My First Alphabet Book IGI Global

The last 25 years have seen tremendous advances in the study of psychological processes in reading. Our growing body of knowledge on the reading process and reading acquisition has applications to such important problems as the prevention of reading difficulties and the identification of effective instructional practices. This volume summarizes the gains that have been made in key areas of reading research and provides insights on current controversies and debates. The volume is divided into seven parts, with each part beginning with an introductory chapter presenting findings on the topic at hand, followed by one or more classic papers from the author's research program. Issues covered include phonological processes and context effects in reading, the "reading wars" and how they should be resolved, the meaning of the term "dyslexia," and the cognitive effects and benefits of reading. --From publisher's description.

GET READY TO HEAD TO CLASS! Prepare your child for kindergarten with this numbers workbook full of fun, engaging exercises and activities, designed to refresh kids on what they need to know before heading to school.

Parents, you know that disruptions (whether for summer break, vacations, or other reasons) can put your child's education on pause. By adding just a few pages per day of Pre-K-level material into kids' routines, you can help your child keep their skills fresh and set them up success for when they return to the classroom! The exercises and activities in Get Ready for Kindergarten Math are drawn from our top-selling SUMMER SMART workbook series (designed to combat summer "learning loss"). Inside, you'll find:

- Links to download printable versions of activities with physical components (coloring, tracing)
- 50+ pages of teacher-created learning exercises to reinforce the early math skills and number familiarity that your child should grasp when going into kindergarten
- Fun, engaging activities that feel like play

With Sylvan Learning, you don't have to compromise between entertainment and education. Your child will love the great mix of activities, stories, and games in these pages. You'll love seeing their improved confidence and newfound love of learning!

A Book of Picture Riddles McGraw-Hill Education (UK)

A self-help book written specifically for new hires in public accounting to shorten the new hire learning curve. There is a certain workplace skill-set which can't be learned in the classroom, and it is precisely this skill-set that will make or break anyone's experience in public accounting. This is the reason why this book had to be written.

Children are one of the largest new user groups of mobile technology -- from phones to micro-laptops to electronic toys. These products are both lauded and criticized, especially when it comes to their role in education and learning. The need has never been greater to understand how these technologies are being designed and to evaluate their impact worldwide. Mobile Technology for Children brings together contributions from leaders in industry, non-profit organizations, and academia to offer

practical solutions for the design and the future of mobile technology for children. *First book to present a multitude of voices on the design, technology, and impact of mobile devices for children and learning *Features contributions from leading academics, designers, and policy makers from nine countries, whose affiliations include Sesame Workshop, LeapFrog Enterprises, Intel, the United Nations, and UNICEF *Each contribution and case study is followed by a best practice overview to help readers consider their own research and design and for a quick reference

Corporate Information Strategy and Management: Text and Cases 7/e by Applegate, Austin and McFarlan is written for students and managers who desire an overview of contemporary information systems technology management. It explains the relevant issues of effective management of information services activities and highlights the areas of greatest potential application of the technology. No assumptions are made concerning the reader's experience with IT, though it is presumed that the reader has some course work or work experience in administration and/or management. This text is comprised of an extensive collection of Harvard Business cases devoted to Information Technology.

Hit It Maestro(Music)(Leap 2)(Leapfrog) Silver Dolphin Books

Exemplary stories of innovation from around the world In an age of rising inequality, getting a good education increasingly separates the haves from the have nots. In countries like the United States,

getting a good education is one of the most promising routes to upper-middle-class status, even more so than family wealth. Experts predict that by 2030, 825 million children will reach adulthood without basic secondary-level skills, and it will take a century for the most marginalized youth to achieve the educational levels that the wealthiest enjoy today. But these figures do not even account for the range of skills and competencies needed to thrive today in work, citizenship, and life. In a world where the ability to manipulate knowledge and information, think critically, and collaboratively solve problems are essential to thrive, access to a quality education is crucial for all young people. In Leapfrogging Inequality, researchers chart a new path for global education by examining the possibility of leapfrogging—harnessing innovation to rapidly accelerate educational progress—to ensure that all young people develop the skills they need for a fast-changing world. Analyzing a catalog of nearly 3,000 global education innovations, the largest such collection to date, researchers explore the potential of current practices to enable such a leap. As part of this analysis, the book presents an evidence-based framework for getting ahead in education, which it grounds in the here-and-now by narrating exemplary stories of innovation from around the world. Together, these stories and resources will inspire educators, investors, leaders of nongovernmental organizations, and policymakers alike to rally around a new vision of educational progress—one that ensures we do not leave yet another generation of young people behind.
