The twenty-three distinguished writers included in *From Curlers to Chainsaws: Women and Their Machines* invite machines into their lives and onto the page. In every room and landscape these writers occupy, gadgets that both stir and stymie may be found: a Singer sewing machine, a stove, a gun, a vibrator, a prosthetic limb, a tractor, a Dodge Dart, a microphone, a smartphone, a stapler, a No. 1 pencil and, of course, a curling iron and a chainsaw. *From Curlers to Chainsaws* is a groundbreaking collection of lyrical and illuminating essays about the serious, silly, seductive, and sometimes sorrowful relationships between women and their machines. This collection explores in depth objects we sometimes take for granted, focusing not only on their functions but also on their powers to inform identity. For each writer, the device moves beyond the functional to become a symbolic extension of the writer's own mind—altering and deepening each woman's concept of herself.

Dear Alan, You described yourself as the least successful writer in the Western World. Going through the box of material you left here I have to say you sure as hell ain't that. You have a real body of work written and rejection hasn't stopped you from doing what you love. What you say about your reasons for writing sound pretty right to me. I'm so glad you've kept writing and hope you never stop. Who knows.

Neither one of us is dead yet. Anything is possible. Yours, Paul

This book describes the century-long emergence and battle to protect drivers and occupants of off-road and on-road vehicles from crush-related injuries from rollovers. Deaths and serious injuries have been associated with vehicle overturns that involve tractors, other motorized machinery, automobiles, and small vehicles. It took more than a century to attend to much of this epidemic of death and disabling injury that resulted from these overturns. This book argues that a key factor in this response was epidemiology that reported rollover-related deaths and engineering revisionism that moved responses from " blame the victim " to rollbars to prevent the deaths.

The average American spends 70 hours per year, the equivalent of nearly two full work weeks, on lawn and garden care. For some, lawn care is an onerous task, grudgingly accomplished, and for others it is a source of personal pride and accomplishment. Over the past four decades, author John B. Marek has variously and intermittently fallen into both camps. In *Ben and the Art of Lawnmower Maintenance*, he weaves humorous personal anecdotes with fascinating historical facts, and recounts his father's homespun wisdom alongside insight gained from his own suburban homesteading experiences.
