Leading Marines 2 May 2016 The act of leading Marines is a sacred responsibility and a rewarding experience. This publication describes a leadership philosophy that speaks to who we are as Marines. It is about the relationship between the leader and the led. It is also about the bond between all Marines that is formed in the common forge of selfless service and shared hardships. It's in this forge where Marines are hardened like steel, and the undefinable spirit that forms the character of our Corps is born. It draws from shared experiences, hardships, and

challenges in training and combat. Leading Marines is not meant to be read passively; as you read this publication, think about the material. You should reflect on, discuss, and apply the concepts presented in this publication. Furthermore, it is the responsibility of leaders at all levels to mentor and develop the next generation of Marine leaders.

Full color publication with photographs. A first of its kind, this book-of, by, and for the

noncommissioned officer and petty officer-is a comprehensive explanation of the enlisted leader across the U.S. Armed Services. It complements The Armed Forces Officer, the latest edition of which was published by NDU Press in 2007, as well as the Services' NCO/PO manuals and handbooks.

Written by a team of Active, Reserve, and retired senior enlisted leaders from all Service branches, this book defines and describes how NCOs/POs fit into an organization, centers them in the Profession of Arms, explains their dual roles of complementing the officer and enabling the force, and exposes their international engagement. As Chairman of the Joint Chiefs of Staff General Martin E. Dempsey writes in

---

his foreword to the book, "We know noncommissioned officers and petty officers to have exceptional competence, professional character, and soldierly grit—they are exemplars of our Profession of Arms."

Aspirational and fulfilling, this book helps prepare young men and women who strive to become NCOs/POs, re-inspires serving enlisted leaders, and stimulates reflection by those who have retired from or left active service. It also gives those who have never worn the uniform a better understanding of who these exceptional men and women are, and why they are properly known as the "Backbone of the Armed Forces."

The #1 New York Times bestselling memoir of U.S. Navy Seal Chris Kyle, and the source for Clint Eastwood's blockbuster, Academy-Award nominated movie. "An amazingly detailed account of fighting in Iraq—a humanizing, brave story that's extremely readable." —PATRICIA CORNWELL, New York Times Book Review "Jaw-dropping...Undeniably riveting." —RICHARD ROEPER, Chicago Sun-Times From 1999 to 2009, U.S. Navy SEAL Chris Kyle recorded the most career sniper kills in United States military history. His fellow American warriors, whom he protected with deadly precision

---

from rooftops and stealth positions during the Iraq War, called him “The Legend”; meanwhile, the enemy feared him so much they named him al-Shaitan ( “ the devil ” ) and placed a bounty on his head. Kyle, who was tragically killed in 2013, writes honestly about the pain of war—including the deaths of two close SEAL teammates—and in moving first-person passages throughout, his wife, Taya, speaks openly about the strains of war on their family, as well as on Chris. Gripping and unforgettable, Kyle ’ s masterful account of his extraordinary battlefield experiences ranks as one of the great war memoirs of all time.

Legendary Marine General James Mattis asked the same question and issued a directive to operationalize the Marine Corps’ Combat Hunter program. A comprehensive and no-nonsense approach to heightening each and every one of our gifts of fear,

LEFT OF BANG is the result.

Dr. Joe Strange, Prof. of Military Strategy at the U.S. Marine Corps University, has written this monograph on centers of gravity in an attempt to clarify one of the most fundamental & frequently misunderstood concepts of campaign planning. He contends that doctrine should retain the current concept of critical vulnerabilities, but should return to the original Clausewitzian concept of centers of gravity. His construct linking Centers of Gravity, Critical Capabilities, Critical Requirements & Critical Vulnerabilities (i.e. vulnerable Critical Requirements) provides Service & Joint Planners a logical & useful aid in designing plans to protect friendly sources of power while facilitating the defeat of the enemy's

Aspects of Leadership is a book that brings together scholars from different disciplines and practitioners from a broad variety of backgrounds to address three key areas: Ethics; Law, and Spirituality. Aspects of Leadership intends to inform leaders, and the general public, about the challenges of ethical decision making, the application of the law of war and the important role of spirituality in the battlefield. Essays are about ethics and armed conflict in the 21st Century. Many of the more complex challenges in operating among foreign populations stem from trying to understand and work with people who follow different religious, political, and legal systems. Around the world, notions of leadership and authority, methods for judging and resolving

disputes, and concepts of morally and religiously acceptable behavior vary radically from country to country or even from region to region within a country. Misunderstandings and conflicts between the local population and outside military forces can quickly arise due to different religious or cultural interpretations of events and actions. When handled poorly, such misunderstandings may even escalate to serious hostilities on the part of the local population, resulting in violent conflict and a widening gap between the population and military or security forces in the area."

MCDP 1 WARFIGHTING Since Fleet Marine Force Manual 1, Warfighting, was first published in 1989, it has had a significant impact both inside and outside the Marine Corps. That manual has changed the way Marines think about warfare. It has caused energetic debate and has been translated into several foreign languages, issued by foreign militaries, and published commercially. It has strongly influenced the development of doctrine by our sister Services. Our current naval doctrine is based on the tenets of maneuver warfare as described in that publication. Current and emerging

---

concepts such as operational maneuver from the sea derive their doctrinal foundation from the philosophy contained in Warfighting. Our philosophy of warfighting, as described in the manual, is in consonance with joint doctrine, contributing to our ability to operate harmoniously with the other Services.

"This text is designed to give the advanced Air Force ROTC student an over-all view of the military justice system, of how it operates in the Air Force, and of the general responsibilities of those in 'authority or command' who must administer the system. And, above all, it is hoped that the text will engender a feeling that military

justice is directly, intimately, and essentially concerned with human conduct - rather than with arbitrary rules, legalistic distinctions, and inflexible classifications"--Pref. Small Wars Manual Grand Central Publishing

The classic New York Times bestselling story of heroism and sacrifice--by the author of *Flags of Our Fathers*, *The Imperial Cruise*, and *The China Mirage*. This acclaimed bestseller brilliantly illuminates a hidden piece of World War II history as it tells the harrowing true story of nine American airmen shot down in the Pacific. One of them, George H. W. Bush, was miraculously rescued. What happened to the other eight remained a secret for almost 60 years. After the war, the American and Japanese governments conspired to cover up the shocking

truth, and not even the families of the airmen were informed of what happened to their sons. Their fate remained a mystery--until now. *FLYBOYS* is a tale of courage and daring, of war and death, of men and hope. It will make you proud and it will break your heart.

*Integration of the Armed Forces, 1940-1965* Harper Voyager  
*Lee's Lieutenants: A Study in Command* is the most colorful and popular of Douglas Southall Freeman's works. A sweeping narrative that presents a multiple biography against the flame-shot background of the American Civil War, it is the story of the great

---

figures of the Army of Northern Virginia who fought under Robert E. Lee. The Confederacy won resounding victories throughout the war, but seldom easily or without tremendous casualties. Death was always on the heels of fame, but the men who commanded -- among them Jackson, Longstreet, and Ewell -- developed as leaders and men. Lee's Lieutenants follows these men to the costly battle at Gettysburg, through the deepening twilight of the South's declining military might, and finally to the collapse of Lee's command and his formal surrender in 1865. To his unparalleled descriptions of men and operations,

Dr. Freeman adds an insightful analysis of the lessons learned and their bearing upon the future military development of the nation. Accessible at last in a one-volume edition abridged by noted Civil War historian Stephen W. Sears, Lee's Lieutenants is essential reading for all Civil War buffs, students of war, and admirers of the historian's art as practiced at its very highest level.

**THE INSTANT #1 NATIONAL BESTSELLER** From the #1 New York Times bestselling authors of *Extreme Ownership* comes a new and revolutionary approach to help leaders recognize and attain the leadership balance crucial to victory. With their first book, *Extreme Ownership* (published in October 2015), Jocko Willink and Leif Babin set a new standard for leadership, challenging readers to become better leaders, better followers, and better people, in both their professional and personal lives. Now, in **THE DICHOTOMY OF LEADERSHIP**, Jocko and Leif dive even deeper into the uncharted and complex waters of a concept first introduced in *Extreme Ownership*: finding balance between the opposing forces that pull every leader in different directions. Here, Willink and Babin get granular into the nuances that every successful leader must navigate. Mastering the Dichotomy of Leadership requires understanding when to lead and when to follow; when to aggressively maneuver and when to pause and let things develop; when to detach and let the team run and when to dive into the details and micromanage. In addition, every leader must:

- Take *Extreme Ownership* of everything that impacts their mission,

---

yet utilize Decentralize Command by giving ownership to their team. • Care deeply about their people and their individual success and livelihoods, yet look out for the good of the overall team and above all accomplish the strategic mission. • Exhibit the most important quality in a leader—humility, but also be willing to speak up and push back against questionable decisions that could hurt the team and the mission. With examples from the authors' combat and training experiences in the SEAL teams, and then a demonstration of how each lesson applies to the business world, Willink and Babin clearly explain THE DICHOTOMY OF LEADERSHIP—skills that are mission-critical for any leader

and any team to achieve their ultimate goal: VICTORY.
