"Business Schools Face Test of Faith." "Is It Time to Retrain B-Schools?" As these headlines make clear, business education is at a major crossroads. For decades, MBA graduates from top-tier schools set the standard for cutting-edge business knowledge and skills. Now the business world has changed, say the authors of Rethinking the MBA, and MBA programs must change with it. Increasingly, managers and recruiters are questioning conventional business education. Their concerns? Among other things, MBA programs aren't giving students the heightened cultural awareness and global perspectives they need. Newly minted MBAs lack essential leadership skills. Creative and critical thinking demand far more attention. In this compelling and authoritative new book, the authors: · Document a rising chorus of concerns about business schools gleaned from extensive interviews with deans and executives, and from a detailed analysis of current curricula and emerging trends in graduate business education · Provide case studies showing how leading MBA programs have begun reinventing themselves for the better · Offer concrete ideas for how business schools can surmount the challenges that come with reinvention, including securing faculty with new skills and experimenting with new pedagogies Rich with examples and thoroughly researched, Rethinking the MBA reveals why and how business schools must define a better pathway for the future.

Human Motivation, originally published in 1987, offers a broad overview of theory and research from the perspective of a distinguished psychologist whose creative empirical studies of human motives span forty years. David McClelland describes methods for measuring motives, the development of motives out of natural incentives and the relationship of motives to emotions, to values and to performance under a variety of conditions. He examines four major motive systems - achievement, power, affiliation and avoidance - reviewing and evaluating research on how these motive systems affect behaviour. Scientific understanding of motives and their interaction, he argues, contributes to understanding of such diverse and important phenomena as the rise and fall of civilisations, the underlying causes of war, the rate of economic development, the nature of leadership, the reasons for authoritarian or democratic governing styles, the determinants of success in management and the factors responsible for health and illness. Students and instructors alike will find this book an exciting and readable presentation of the psychology of human motivation.

Practical Leadership Skills for Safety Professionals and Project Engineers Elsevier Health Sciences Scientific Study from the year 2021 in the subject Leadership and Human Resources - Leadership, language: English, abstract: A company is only as successful as its leaders. Becoming a leader is not always easy, but there are ways to lay the foundation. Core values are essential to create a good working atmosphere in the team. There are various aspects of leadership - such as the role of vision and emotion -

that need to be considered. Dr. Richard Young wants to raise awareness on various leadership practices for optimizing performance and job satisfaction on knowledge workers. What are best leadership practices for managing employee performance in the financial industry? Which methods affect their job satisfaction? And which management styles permit an organization to increase workload without negative impact on the team and its members? To ensure a detailed overview of different management practices and their effects on employees, the author bases his research on qualitative interviews, observation, and document analysis. 200 IT managers and 1000 employees in the financial industry were observed and interviewed. The publication is directed to leaders who want to build a healthy and growing company. To achieve this, they have to define leadership principles that articulate and translate the organization's core values into behaviors. The right tools and training will help knowledge workers to distribute the principles in the company.

The revolutionary book that teaches you how to use the cutting edge of human psychology to build high performing workplace cultures. Too often, great cultures feel like magic. While most leaders believe culture is critical to success, few know how to build one, or sustain it over time. What if you knew the science behind the magic—a science so predictive and powerful that you could transform your organization? What if you could use cutting edge psychology to unlock people's innate desire to innovate, experiment, and adapt? In *Primed to Perform*, Neel Doshi and Lindsay McGregor show you how to do just that. The result: higher sales, more loyal customers, and more passionate employees. *Primed to Perform* explains the counter-intuitive science behind great cultures, building on over a century of academic thinking. It shares the simple, highly predictive new measurement tool—the Total Motivation (ToMo) Factor—that enables you to measure the strength of your culture, and track improvements over time. It explores the authors' original research into how Total Motivation leads to higher performance in iconic companies, from Apple to Starbucks to Southwest Airlines. Most importantly, it teaches you to build great cultures, using a systematic and sustainable approach. High performing cultures can't be left to chance. Organizations must create systems that shape and maintain them. Whether you're a five-person team or a startup, a school, a nonprofit or a mega-institution, *Primed to Perform* shows you how.

Distributed Leadership in Nursing and Healthcare: Theory, Evidence and Development HarperCollins

This book argues that conventional interpretations of Freudian psychology have not accounted for the existence and complexity of death anxiety and its intrinsic relation to the creation of illusions and delusions. This book contends that there is sufficient evidence to support the view that death anxiety is not only a symptom of certain modes of psychopathology, but is a very normal and central emotional threat human beings deal with only by impeding awareness of the threat from entering consciousness. The immanence of the fear of death requires vigilant defensive and coping techniques, especially the distortion of reality through these defenses and fantasies, so that over-whelming terror does not psychologically cripple the organism. The fear of death is so horrific that human beings must insulate themselves in religious, social, and private illusions, rituals, obsessive pursuits, self-glorification, and myriad desperate attempts to lie about the quintessential nature of reality. Death is that terror that induces psychopathology. This book demonstrates that a careful reading of Freud reveals a copious amount of material supporting these propositions.
