Morning Calm (the Korean Peninsula) is a concealed microcosm of the world tweaked and a wide-open miniature of the world divided. From the outside, this Calm Land has been called a miraculously leaped-up nation defeating the ghost of the Korean War. But inside, there have been buckets of unimaginable inhumanity and irrationality, among which were smashed bodies by tanks, people who were tortured to death by prison guards in the North, the deflowered women by Japanese Imperialist troops, the U.S officers hacked by the Red, and a Korean woman lanced by a U.S soldier in the blood ally South Korea. Extreme conflicts between politicians, Chaebol and labor workers, the poor and the rich, the young and the old, splashes in the religious groups, men and women, disputes over mandatory military service, are also vividly described. Anyway, most of all, Anti-Americanism that gradually got heated through several decades distinctively began to settle down for some reasons, while Pro-Japan that contributed to the collapse of Morning Calm to Japanese Imperialism, which ripped off the skin of peace in the Pacific and East Asia, raping and beheading the innocent residents, is going to run amok in Korea again. So people need to know why these treacherous trends are hazardous to Asia, the U.S and Western countries, too. The world villagers used to say, "If a third world war break out in some places, where could be the Korean Peninsula." There have been not so many opposite opinions about it, putting Middle East incidents as just skirmishes. As much, Morning Calm is the land not only of Korea, but of the powerhouses, including the U.S, China, Japan, Russia, the U.K, France, and Germany altogether. In addition, some intertwined problems must be resolved sooner or later before the Kim's North rapidly collapses down. But, the inner puzzles would not be put together easily; Seoul and locals, duels in the sports corrals, and the chronic pain between Julla and Kyungsang provinces,so-called, the cats at the loggerheads with the dogs. Those issues have not been frequently addressed to the outside, because it has been thought just as a kind of household matter. That much, Morning Calm has existed under the cloak of concealing something false and true deep inside, but, which can explode and sink down under the water, if not proper cures from inside or outside are provided. As the Sewol ferry boat went down, this Calm Land can follow her track, too. Meanwhile, what really matters is the Korean Peninsula is becoming a clock bomb drawing and embracing the Far East and the Western Countries closer to the center of turbulence. So here, I sincerely ask all the world neighbors to pay more attentions to Morning Calm, and hustle to give your hands to cure this peninsula, which is out of hands of itself that has been always subdued with self-satisfaction and gestures like living in a narcissism mode. Once again to remind you, my readers, willy-nilly, this Morning Calm became not just a small country, but a tremendously wide and big black hole and tinder box that can swallow up the peace and prosperity that are tightly tied to the bodies of powerhouses. So I hope that my readers can take your plenty of time to read this book one page at a time and feel the throbbing tensions in a Calm Land. Lastly, I am grateful for his technical assistance, C.S.Hong, and sharing precious opinions with me, B.J.Lee.

The presence and ubiquity of the internet continues to transform the way in which we identify ourselves and others both online and offline. The development of virtual communities permits users to create an online identity to interact with and influence one another in ways that vary greatly from face-to-face interaction. Identity and Leadership in Virtual Communities: Establishing Credibility and Influence explores the notion of establishing an identity online, managing it like a brand, and using it with particular members of a community. Bringing together a range of voices exemplifying how participants in online communities influence one another, this book serves as an essential reference for academicians, researchers, students, and professionals, including bloggers, software designers, and entrepreneurs seeking to build and manage their engagement online.

An Autobiography by Mocktime Publication

The world has been massively unappreciative of sixteen-year-old Baxter Zevcenko. His bloodline may be a combination of ancient Boer mystic and giant shape-shifting crow, and he may have won an inter-dimensional battle and saved the world, but does anyone care? Frankly, no. Instead he ’ s packed off to Hexpoort, a magical training school that ’ s part reformatory, part military school. It's just like Hogwarts – except with sex, drugs, and much better internet access. The problem is that Baxter sucks at magic. He ’ s also desperately attempting to control his new ability to dreamwalk, all the while being singled out by the school ’ s resident bully, who just so happens to be the Chosen One. But when Hexpoort comes under attack, Baxter needs to forget all that and step into action. The only way to do this is to join forces with his favourite recovering alcoholic of a supernatural bounty hunter, Ronin, to try to save the world from the apocalypse. Again.

With the exception of Sri Lanka, South Asian countries have not achieved quality basic education – an essential measure for escaping poverty, inequality, and social exclusion. In The Political Economy of Education in South Asia, John Richards, Manzoor Ahmed, and Shahidul Islam emphasize the importance of a dynamic system for education policy. The Political Economy of Education in South

Asia documents the weak core competency (reading and math) outcomes in government primary schools in India, Pakistan, Bangladesh, and Nepal, and the consequent rapid growth of non-government schools over the last two decades. It compares the training, hiring, and management of teachers in South Asian schools to successful national systems ranging from Singapore to Finland. Discussing reform options, it makes the case public good and public priorities are better served when both public and non-government providers come under a strong public policy and accountability framework. The Political Economy of Education in South Asia draws on the authors' broad engagement in education research and practice in South Asia, as well as analysis by prominent professors of education and NGO leaders, to place basic education in a broad context and make the case that universal literacy and numeracy are necessary foundations for economic growth.

Victorian Scientific Naturalism examines the secular creeds of the generation of intellectuals who, in the wake of The Origin of Species, wrested cultural authority from the old Anglican establishment while installing themselves as a new professional scientific elite. These scientific naturalists—led by biologists, physicists, and mathematicians such as William Kingdon Clifford, Joseph Dalton Hooker, Thomas Henry Huxley, and John Tyndall—sought to persuade both the state and the public that scientists, not theologians, should be granted cultural authority, since their expertise gave them special insight into society, politics, and even ethics. In Victorian Scientific Naturalism, Gowan Dawson and Bernard Lightman bring together new essays by leading historians of science and literary critics that recall these scientific naturalists, in light of recent scholarship that has tended to sideline them, and that reevaluate their place in the broader landscape of nineteenth-century Britain. Ranging in topic from daring climbing expeditions in the Alps to the maintenance of aristocratic protocols of conduct at Kew Gardens, these essays offer a series of new perspectives on Victorian scientific naturalism—as well as its subsequent incarnations in the early twentieth century—that together provide an innovative understanding of the movement centering on the issues of community, identity, and continuity.

A long-time chief data scientist at Amazon shows how open data can make everyone, not just corporations, richer Every time we Google something, Facebook someone, Uber somewhere, or even just turn on a light, we create data that businesses collect and use to make decisions about us. In many ways this has improved our lives, yet, we as individuals do not benefit from this wealth of data as much as we could. Moreover, whether it is a bank evaluating our credit worthiness, an insurance company determining our risk level, or a potential employer deciding whether we get a job, it is likely that this data will be used against us rather than for us. In Data for the People, Andreas Weigend draws on his years as a consultant for commerce, education, healthcare, travel and finance companies to outline how Big Data can work better for all of us. As of today, how much we benefit from Big Data depends on how closely the interests of big companies align with our own. Too often, outdated standards of control and privacy force us into unfair contracts with data companies, but it doesn't have to be this way. Weigend makes a powerful argument that we need to take control of how our data is used to actually make it work for us. Only then can we the people get back more from Big Data than we give it. Big Data is here to stay. Now is the time to find out how we can be empowered

by it.

This comprehensive edited collection provides key contributions in the field, mapping out fundamental topics and analysing current trends through an international lens. Offering a collection of invited contributions from scholars across the world, the volume is structured in seven parts, each exploring an aspect of local media and journalism. It brings together and consolidates the latest research and theorisations from the field, and provides fresh understandings of local media from a comparative perspective and within a global context. This volume reaches across national, cultural, technological and socio-economic boundaries to bring new understandings to the dominant foci of research in the field and highlights interconnection and thematic links. Addressing the significant changes local media and journalism have undergone in the last decade, the collection explores the history, politics, ethics and contents of local media, as well as delving deeper into the business and practices that affect not only the journalists and media-makers involved, but consumers and communities as well. For students and researchers in the fields of journalism studies, journalism education, cultural studies, and media and communications programmes, this is the comprehensive guide to local media and journalism.

The Collected Papers of Lord Rutherford of Nelson Transaction Publishers
What are “ Imperative Sentences ” ? The word "imperative" is derived from the term "emperor". Imperative sentences are used to give commands (orders). Imperative sentences are also used to give instruction/advice/suggestion/warning/invitation/appeal. Imperative sentences are also used to make a request. You should use ‘ please ’ (or another polite word) in the beginning or at the end of the sentence to make a request. An imperative sentence begins with the base (first) form of a verb which is also called a verb word. In an imperative sentence, the subject - ‘ you ’ - is understood. However, for the first and third-person imperative, the imperative sentence begins with ‘ let ’ . You can end an imperative sentence with the period (.) or exclamation (!). Exclamation is used to show direct and firm command. ‘ Imperative ’ is one of the three moods of an English verb (indicative, imperative and subjunctive).
EXAMPLES OF IMPERATIVE SENTENCES: (A). DIRECT ORDER Attend the meeting. Discharge your duty. Enforce the law. Quash the previous order. Return to work. Vacate this place. (B). A noble profession is facing its defining moment. From law schools to the prestigious firms that represent the pinnacle of a legal career, a crisis is unfolding. News headlines tell part of the story—the growing oversupply of new lawyers, widespread career dissatisfaction, and spectacular implosions of pre-eminent law firms. Yet eager hordes of bright young people continue to step over each other as they seek jobs with high rates of depression, life-consuming hours, and little assurance of financial stability. The Great Recession has only worsened these trends, but correction is possible and, now, imperative. In The Lawyer Bubble, Steven J. Harper reveals how a culture of short-term thinking has blinded some of the nation ’ s finest minds to the long-run implications of their actions. Law school deans have ceded independent judgment to flawed U.S. News & World Report rankings criteria in the quest to maximize immediate results. Senior partners in the nation ’ s large law firms have focused on current profits to enhance American Lawyer rankings and individual wealth at great cost to their institutions. Yet, wiser decisions—being honest about the legal job market, revisiting the financial incentives currently driving bad behavior, eliminating the billable

hour model, and more—can take the profession to a better place. A devastating indictment of the greed, shortsightedness, and dishonesty that now permeate the legal profession, this insider account is essential reading for anyone who wants to know how things went so wrong and how the profession can right itself once again.
