information including, lists of Dos and Don'ts, a Four Year Checklist, information about key resources, a step-by-step explanation of the law school application process, as well as a formula for selecting "competitive," "safe" and "reach" law schools. In addition, it presents detailed information about the law school curriculum each year, the importance of Law Review, clinical programs, Moot Court, interviewing skills, and summer associate positions.

Cracking the Case Method Penguin  
 Just how tough are the country's most prestigious law schools? Most alumni would answer with stories of humiliating "Socratic dialogue failures" in the classroom and all-night, caffeine-fueled cram sessions. Until now, the traditional concept of the law-school experience was the one presented in Scott Turow's *One-L*, published in 1977, a dark description of his first year at Harvard Law School. Twenty-four years later things have definitely changed.

Turow's book became the accepted primer--and warning--for aspiring law students, giving them a glimpse of what awaited: grueling nonstop study, brutally competitive classes, endless research, and unfathomable terminology. It described a draconian prison and endless work in the company of equally obsessive, desperate fellow students. Yet, sidestepping terror and intimidation, law students (and new authors) Robert Byrnes and Jaime Marquart entered highly prestigious law schools, did things their own way, earned law degrees, and were hired by a Los Angeles law firm, turning Turow's vision upside down. In their parallel narratives--two twisted, hilarious, blighted, and glorious coming-of-age stories--Byrnes and Marquart explain how they managed to graduate while spending most of their time in the pursuit of pleasure. Byrnes went to Stanford to reinvent himself--after a false start in politics he wanted to explore the life of the mind. It took him virtually no time to discover that the law was neither particularly intriguing nor particularly challenging.

---

He could play around the clock. When Byrnes wasn't biking he was getting drunk and smoking crack. Finding himself when he discovered the right woman, Byrnes finally moved to Los Angeles during his third year and flew upstate only to take final exams. Born and raised in a small town in Texas, Marquart had never lived outside the state before arriving at Harvard. Amazed at his own good luck, he approached school with all due diligence. Disenchantment followed shortly thereafter, and Marquart learned he needn't be intimidated by his classmates and teachers. With a mysterious and bizarre companion--another student called the Kankos--Jaime took up traveling but devoted most of his energy (and considerable money) to gambling, counting cards in casinos around the country. Irreverent, funny, and downright shocking, *Brush with the Law* will inspire undergraduates to bone up for the entrance exam, while outraging lawyers and the admissions officers of their beloved alma maters. Upon

realizing how easy it was to get good grades, Jaime relates: "I approached my second year with [one] goal . . . take classes that required the least amount of work and the least amount of attendance . . . To accomplish my . . . goal, I devised *The System*, a short instruction manual on the principles behind selecting and ditching law school classes. *The System's* goal was to screw off as much as possible, with few if any consequences." --from *Brush with the Law*

For about 150 years, law schools have relied on the Case Method to teach the skills and art of legal analysis to first-year law students. Yet many first-year students struggle academically. They do not struggle because they lack intellectual ability. Instead, they struggle because they are suddenly immersed in a unique and seemingly opaque educational process where nobody has concretely explained what they should try to learn, much less how to learn it. So these students are forced to try to understand their professors' teaching methods on their own a difficult task for many

---

beginning students, even those who may "get it "but cannot articulate what "it "is. So students understandably ask fundamental questions like the following. Why do reading assignments consist of appellate court opinions? Why do professors rely on the Socratic Method? Why do law school classes so often leave students with more questions than answers? Why do professors' teaching methods differ from their assessment methods and how can students bridge that gap? What do instructors look for when they grade essay exam answers? Why can law students believe they knew "all the rules, "yet get poor grades? *Cracking the Case Method, 3d ed.* , provides concise and accessible instruction on how to succeed in law school by answering these questions and many others. Students need to know what to study and how the opinions they read and discuss in class relate to law school exams. This book provides an in-depth examination of these critical topics: The Case Method: 1) how it relates to Socratic-style questioning, and 2) how it helps develop analytical skills. Semester-long strategies for learning how to "think like a lawyer "by getting the most out of reading judicial opinions, attending classes, outlining, and preparing for exams.

An analytical framework that helps students read appellate court cases to focus on legal issues, legal principles, and judges' reasons for adopting and applying those principles. Twenty examples that illustrate this analytical framework; these examples discuss essential legal principles from first-year courses and use judicial opinions often assigned in these courses. How to develop case briefs and use them to prepare for class discussions, outlining, and exams with illustrations drawn from two sample annotated briefs. The major types of legal argument with many illustrations drawn from actual cases. How to use class discussions to practice legal analysis, demonstrated with annotated excerpts from actual first-year class discussions. How to prepare for exams with the following learning and study tools: 1) developing traditional or visual outlines of course materials; 2) analyzing hypotheticals; 3) creating checklists and flowcharts; and 4) practicing exam-taking skills. An approach for analyzing exam questions and writing effective exam answers that display powerful analytical skills with illustrations drawn from actual essay exam questions and annotated answers. An opportunity for students to practice all the

learning, writing, and analytical skills discussed in this book to a new case in a sample torts class, including the following skills: 1) reading the case; 2) briefing the case; 3) discussing the case in class; 4) incorporating the principles from the case into an outline; and 5) answering an exam question related to the case. This book provides indispensable information to people considering law school, preparing for their 1L year, or currently attending law school.

History of the Harvard Law School and of Early Legal Conditions in America Nova Press Law school has the reputation of being one of the hardest academic programs. It is a reputation well earned. However, Law School Basics is chock-full of insights and strategies that will prepare you well and give you a head start on the competition. Law School Basics presents a thorough overview of law school, legal reasoning, and legal writing. It was written for those who are considering law school; for those who are about to start law school; and for those who are interested in knowing more about lawyering and the legal process. Law School Basics was

The Best 173 Law Schools Plume Books Cracking the Case Method is a concise and down-to-earth guide to the intellectual content of law school instruction, particularly in the first year. Readers will discover why and how law school instructors use appellate court cases as vehicles for teaching legal analysis. This book explains that legal analysis is a process by which judges and lawyers use argument (or rhetoric) to connect stories to legal conclusions, and reveals how to read judges' appellate court opinions as arguments rather than merely as sources of rules. To succeed in law school, students have to apply analytical skills to novel stories by crafting arguments of their own, both in class meetings and when answering final examination essay

questions. This book promotes readers' ability to apply analytical skills by: Demonstrating how to "brief" cases in a way that captures both arguments and rules; Explaining and illustrating common types of arguments; Using actual law school classroom dialogues annotated by the authors to explain how instructors use classes to further law schools' goal of teaching argument skills; Setting forth effective final examination preparation strategies and techniques for crafting answers that demonstrate analytical skills; and Illustrating final exam strategies and techniques by providing actual law school final examination questions followed by model answers annotated by the authors. The subjects that readers will study in law school (whether rules of contracts or processes such as jury trials) all emanate from the Common Law Tradition. To further enhance readers'

analytical understanding and skills, the book concludes with a chapter that provides a brief and colorful overview of this rich and fascinating tradition. The chapter includes comparisons to the common law tradition's Civil Law counterparts, enhancing the book's value to all readers.. If you want to achieve academic success in law school, this book provides you with the tools you need to Crack the Case Method. Reviews: "Law school study fundamentally differs from university study. Most first year law students therefore find the transition from college to law school difficult and bumpy. This book explains the differences and gives a thorough guide to what it takes to do well in law school, especially during that crucial first year. Students who want a significant edge over their classmates will read it before the first day of 1L. I wish I had." Alex Kozinski Chief Judge of the United States Court of

Appeals for the Ninth Circuit "The Authors provide an accessible and often humorous guide to the Case Method. In addition to demystifying legal studies for the new student, the book provides a sound foundation for the future practitioner; the object of the Case Method, in the main, is to allow the application of legal principles to help clients resolve their problems." Hector G. Gallegos Partner and Head of Morrison & Foerster LLP's Los Angeles Litigation Department "Legal education and the legal profession are in the midst of a profound restructuring brought on by a revolution in technology and dramatic changes in the economy. In the midst of such change, Cracking the Case Method is a critically important work that will help all law students develop a lawyer's most important tool - using the venerable case method to carry out legal analysis and to hone their analytical

skills - the essence of every lawyer's work. Cracking the Case Method is not an abstract academic exercise, but a nuts and bolts, how to approach to analysis that will train better lawyers and promote just results in our judicial system. The case method may be over 100 years old but how to use it as an effective tool for good lawyering has never been done like it is in these pages." Jeffrey S. Brand Dean and Professor of Law University of San Francisco School of Law"
