LEED 2014. For LEED BD+C v4 credit, the IEQ category addresses thermal, visual, and acoustic comfort as well as indoor air quality. The thermal comfort credit applies one point to the following certification types: New Construction, Schools, Retail, Data Centers, Warehouses and Distribution Centers, Hospitality, and Healthcare. The intent of this credit is to "promote occupants' productivity, comfort, and well-being by providing thermal comfort."

Therefore, we are testing a new process for certification with LEED v4.1 O+M and new methodologies for rating performance. These methodologies will be refined during and after the beta as more projects participate and share their experiences and building data. This document is a comprehensive guide to the LEED v4.1 O+M beta program.

When LEED v4 BD+C was released, there were a handful of improvements that I was really excited about: the new interior lighting credit, better daylight metrics, transit points based on number of trips, and envelope and monitoring-based commissioning, to name a few. But most of all, I was thrilled about the revamp of the old stormwater credits to the new rainwater management credit.
