For more than a century, sporting spectacles, media coverage, and popular audiences have staged athletics in black and white. Commercial, media, and academic accounts have routinely erased, excluded, ignored, and otherwise made absent the Asian American presence in sport. This book seeks to redress this pattern of neglect, presenting a comprehensive perspective on the history and significance of Asian American athletes, coaches, and teams in North America. The contributors interrogate the sociocultural contexts in which Asian Americans lived and played, detailing the articulations of power and possibility, difference and identity, representation and remembrance that have shaped the means and meanings of Asian Americans playing sport in North America. This volume will be of interest to students and scholars of the Asian American experience, ethnic relations, and the history of sport.

Named a Best Book of 2021 by the Financial Times and a Best Science Book of 2021 by The Guardian "Rovelli is a genius and an amazing communicator... This is the place where science comes to life." ?Neil Gaiman "One of the warmest, most elegant and most lucid interpreters to the laity of the dazzling enigmas of his discipline...[a] momentous book" ?John Banville, The Wall Street Journal A startling new look at quantum theory, from the New York Times bestselling author of Seven Brief Lessons on Physics, The Order of Time, and Anaximander. One of the world's most renowned theoretical physicists, Carlo Rovelli has entranced millions of readers with his singular perspective on the cosmos. In Helgoland, he examines the enduring enigma of quantum theory. The quantum world Rovelli describes is as beautiful as it is unnerving. Helgoland is a treeless island in the North Sea where the twenty-three-year-old Werner Heisenberg made the crucial breakthrough for the creation of quantum mechanics, setting off a century of scientific revolution. Full of alarming ideas (ghost waves, distant objects that seem to be magically connected, cats that appear both dead and alive), quantum physics has led to countless discoveries and technological advancements. Today our understanding of the world is based on this theory, yet it is still profoundly mysterious. As scientists and philosophers continue to fiercely debate the meaning of the theory, Rovelli argues that its most unsettling contradictions can be

explained by seeing the world as fundamentally made of relationships rather than substances. We and everything around us exist only in our interactions with one another. This bold idea suggests new directions for thinking about the structure of reality and even the nature of consciousness. Rovelli makes learning about quantum mechanics an almost psychedelic experience. Shifting our perspective once again, he takes us on a riveting journey through the universe so we can better comprehend our place in it.

This fourth edition of Roderic Camp ' s highly respected Mexican Political Biographies is an updated comprehensive biographical directory of leading state and national politicians in Mexico, covering the years 1935 – 2009. The original edition, published in 1976, was the first and only comprehensive biographical work on contemporary political figures in any language and served as the prototype for the Mexican government ' s brief foray into its own official biographical directory. The Mexican Supreme Court has cited every biography of justices in the third edition as the basis of its biographies in the late 1980s. With updates of the existing biographies and appendices, plus almost 1,000 additional biographies, this fourth edition now features close to 3,000 entries and serves as a unique resource list of the chronological occupants of all leading national political posts. The need for such information has become even more pronounced since Mexico ' s political transformation from a semi-authoritarian to a democratic model. This latest edition allows readers access to information about Mexican politicians into the new century, and like its earlier versions, will be a valuable tool for government officials, journalists, historians, social scientists, the business community, and students. Finally, it includes a detailed bibliographic essay that identifies and explains the significance of biographical sources and has been enhanced by numerous up-to-date Internet sources. An added convenience is an accompanying CD that allows readers to search the biographies and appendices, enhancing the longevity, usefulness, and uniqueness of this edition.

"The Survival Bible for Administrators and Teachers is a firsthand and real-world explanation of what proven, tenured educators must do to recognize, hopefully avoid, but if necessary, defend themselves against disciplinary charges brought against them... a must-read for all practicing educators." -Paul Derkasch, Esq. The premise that tenure guarantees public school educators lifetime job security is a myth. Sullivan identifies the many ways that tenured employees can be fired or forced out of their jobs. This book is a detailed manual of how to anticipate that an attack upon a tenured administrator or teacher is imminent, and the various strategies that the targeted employee can utilize to prevent, fend off, or successfully adjudicate this assault. Sullivan, who was a successful defendant in the longest 3020-a Disciplinary Hearing in New York State, lists the Fourteen Rules of Engagement he followed to win complete vindication. The basics from how to anticipate an aggressor's actions, to managing information and the media, to working with one's attorney, to the process leading up to and the structure of an actual 3020-a Disciplinary Hearing and much more are covered in detail in this book. The Survival Bible for Administrators and Teachers is a firsthand explanation of what tenured educators must do to recognize and defend themselves against those forces within a community that would do them professional harm. It is a must-read, self-defense manual for all educators.
