The Highway War is the compelling Iraq War memoir of then-Capt. Seth Folsom, commanding officer of Delta Company, First Light Armored Reconnaissance Battalion, U.S. Marine Corps. Mounted in eight-wheeled LAVs (light armored vehicles), this unit of 130 Marines and sailors was one of the first into Iraq in March 2003. It fought on the front lines for the war's entire offensive phase, from the Kuwaiti border through Baghdad to Tikrit. Folsom's thoughtful account focuses on his maturation as a combat leader--and as a human being enduring the austere conditions of combat and coming to terms with loss of life on both sides. Moreover, The Highway War is the story of a junior officer's relationships with his company's young Marines, for whose lives he was responsible, and with his superior officers. Folsom covers numerous unusual military actions and conveys truthfully the pace, stress, excitement, mistakes, and confusion of modern ground warfare. The Highway War is

destined to be a Marine Corps classic.

#1 NEW YORK TIMES BESTSELLER • A clear-eyed account of learning how to lead in a chaotic world, by General Jim Mattis—the former Secretary of Defense and one of the most formidable strategic thinkers of our time—and Bing West, a former assistant secretary of defense and combat Marine.

“ A four-star general ’ s five-star memoir. ” —The Wall Street Journal Call Sign Chaos is the account of Jim Mattis ’ s storied career, from wide-ranging leadership roles in three wars to ultimately commanding a quarter of a million troops across the Middle East. Along the way, Mattis recounts his

foundational experiences as a leader, extracting the lessons he has learned about the nature of warfighting and peacemaking, the importance of allies, and the strategic dilemmas—and short-sighted thinking—now facing our nation. He makes it clear why America must return to a strategic footing so as not to continue winning battles but fighting inconclusive wars. Mattis divides his book into three parts: Direct Leadership, Executive Leadership, and Strategic Leadership. In the first part, Mattis recalls his early experiences leading Marines into battle, when he knew his troops as well as his own brothers. In the second part, he explores what it means to command thousands of troops and how to adapt your leadership style to ensure your intent is understood by your most junior troops so that they can own their mission. In the third part, Mattis describes the challenges and techniques of leadership at the strategic level, where military leaders reconcile war 's grim realities with political leaders ' human aspirations, where complexity reigns and the consequences of imprudence are severe, even catastrophic. Call Sign Chaos is a memoir of a life of warfighting and lifelong learning, following along as Mattis rises from Marine recruit to four-star general. It is a journey about learning to lead and a story about how he, through constant study and action, developed a unique leadership philosophy, one relevant to us all.

An updated edition of the blockbuster bestselling leadership book that took America and the world by storm, two U.S. Navy SEAL officers who led the most highly decorated special operations unit of the Iraq War demonstrate how to apply powerful leadership principles from the battlefield to business and life. Sent to the most violent battlefield in Iraq, Jocko Willink and Leif Babin 's SEAL task unit faced a seemingly impossible mission: help U.S. forces secure Ramadi, a city deemed "all but lost." In gripping firsthand accounts of heroism, tragic loss, and hard-won victories in SEAL Team Three 's Task Unit Bruiser, they learned that leadership—at every level—is the most important factor in whether a team

succeeds or fails. Willink and Babin returned home from deployment and instituted SEAL leadership training that helped forge the next generation of SEAL leaders. After departing the SEAL Teams, they launched Echelon Front, a company that teaches these same leadership principles to businesses and organizations. From promising startups to Fortune 500 companies, Babin and Willink have helped scores of clients across a broad range of industries build their own high-performance teams and dominate their battlefields. Now, detailing the mind-set and principles that enable SEAL units to accomplish the most difficult missions in combat, *Extreme Ownership* shows how to apply them to any team, family or organization. Each chapter

focuses on a specific topic such as Cover and Move, Decentralized Command, and Leading Up the Chain, explaining what they are, why they are important, and how to implement them in any leadership environment. A compelling narrative with powerful instruction and direct application, *Extreme Ownership* revolutionizes business management and challenges leaders everywhere to fulfill their ultimate purpose: lead and win.

“ Lyrical . . . A thoughtful perspective on America ’ s role overseas. ” —Washington Post
From a decorated Marine war veteran and National Book Award finalist, an astonishing reckoning with the nature of combat and the human cost of the wars in Iraq, Afghanistan, and Syria. “ War hath

determined us. ” —John Milton, *Paradise Lost*
Toward the beginning of *Places and Names*, Elliot Ackerman sits in a refugee camp in southern Turkey, across the table from a man named Abu Hassar, who fought for al-Qaeda in Iraq and whose connections to the Islamic State are murky. At first, Ackerman pretends to have been a journalist during the Iraq War, but after establishing a rapport with Abu Hassar, he takes a risk by revealing to him that in fact he was a Marine special operation officer. Ackerman then draws the shape of the Euphrates River on a large piece of paper, and his one-time adversary quickly joins him in the game of filling in the map with the names and dates of places where they saw fighting during the war. They had shadowed each other for some time, it turned out, a realization that brought them to a strange kind of intimacy. The rest of Elliot Ackerman's extraordinary memoir is in a way an answer to the question of why he came to that refugee camp, and what he hoped to find there. By moving

back and forth between his recent experiences on the ground as a journalist in Syria and its environs and his deeper past in Iraq and Afghanistan, he creates a work of remarkable atmospheric pressurization. Ackerman shares vivid and powerful stories of his own experiences in combat, culminating in the events of the Second Battle of Fallujah, the most intense urban combat for the Marines since Hue in Vietnam, where Ackerman's actions leading a rifle platoon saw him awarded the Silver Star. He weaves these stories into the latticework of a masterful larger reckoning with contemporary geopolitics through his vantage as a journalist in Istanbul and with the human extremes of both bravery and horror. At once an intensely personal story about the terrible lure of combat and a brilliant meditation on the larger meaning of the past two decades of strife for America, the region, and the world, *Places and Names* bids fair to take its place among our greatest books about modern war.

Finally in paperback: the New York Times bestseller by the acclaimed, bestselling author of *Start With Why* and *Together is Better*. Now with an expanded chapter and appendix on leading millennials, based on Simon Sinek's viral video "Millennials in the workplace" (150+ million views). Imagine a world where almost everyone wakes up inspired to go to work, feels trusted and valued during the day, then returns home feeling fulfilled. This is not a crazy, idealized notion. Today, in many successful organizations, great leaders create environments in which people naturally work together to do remarkable things. In his work with organizations around the world, Simon Sinek noticed that some teams trust each other so deeply that

they would literally put their lives on the line for each other. Other teams, no matter what incentives are offered, are doomed to infighting, fragmentation and failure. Why? The answer became clear during a conversation with a Marine Corps general. "Officers eat last," he said. Sinek watched as the most junior Marines ate first while the most senior Marines took their place at the back of the line. What's symbolic in the chow hall is deadly serious on the battlefield: Great leaders sacrifice their own comfort--even their own survival--for the good of those in their care. Too many workplaces are driven by cynicism, paranoia, and self-interest. But the best ones foster trust and cooperation because their leaders build what Sinek calls a "Circle of Safety" that separates the security inside the team from the challenges outside. Sinek

illustrates his ideas with fascinating true stories that range from the military to big business, from government to investment banking. Mcdp 1-3 Tactics Vigeo Press Draws on interviews with combat Marines from numerous wars to offer insight into their motivations and capacity for military battles, in a tribute to U.S. Marine Corps veterans who went on to become influential civil servants in the public sector. Reprint. 40,000 first printing. The Autobiography of the Most Lethal Sniper in U.S. Military History St. Martin's Press When the U.S. military invaded Iraq, it lacked a common understanding of the problems inherent in counterinsurgency campaigns. It had neither studied them, nor developed doctrine and tactics to deal with them. It is fair to say that in 2003, most Army officers knew more about the U.S. Civil War than they did about counterinsurgency. The U.S. Army / Marine Corps Counterinsurgency Field Manual was written to fill that void. The

result of unprecedented collaboration among top U.S. military experts, scholars, and practitioners in the field, the manual espouses an approach to combat that emphasizes constant adaptation and learning, the importance of decentralized decision-making, the need to understand local politics and customs, and the key role of intelligence in winning the support of the population. The manual also emphasizes the paradoxical and often counterintuitive nature of counterinsurgency operations: sometimes the more you protect your forces, the less secure you are; sometimes the more force you use, the less effective it is; sometimes doing nothing is the best reaction. An new introduction by Sarah Sewall, director of the Carr Center for Human Rights Policy at Harvard 's Kennedy School of Government, places the manual in critical and historical perspective, explaining the significance and potential impact of this revolutionary challenge to conventional U.S. military

doctrine. An attempt by our military to redefine itself in the aftermath of 9/11 and the new world of international terrorism, The U.S. Army / Marine Corps Counterinsurgency Field Manual will play a vital role in American military campaigns for years to come. The University of Chicago Press will donate a portion of the proceeds from this book to the Fisher House Foundation, a private-public partnership that supports the families of America ' s injured servicemen. leadership philosophy that speaks to who we are as Marines. It is about the relationship between the leader and the led. It is also about the bond between all Marines that is formed in the common forge of selfless service and shared hardships. It's in this forge where Marines are hardened like steel, and the undefinable spirit that forms the character of our Corps is born. It draws from shared experiences, hardships, and challenges in training and combat. Leading Marines is not meant to be read passively; as you read this publication, think about the material. You should reflect on, discuss, and apply the concepts presented in this publication. Furthermore, it is the responsibility of leaders at all levels to mentor and develop the next generation

This publication is about winning in combat. Winning requires many things: excellence in techniques, an appreciation of the enemy, exemplary leadership, battlefield judgment, and focused combat power. Yet these factors by themselves do not ensure success in battle. Many armies, both winners and losers, have possessed many or all of these attributes. When we examine closely the differences between victor and vanquished, we draw one conclusion. Success went to the armies whose leaders, senior and junior, could best focus their efforts-their skills and their resources-toward a decisive end. Their success arose not merely from excellence in techniques, procedures, and material but from their leaders' abilities to uniquely and effectively combine them. Winning in combat depends upon tactical leaders who can think creatively and act

decisively.
