The Regulation of the Legal Profession in Ireland is a new and insightful exploration of history, controversy and reform relating to the Irish legal system. During recent legislative debate over a professional reform bill, Alan Shatter--then the Minister of Justice in Ireland--publicly called this study, in its earlier form as a dissertation, "marvellous," and stated that it "should be compulsory reading for us all." He noted that the thesis "sets out the history of the legal profession and how it evolved. It evolved continually until approximately 1870 and then went into paralysis and nothing has changed since. ... It is extraordinarily curious that people think the world stopped in 1870." Professor Laurent Pech, formerly of the School of Law at NUI Galway and now Head of the Law Department at Middlesex University London, has stated that this study "makes a decisive contribution to the on-going scholarly and policy debates on this issue, by evaluating the present regulatory framework and offering a number of suggestions to improve it in a context of increasing transnationalisation of the market for legal services." He added that Hosier's "innovative approach to the problem of lawyers' misconduct is, in particular, worth noting. This aspect of her work has the potential to help alleviate a problem which has been extremely costly for both the legal profession and wider society alike. Her doctoral research also provides a valuable insight into the impact of the Troika upon the regulation of the legal profession in so-called 'bailed-out countries.'" Professor Pech concluded that the author "should be congratulated for having made an exceptional contribution to the current debate on the regulation of the legal profession both nationally and internationally. I have no doubt that her original and thought-provoking work will be useful to policy-makers and scholars alike." This book features Professor John Flood's new, substantive introduction, explaining the worldwide implications of professional reform efforts, the financial crisis that precipitated them, and the relation to regulation of the legal profession in other countries. It also includes the author's notable

examination of the effect of the Troika's bailout conditions on law reform possibilities in Ireland. This part of the book was presented in the US at the 2013 annual conference of the Law and Society Association. Finally, the book adds a section on 2014 developments in reform efforts in Ireland. A powerful new addition to the Dissertation Series from Quid Pro Books.

### **Motivation, Language Identity and the L2 Self** Routledge

Much of our knowledge of early medieval Ireland comes from a rich literature written in a variety of genres and in two languages, Irish and Latin. Who wrote this literature and what role did they play within society? What did the introduction and expansion of literacy mean in a culture where the vast majority of the population continued to be non-literate? How did literacy operate in and intersect with the oral world? Was literacy a key element in the formation and articulation of communal and elite senses of identity? This book addresses these issues in the first full, interdisciplinary examination of the Irish literate elite and their social contexts between ca. 400-1000 AD. It considers the role played by Hiberno-Latin authors, the expansion of vernacular literacy and the key place of monasteries within the literate landscape. Also examined are the crucial intersections between literacy and orality, which underpin the importance played by the literate elite in giving voice to aristocratic and communal identities.

**Lore and Language Multilingual Matters** With contributions by leading European, North American and Asian scholars, this volume offers a comprehensive anthology of conceptual and empirical papers describing the latest developments in L2 motivation research that involves the reframing of motivation in the context of contemporary notions of self and identity.

### **The Concept of Progression in the**

**Teaching and Learning of Foreign Languages Multilingual Matters** This book examines the role of affective variables in the process of learning a minority language. It presents a comprehensive account of how adult learners' attitude, motivation and identity are related to their awareness of, and commitment to, different dialects and varieties as target speech models. These issues are examined in the context of Irish, a minority language which does not have a standard spoken variety and where the vast majority of learners have no regular contact with native speakers. Using a mixed methods research approach, this study explores the relationships that exist between, on the one hand, learners' attitudes towards the three main traditional dialects of Irish and non-traditional second language varieties, and on the other, their motivation and self-concept as second language learners.

### **Fictions of the Irish Literary Revival** Hippocrene Books

Irish English, also termed 'Anglo-Irish' or 'Hiberno-English', as in this book, is not usually perceived as having a grammatical system of its own. Markku Filppula here challenges this misconception and offers a descriptive and contact-linguistic account of the grammar of Hiberno-English. Drawing on a wide range of authentic materials documenting Hiberno-English dialects past and present Filppula examines: \* the most distinctive grammatical features of these dialects \* relationships with earlier and other regional varieties of English \* the continuing influence of the Irish language on Hiberno-English \* similarities between Hiberno-English and other Celtic-influenced varieties of English spoken in Scotland and Wales The Grammar of Irish English is a comprehensive empirical study which will be an essential reference for scholars of Hiberno-English and of value to all those working in the field of Germanic linguistics.

## Motivation, Identity and Target Variety

Walter de Gruyter

Provides an introduction to the different styles of Celtic spirituality, covering such topics as the three paths, mythology, the role of ancestors, and incorporating the Celtic life into today's lifestyles.

Learning Irish Penguin

This is a critical survey of the fiction and non-fiction written in Ireland during the key years between 1880 and 1920, or what has become known as the Irish Literary Renaissance. The book considers both the prose and the social and cultural forces working through it.

Learning by Wandering Syracuse University Press

This book constitutes the proceedings of the 6th European Conference on Massive Open Online Courses, EMOOCs 2019, held in Naples, Italy, in May 2019. The 15 full and 6 short papers presented in this volume were carefully reviewed and selected from 42 submissions. Massive Open Online Courses (MOOCs) have marked a milestone in the use of technology for education. The reach, potential, and possibilities of EMOOCs are immense. But they are not only restricted to global outreach: the same technology can be used to improve teaching on campus and training inside companies and institutions. The chapter 'Goal Setting and Striving in MOOCs. A Peek inside the Black Box of Learner Behaviour' is open access under a CC BY 4.0 license at [link.springer.com](http://link.springer.com).

Mobile Technologies and Handheld Devices for Ubiquitous Learning: Research and Pedagogy Cambridge University Press

This book is an intimate study of the three giants in Irish literary history: Oscar Wilde, William Butler Yeats, and James Joyce. In addition to constructing a narrative of Ireland's political and literary past, Vicki Mahaffey interweaves the lives and writing of the authors into a portrait of national imagination, shaped not only by a vast cultural and mythic heritage, but also by the hard fact of English political domination.

States of Desire argues that what people desire is fundamentally connected to how they write and read. Not only do language and narrative shape desire (and vice versa), but because these processes are socially conditioned, some political circumstances, such as those present in Ireland at the turn of the century, foster experimental desire more successfully than others. Mahaffey's contribution to the critical discourse on literary modernism is to assign a political motive to the art of modernist wordplay; in doing so, she offers a more compelling and socially driven version of the oft-told tale of

literary modernism. Irish writers, she argues, sought to disrupt the rigidity of political thinking and social control by turning language into a weapon; by opening up infinite new possibilities of meaning and association, linguistic play makes it impossible for thought to be monopolized by the state or any other institutional power. In this light, the text becomes a prism of political, cultural, and erotic desires: a fountain of conscious and unconscious linguistic suggestion. Defying semantic control and refuting societal repression, Wilde, Yeats, and Joyce literally fought, in their lives and in their work, for a freedom of expression which--as was painfully evidenced in the case of Wilde--was not to be had for the asking.

The Grammar of Irish English Moon Travel

This specially commissioned volume considers the processes involved in language change and the issues of how they can be modelled and studied. The way languages change offers an insight into the nature of language itself, its internal organisation, and how it is acquired and used. Accordingly, the phenomenon of language change has been approached from a variety of perspectives by linguists of many different orientations. This book, originally published in 2003, brings together an international team of leading figures from different areas of linguistics to re-examine some of the central issues in this field and also to discuss new proposals. The volume is arranged into sections, including grammaticalisation, the typological perspective, the social context of language change and contact-based explanations. It seeks to cover the subject as a whole, bearing in mind its relevance for the general analysis of language, and will appeal to a broad international readership.

6th European MOOCs Stakeholders Summit, EMOOCs 2019, Naples, Italy, May 20 – 22, 2019, Proceedings Walter de Gruyter

"Based on the selected proceedings from an international conference Concept of progression in foreign language teaching and learning, held in Dublin in February 2004"--Cover.

Scott's Monthly Stamp Journal Peter Lang

The series is a platform for contributions of all kinds to this rapidly developing field. General problems are studied from the perspective of individual languages, language families, language groups, or language samples. Conclusions are the result of a deepened study of empirical data. Special emphasis is given to little-known languages, whose analysis may shed new light on long-standing problems in general linguistics.

An Introduction to the Study of the History and Antiquities of Ireland: in which the Assertions of Mr. Hume and Other Writers are Occasionally Considered. Illustrated with Copper-plates ... Routledge

The volume is a collection of papers reporting the results of investigations on the interaction of discourse and sentence structure in the languages of Europe. The subjects discussed in the book include: morphosyntactic characteristics of spontaneous spoken texts; different patterns of word order in a pragmatic perspective; the coding of the pragmatic functions topic and focus in sentences with non-canonical word orders (e.g. dislocations, clefts); the range of functions of verb-subject order in declarative clauses and the notion of theticity; prosodic patterns of de-accenting of given information; deixis and anaphora; coding of definiteness and article systems. The book provides the empirical basis for the comparative survey of major phenomena found in the languages of Europe which have pragmatic relevance. Beside traditional areas of investigation at the interface between syntax and pragmatics such as dislocations, new areas are explored, such as the prosody of given information. Data are considered within a functional-typological approach.

Literacy and Identity in Early Medieval Ireland Quid Pro Books

This popular introduction to the Irish language is now accompanied by an audio CD. Irish, also known as Irish Gaelic or Gaelige, is spoken today by approximately one million people worldwide. It is also the basis of the Irish literary tradition, which is the oldest in Europe after Greek and Latin. This valuable guide, ideal for both individual and classroom use, teaches the basics of Irish grammar and vocabulary in 10 easy-to-follow lessons. The audio CD feature complements the dialogue and grammar sections of the lesson, aiding the reader in understanding the language as spoken.

Mobile Technologies and Handheld Devices for Ubiquitous Learning: Research and Pedagogy provides readers with a rich collection of research-informed ideas for integrating mobile technologies into learning and teaching. Each chapter looks critically at the issues, related benefits and limitations of learning ubiquitously within the context of the research reported. New and emerging technologies present challenges for education causing educators to have to rethink pedagogy, boundaries and curriculum if they continue to embrace mobile technologies in their teaching.

A Changeling Art Learning Irish This introduction to the Irish language serves a double function: providing an approach to the ordinary language learner and at the same time furnishing the professional linguist with an authentic description of the spoken languages. Learning Irish An introductory self-tutor Learning Irish Adult Minority Language Learning Motivation, Identity and Target Variety This book uncovers an ancient Irish perspective of learning and reconfigures it to offer a vitality-restoring vision for education in our digital age. Its aim is to help re-engage learners of the Net generation meaningfully and with enjoyment in the learning process. The proliferation of new technologies in the classroom has generally not been accompanied by new pedagogical thinking and the discourse is still framed almost exclusively in terms of the utilitarian mindset of the Western world.

Consequently, education is too often delivered within a context that is unfit for purpose. The author argues that we need to bring the wisdom of different cultural perspectives to bear on our understanding of the nature and purpose of learning, and on the role of technology in the learning process. She shares an energising vision of education based on the ancient Irish understanding of learning as nourishment for the human spirit, expressed as learning by wandering. Illustrating the universal and timeless relevance of this understanding, she demonstrates from personal experience how a synthesis of ancient wisdom and new technologies can transform the learning process. This book offers a new dimension to the ongoing debate on the future of education in the Western world.

A Self-Guided Course in the Irish Language Peter Lang
