Low Carbon Cities is a book for practitioners, students and scholars in architecture, urban planning and design. It features essays on ecologically sustainable cities by leading exponents of urban sustainability, case studies of the new directions low carbon cities might take and investigations of how we can mitigate urban heat

stress in our cities' microclimates. The book explores the underlying dimensions of how existing cities can be transformed into low carbon urban systems and describes the design of low carbon cities in theory and practice. It considers the connections between low carbon cities and sustainable design, social and individual values, public space, housing affordability, public transport and urban microclimates. Given the rapid urbanisation underway globally, and the need for all our cities to operate more sustainably, we need to think about how spatial planning and design can help transform urban systems to create low carbon cities, and this book provides key insights.

**The Engineer** Springer

Challenging the predominantly Euro-American approaches to the field, this volume brings together essays on a wide array of literary, filmic and journalistic responses to the decade-long wars in Afghanistan and Iraq. Shifting the focus from so-called 9/11 literature to narratives of the war on terror, and from the transatlantic world to Iraq, Syria, Afghanistan, the Afghan-Pak border region, South Waziristan, Al-Andalus and Kenya, the book captures the multiple transnational reverberations of the discourses on terrorism, counter-terrorism and insurgency. These

---

include, but are not restricted to, the realignment of geopolitical power relations; the formation of new terrorist networks (ISIS) and regional alliances (Iraq/Syria); the growing number of terrorist incidents in the West; the changing discourses on security and technologies of warfare; and the leveraging of fundamental constitutional principles. The essays featured in this volume draw upon, and critically engage with, the conceptual trajectories within American literary debates, postcolonial discourse and transatlantic literary criticism. Collectively, they move away from the trauma-centrism and residual US-centrism of early literary responses to 9/11 and the criticism thereon, while responding to postcolonial theory's call for a historical foregrounding of terrorism, insurgency and armed violence in the colonial-imperial power nexus. This book was originally published as a special issue of the *European Journal of English Studies*. [Meeting Abstracts](#) Potomac Books, Inc.

Security in Translation proposes an innovative way to capture the evolution, spread and local transformation of threat images in world affairs. Reworking traditional securitization theory, this book develops a coherent new framework for analysis that makes securitization theory applicable to empirical studies. Windows Magazine Springer

This report focuses on the urban water management challenges facing cities across OECD countries, and explores both national and local policy responses with respect to water-risk exposure, the state of urban infrastructures and dynamics, and institutional and governance architectures. The analyses focus on four mutually dependent dimensions – finance, innovation, urban-rural co-operation and governance – and proposes a solutions-oriented typology based on urban characteristics. The report underlines that sustainable urban water management will depend on collaboration across different tiers of government working together with local initiatives and stakeholders.

#### Water and Cities IWA Publishing

With the aim of projecting alternative and sustainable forms of urbanism, the book asks: What are the key principles of an ecological urbanism? How might they be organized? And what role might design and planning play in the process? While climate change, sustainable architecture, and green technologies have become increasingly topical, issues surrounding the sustainability of the city are much less developed. The premise of the book is that an ecological approach is urgently needed both as a remedial device for the contemporary city and an organizing principle for new cities. Ecological urbanism approaches the city without any one set of instruments and with a worldview that is fluid in scale and disciplinary approach. Design provides the synthetic key to connect ecology with an urbanism that is not in contradiction with its environment. The book brings together design practitioners and theorists, economists, engineers, artists, policy makers, environmental scientists, and public health specialists, with the goal of reaching a

---

more robust understanding of ecological urbanism and what it might be in the future. Contributors include: Homi Bhabha, Stefano Boeri, Chuck Hoberman, Rem Koolhaas, Sanford Kwinter, Bruno Latour, Nina-Marie Lister, Moshen Mostafavi, Matthias Schuler, Sissel Tolaas, Charles Waldheim

### Shock Warning

If you grew up on a ranch, or if you wished that you had grown up on a ranch, read Betty's book, *The Way It Was*. From the time she was a tiny, observant five-year-old riding horseback with her brother to a one-room country, she savored the life about her.

### Sam Phillips: The Man Who Invented Rock 'n' Roll

From the author of the critically acclaimed Elvis Presley biography: *Last Train to Memphis* brings us the life of Sam Phillips, the visionary genius who singlehandedly steered the revolutionary path of Sun Records. The music that he shaped in his tiny Memphis studio with artists as diverse as Elvis Presley, Ike Turner, Howlin' Wolf, Jerry Lee Lewis, and Johnny Cash, introduced a sound that had never been heard before. He brought forth a singular mix of black and white voices passionately proclaiming the vitality of the American vernacular tradition while at the same time declaring, once and for all, a new, integrated musical day. With extensive interviews and firsthand personal observations extending over a 25-year period with Phillips, along with wide-ranging interviews with nearly all the legendary Sun Records artists, Guralnick gives us an ardent, unrestrained portrait of an American

original as compelling in his own right as Mark Twain, Walt Whitman, or Thomas Edison.

#### Collector's Guide to Pocket Calculators

The countdown to Armageddon begins . . . It began in California with a devastating biological attack - a horrifying display of home-grown terror - just weeks before the presidential election. For the White House, it is a political nightmare, as it threatens to plunge the country into panic and economic chaos. But for the US government's undercover agent Devlin, it is the ultimate warning. Devlin knows who's behind the mayhem. He knows who controls the media. And he knows that, unless he can stop it, the End of Days begins . . . right on Election Day.
