The youngest living Medal of Honor recipient delivers an unforgettable memoir that "will inspire every reader" (Jim Mattis) NATIONAL BESTSELLER: A USA Today, Washington Post, and Publishers Weekly bestseller On November 21, 2010, U.S. Marine Lance Corporal Kyle Carpenter was posted atop a building in violent Helmand Province, Afghanistan, when an enemy grenade skittered toward Kyle and fellow Marine Nick Eufrazio. Without hesitation, Kyle chose a path of selfless heroism that few can imagine. He

jumped on the grenade, saving Nick but sacrificing himself. One of the year's most anticipated books, Kyle's remarkable memoir reveals a central truth that will inspire every reader: Life is worth everything we've got. It is the story of how one man became a so-called hero who willingly laid down his life for his brother-in-arms—and equally, it is a story of rebirth, of how Kyle battled back from the gravest challenge to forge a life of joyful purpose. Kyle Carpenter's heart flatlined three times while being evacuated off the battlefield in Afghanistan. Yet his spirit was unbroken. Severely wounded from head to toe, Kyle lost his right eye as well as most of his jaw. It would take dozens of surgeries and almost three years in and out of the hospital to reconstruct his body. From there, he began the process of rebuilding his life. What he has accomplished in the last nine years is extraordinary: he's come back a stronger, better, wiser person. In 2014, Kyle was awarded the nation's highest military decoration, the Medal of Honor, for his "singular act of courage" on that rooftop in Afghanistan, an action which had been reviewed exhaustively by the military. Kyle became the youngest

living recipient of the award – and only the second living Marine so honored since Vietnam. *You Are Worth It* is a memoir about the war in Afghanistan and Kyle's heroics, and it is also a manual for living. Organized around the credos that have guided Kyle's life (from "Don't Hide Your Scars" to "Call Your Mom"), the book encourages us to become our best selves in the time we've been given on earth. Above all, it's about finding purpose, regardless of the hurdles that may block our way. Moving and unforgettable, *You Are Worth It* is an astonishing memoir from one of our most extraordinary young leaders.

A US marine and Special Ops Commander recounts his combat experiences through Iraq and beyond in this "powerful and beautifully written memoir" (The Washington Times). These are the combat experiences of the first Marine to command a special operations task force. Andrew Milburn takes readers on his journey from Second Lieutenant to Colonel and Task Force Commander; from leading Marines through the streets of Mogadishu, Baghdad, Fallujah and Mosul to directing multi-national special operations forces in the fight against ISIS. Through it all, he shares the hard-won lessons he learned, and shows how he put them to use in a complex fight against a formidable foe. Very few personal accounts of war cover such a wide breadth of experience. Milburn tells his extraordinary story with humility and candor, describing his personal struggles with the isolation of command, post-combat trauma and family tragedy. And with the skill and insight of a natural storyteller, he makes the reader experience what it's like to lead those who fight America's wars. "Simply the finest war memoir to emerge from the last two decades of constant fighting." —New York Times bestselling author Bing West

Marine Corps Wisdom of a Medal of Honor Recipient Harper Collins

When the U.S. military invaded Iraq, it lacked a common understanding of the problems inherent in counterinsurgency campaigns. It had neither studied them, nor developed doctrine and tactics to deal with them. It is fair to say that in 2003, most Army officers knew more about the U.S. Civil War than they did about counterinsurgency. The U.S. Army / Marine Corps Counterinsurgency Field Manual was written to fill that void. The result of unprecedented collaboration among top U.S. military experts, scholars, and practitioners in the field, the manual espouses an approach to combat that emphasizes constant adaptation and learning, the importance of decentralized decision-making, the need to understand local politics and customs, and the key role of intelligence in winning the support of the population. The manual also emphasizes the paradoxical and often counterintuitive nature of counterinsurgency operations: sometimes the more you protect your forces, the less secure you are; sometimes the more force you use, the less effective it is; sometimes doing nothing is the best reaction. An new introduction by Sarah Sewall, director of the Carr Center for Human Rights Policy at Harvard's Kennedy School of Government, places the manual in critical and historical perspective, explaining the significance and potential impact of this revolutionary challenge to conventional U.S. military doctrine. An attempt by our military to redefine itself in the aftermath of 9/11 and the new world of international terrorism, The U.S. Army / Marine Corps Counterinsurgency Field Manual will play a vital role in American military campaigns for years to come. The University of Chicago Press will donate a portion of the proceeds from this book to the Fisher House Foundation, a private-public partnership that supports the families of America's injured servicemen. An updated edition of the blockbuster bestselling leadership book that took America and the world by storm, two U.S. Navy SEAL officers who led the most highly decorated special operations unit of the Iraq War demonstrate how to apply powerful leadership principles from the battlefield to business and life. Sent to the most violent battlefield in Iraq, Jocko Willink and Leif Babin's SEAL task unit faced a seemingly impossible mission: help U.S. forces secure Ramadi, a city deemed "all but lost." In gripping firsthand accounts of heroism, tragic loss, and hard-won victories in SEAL Team Three's Task Unit Bruiser, they learned that leadership—at every level—is the most important factor in whether a team succeeds or fails. Willink and Babin returned home from deployment and instituted SEAL leadership training that helped forge the next generation of SEAL leaders. After departing the SEAL Teams, they launched Echelon Front, a company that teaches these same leadership principles to businesses and organizations. From promising startups to Fortune 500 companies, Babin and Willink have helped scores of clients across a broad range of industries build their own high-performance teams and dominate their battlefields. Now, detailing the mind-set and principles that enable SEAL units to accomplish the most difficult missions in combat, *Extreme Ownership* shows how to apply them to any team, family or organization. Each chapter focuses on a specific topic such as Cover and Move, Decentralized Command, and Leading Up the Chain, explaining what they are, why they are important, and how to implement them in any leadership environment. A compelling narrative with powerful instruction and direct application, *Extreme Ownership* revolutionizes business management and challenges leaders everywhere to fulfill their ultimate purpose: lead and win.

#1 NEW YORK TIMES BESTSELLER • A clear-eyed account of learning how to lead in a chaotic world, by General Jim Mattis—the former Secretary of Defense and one of the most formidable strategic thinkers of our time—and Bing West, a former assistant secretary of defense and combat Marine. “A four-star general’s five-star memoir.”—The Wall Street Journal Call Sign Chaos is the account of Jim Mattis’s storied career, from wide-ranging leadership roles in three wars to ultimately commanding a quarter of a million troops across the Middle East. Along the way, Mattis recounts his foundational experiences as a leader, extracting the lessons he has learned about the nature of warfighting and peacemaking, the importance of allies, and the strategic dilemmas—and short-sighted thinking—now facing our nation. He makes it clear why America must return to a strategic footing so as not to continue winning battles but fighting inconclusive wars. Mattis divides his book into three parts: Direct Leadership, Executive Leadership, and Strategic Leadership. In the first part, Mattis recalls his early experiences leading Marines into battle, when he knew his troops as well as his own brothers. In the second part, he explores what it means to command thousands of troops and how to adapt your

leadership style to ensure your intent is understood by your most junior troops so that they can own their mission. In the third part, Mattis describes the challenges and techniques of leadership at the strategic level, where military leaders reconcile war’s grim realities with political leaders’ human aspirations, where complexity reigns and the consequences of imprudence are severe, even catastrophic. Call Sign Chaos is a memoir of a life of warfighting and lifelong learning, following along as Mattis rises from Marine recruit to four-star general. It is a journey about learning to lead and a story about how he, through constant study and action, developed a unique leadership philosophy, one relevant to us all.

MCDP 1 WARFIGHTING Since Fleet Marine Force Manual 1, Warfighting, was first published in 1989, it has had a significant impact both inside and outside the Marine Corps. That manual has changed the way Marines think about warfare. It has caused energetic debate and has been translated into several foreign languages, issued by foreign militaries, and published commercially. It has strongly influenced the development of doctrine by our sister Services. Our current naval doctrine is based on the tenets of maneuver warfare as described in that publication. Current and emerging concepts such as operational maneuver from the sea derive their doctrinal foundation from the philosophy contained in Warfighting. Our philosophy of warfighting, as described in the manual, is in consonance with joint doctrine, contributing to our ability to operate harmoniously with the other Services.

Today, war is more complicated than it has ever been. When considering military strategy, a commander must be aware of several theaters of war. There's ground strength, air power, naval combat and even cyber warfare. In the late 19th century, however, the true military might of a nation rested primarily on the strength of its navy. In 1890, United States Navy Captain Alfred Thayer Mahan published a book titled "The Influence of Sea Power Upon History." The monumental text addressed the importance of both military and commercial fleets in the success of a nation in war and peacetime. Mahan begins with a discussion of the elements he considers to be the key to a nation's success on the seas. He theorizes that a ground force could not sustain the pressure of a naval blockade. Mahan then applies his principles to wars of the past. He analyzes the use of a navy in various engagements and considers the resulting influence on the outcome of the wars. The book was readily accepted by commanders and tacticians all over the world and his principles and theories were utilized throughout the 20th century. His arguments, along with technological advances, were influential in the strengthening of the United States Navy. Presently, Mahan's work is considered the most important work on naval strategy in history.

One of NPR's Best Books of 2019 "Lyrical . . . A thoughtful perspective on America's role overseas." —Washington Post From a decorated Marine war veteran and National Book Award finalist, an astonishing reckoning with the nature of combat and the human cost of the wars in Iraq, Afghanistan, and Syria. "War hath determined us." —John Milton, Paradise Lost Toward the beginning of Places and Names, Elliot Ackerman sits in a refugee camp in southern Turkey, across the table from a man named Abu Hassar, who fought for al-Qaeda in Iraq and whose

connections to the Islamic State are murky. At first, Ackerman pretends to have been a journalist during the Iraq War, but after establishing a rapport with Abu Hassar, he takes a risk by revealing to him that in fact he was a Marine special operation officer. Ackerman then draws the shape of the Euphrates River on a large piece of paper, and his one-time adversary quickly joins him in the game of filling in the map with the names and dates of places where they saw fighting during the war. They had shadowed each other for some time, it turned out, a realization that brought them to a strange kind of intimacy. The rest of Elliot Ackerman's extraordinary memoir is in a way an answer to the question of why he came to that refugee camp, and what he hoped to find there. By moving back and forth between his recent experiences on the ground as a journalist in Syria and its environs and his deeper past in Iraq and Afghanistan, he creates a work of remarkable atmospheric pressurization. Ackerman shares vivid and powerful stories of his own experiences in combat, culminating in the events of the Second Battle of Fallujah, the most intense urban combat for the Marines since Hue in Vietnam, where Ackerman's actions leading a rifle platoon saw him awarded the Silver Star. He weaves these stories into the latticework of a masterful larger reckoning with contemporary geopolitics through his vantage as a journalist in Istanbul and with the human extremes of both bravery and horror. At once an intensely personal story about the terrible lure of combat and a brilliant meditation on the larger meaning of the past two decades of strife for America, the region, and the world, Places and Names bids fair to take its place among our greatest books about modern war.

The User's Guide to Marine Corps Values is to be used as a tool to help ensure that the values of the Corps continue to be reinforced and sustained in all Marines after being formally instilled in entry level training. This document is a compendium of discussion guides developed and used by Marine Corps formal schools. The guides are part of the formal inculcation of values in young Marines, enlisted and officer, during the entry level training process. This guide is designed to be used as a departure point for discussing the topics as a continuation of the process of sustaining values within the Marine Corps. The User's Guide also serves as a resource for leaders to understand the "talk" and the "walk" expected of them as leaders. New graduates of the Recruit Depots and The Basic School have been exposed to these lessons and expect to arrive at their first duty assignments and MOS schools to find these principles and standards exhibited in the Marines they encounter. Leaders must remember that as long as there is but one Marine junior to them, they are honor

bound to uphold the customs and traditions of the Corps and to always "walk the walk and talk the talk." We are the "parents" and "older siblings" of the future leaders of the Marine Corps. America is depending on us to ensure the Marines of tomorrow are ready and worthy of the challenges of this obligation. Teaching, reinforcement, and sustainment of these lessons can take place in the field, garrison, or formal school setting. Instructional methodology and media may vary depending on the environment and location of the instruction. However, environment should not be considered an obstacle to the conduct or quality of the instruction. This guide has been developed as a generic, universal training tool that is applicable to all Marines regardless of grade. Discussion leaders should include personal experiences that contribute to the development of the particular value or leadership lesson being di

Saltwater Leadership, Second Edition Leading Marines (McWp 6-10) (Formerly McWp 6-11)

This publication is about winning in combat. Winning requires many things: excellence in techniques, an appreciation of the enemy, exemplary leadership, battlefield judgment, and focused combat power. Yet these factors by themselves do not ensure success in battle. Many armies, both winners and losers, have possessed many or all of these attributes. When we examine closely the differences between victor and vanquished, we draw one conclusion. Success went to the armies whose leaders, senior and junior, could best focus their efforts-their skills and their resources-toward a decisive end. Their success arose not merely from excellence in techniques, procedures, and material but from their leaders' abilities to uniquely and effectively combine them. Winning in combat depends upon

tactical leaders who can think creatively and act decisively.

Finally in paperback: the New York Times bestseller by the acclaimed, bestselling author of *Start With Why* and *Together is Better*. Now with an expanded chapter and appendix on leading millennials, based on Simon Sinek's viral video "Millenials in the workplace" (150+ million views). Imagine a world where almost everyone wakes up inspired to go to work, feels trusted and valued during the day, then returns home feeling fulfilled. This is not a crazy, idealized notion. Today, in many successful organizations, great leaders create environments in which people naturally work together to do remarkable things. In his work with organizations around the world, Simon Sinek noticed that some teams trust each other so deeply that they would literally put their lives on the line for each other. Other teams, no matter what incentives are offered, are doomed to infighting, fragmentation and failure. Why? The answer became clear during a conversation with a Marine Corps general. "Officers eat last," he said. Sinek watched as the most junior Marines ate first while the most senior Marines took their place at the back of the line. What's symbolic in the chow hall is deadly serious on the battlefield: Great leaders sacrifice their own comfort--even their own survival--for the good of those in their care. Too many workplaces are driven by cynicism, paranoia, and self-interest. But the best ones foster trust and cooperation because their leaders build what Sinek calls a "Circle of Safety" that separates the security inside the team from the challenges outside. Sinek illustrates his ideas with fascinating true stories that range from the military to big business, from government to investment banking.

The Highway War is the compelling Iraq War memoir of then-Capt. Seth Folsom, commanding officer of Delta Company, First Light Armored Reconnaissance Battalion, U.S. Marine Corps. Mounted in eight-wheeled LAVs (light armored vehicles), this unit of 130 Marines and sailors was one of the first into Iraq in March 2003. It fought on the front lines for the war's entire offensive phase, from the Kuwaiti border through Baghdad to Tikrit. Folsom's thoughtful account focuses on his maturation as a combat leader--and as a human being enduring the austere conditions of combat and coming to terms with loss of life on both sides. Moreover, The Highway War is the story of a junior officer's relationships with his company's young Marines, for whose lives he was responsible, and with his superior officers. Folsom covers numerous unusual military actions and conveys truthfully the pace, stress, excitement, mistakes, and confusion of modern ground warfare. The Highway War is destined to be a Marine Corps classic.
