Forensic Science: From the Crime Scene to the Crime Lab, Second Edition, is designed to present forensic science in a straightforward and student-friendly format. Ideal for students with limited background in the sciences, topics are arranged to integrate scientific methodology with actual forensic applications. Discussions are focused on explaining state-of-the-art technology without delving into extraneous theories that may bore or overwhelm non-science students. Only the most relevant scientific and technological concepts are presented, keeping students focused on the practical

knowledge they'll need in the field.

This IBM® Redbooks® publication consolidates, in one document, detailed descriptions of the hardware configurations and options offered as part of the IBM Midrange System Storage™ servers, which include the IBM System Storage DS4000® and DS5000 families of products. This edition covers updates and additional functions available with the IBM System Storage DS® Storage Manager Version 10.60 (firmware level 7.60). This book presents the concepts and functions used in planning and managing the storage servers, such as multipathing and path failover. The book offers a step-by-step guide to using the Storage Manager to create arrays, logical drives, and other basic (as well as advanced) management tasks. This publication also contains practical information about diagnostics and troubleshooting, and includes practical examples of how to use scripts and the command-line interface. This publication is intended for customers, IBM Business Partners, and IBM technical

professionals who want to learn more about the capabilities and advanced functions of the DS4000 series of storage servers with Storage Manager Software V10.60. It also targets those who have a DS4000 and DS5000 storage subsystem and need detailed advice about how to configure it.

Amazon readers are praising ALL THE KIDS LOVE THAT SCARY STUFF: "It's a rare work..." "... a delightfully spooky tale..." "Thoroughly enjoyable from beginning to end." "...could visualize each character and every scene..." "Like a spooky tale told around a camp fire." "...an exciting fast read!" Now, you can join the excitement. Order all the adventure, fun, and scares, today! ----- It's Saturday, October 31st, 1981. Do you know where your children are? For three young boys, Rob Hanson, Craig Chambers, and Rick Davenport, Saturdays in their sleepy Carolina town mean a day of childhood fun: watching cartoons in the morning, goofing off by the creek, and playing arcade games at the local store. This year, when Halloween falls upon a Saturday, they get to add scary costumes, horror movies, pumpkin carving, and trick-or-treating to their lists. Excitedly, they set out on their bicycles for the day, looking for adventure. But, what they find instead... is a supernatural menace that not only threatens their hometown, but the entire world as well. When their pleas for help fall upon the deaf ears of the townsfolk, they realize that it's up to them to make a stand and fight the forces of evil alone. Now, with everything they know in danger, their only hope in saving the day lies with the power of friendship, and the magic of Halloween...

----- If you love Halloween, are a child of the 80s, or are just young at heart, you simply cannot miss "ALL THE KIDS LOVE THAT SCARY STUFF." It's an exciting Halloween tale in the tradition of the great "Kids VS Creeps" films of the 1980s. It features a maniacal villain with an evil plan, smart kids on bicycles trying to save the Earth, and a town full of adults who never listen. Throw in a ton of childhood memories, pack it full of fun 1980s references, and you get a great time for young and old alike! Kids will love the scary adventure. Adults will love the nostalgia. It's the first in the series of HALLOW'EVE books, sure to become a holiday tradition. Buy it. Read it. Love it, Share it. Enjoy!

This book is designed for the drummer who has had some experience playing other styles of music but has a desire to learn some techniques and styles of jazz. It is assumed the reader has a knowledge of notes, measures or bars, time signatures, musical notation, and drum notation. A knowledge of the drum rudiments is also desirable. Though the book is meant as an overview to teach basic and essential jazz techniques, it will take someone who is willing to put in the time and practice from being a total jazz novice to the level of being a competent drummer in the jazz idiom. In addition to learning the essential knowledge required to play jazz, the student will also accomplish many intermediate and advanced techniques. I should note that I wrote this book EXACTLY as I teach jazz drumming techniques in my private lessons. This system has been developed and refined over the years and has given excellent, proven results that have produced some fine drummers, many of whom went on to build careers

playing and teaching jazz. I am hoping that this book will inspire the reader and student to delve further into the jazz idiom and develop his or her technique and knowledge to the highest level. and even if the student goes no further in the jazz idiom, I am confident that the book will open doors to other avenues that the drums can take and will benefit the reader in any style of music he or she chooses to play.

Understanding case law in high-liability areas and performing the job within a legal framework places a criminal justice agency in the best position to defend against a lawsuit. This handbook addresses the problems confronting criminal justice practitioners

and their agencies due to the ever-increasing number of civil liability lawsuits. It introduces the reader to civil liability generally and the federal law specifically, while indicating the steps that can be taken to minimize the risk of litigation. Civil Liability in Criminal Justice is one of very few texts on the subject that combines applicable case law and related liability research, a valuable feature for current and future policy makers and managers. Ross also provides an overview of current case law in high-liability areas, enhancing student knowledge and practitioner job performance.
