The BrickGun Book shows you how to build five remarkably sleek LEGO(R) handgun replicas, like the classic Berreta 92FS and a formidable rubber-band-firing MAC-11. Each chapter includes step-by-step building instructions and a complete parts list using only readily available LEGO pieces. Builder Jeff Boen has designed each model with stunning accuracy and attention to detail, focusing on everything from 1:1 real-life scale to functioning cocking and

trigger mechanisms. Each BrickGun is ultra-realistic in look and feel, but mostly harmless--perfect for display or your next backyard battle. NOTE: Adult supervision is required. These models are not suitable for children under the age of 12.

Dorling Kindersley Ltd
From New York's Empire State Building to the Eiffel Tower, Dubai's iconic Burj Al Arab hotel to London's St Pancras station, this is a glorious, full colour celebration of the world's most distinctive buildings and urban icons, recreated in LEGO bricks. Brick City is a celebration of the world's favourite buildings and urban icons, recreated solely using LEGO bricks. While to many, LEGO bricks are 'just a toy,' to

an ever-growing army of fans they provide a challenging and enjoyable modelling medium. These fans, calling themselves 'AFOLs' or Adult Fans of LEGO have taken it upon themselves to recreate local landmarks using just the bricks that you find at a local store. LEGO models created by adult fans though, don't resemble those that many people created as a child. Created by masters of their medium, these fabulously detailed models may contain thousands of pieces - or perhaps just a handful. Either way, the talented artists have an intimate knowledge of every piece and colour available; skilfully choosing the ideal piece to recreate a well-known landmark. Sometimes creating a model indistinguishable from the real thing, or evoking the spirit of a building in just a few small pieces. In fact, landmarks and cityscapes - from the New York skyline to

the Sagrada Familia, London's St. Pancras, and the amazing towers of Beijing and Hong Kong - have long been a source of inspiration for LEGO builders. In this book, Warren Elsmore takes us on a world tour and explores more than 12 global cities and their iconic structures. Each city is examined and recreated in LEGO form. Comprising amazing artwork, exploratory photographs, and detailed breakdowns, Brick City looks at the essence of what makes an urban landscape recognisable.

LEGO Guns is packed with building instructions for five impressive looking

"weapons" built entirely from LEGO TECHNIC

parts. In this heavily illustrated 2-color book, you learn how to use LEGO

TECHNIC pieces to build working model guns like the

Warbeast, a sophisticated, fully-automatic submachine

gun; Parabella, a semi-automatic pistol; Thriller, a slide action crossbow pistol with smooth cocking and chambering mechanisms; and the Magic Moth, a simple butterfly "knife" built with TECHNIC pieces. With the help of a bit of sanding, some rubber bands, and Krazy Glue, each gun actually shoots LEGO bricks at high speed, with surprising accuracy. The building instructions for each model are easy to follow and include detailed parts lists. LEGO Guns also includes sections discussing the general concepts of LEGO gun design and offers practical building tips and tricks. The models range from sophisticated to easy, and readers of all ages will find something enjoyable to build and play with.

Learn how to code while you write programs that effortlessly perform useful feats of automation! The second edition of this international fan favorite includes a brand-new chapter on input validation, Gmail and Google Sheets automations, tips for updating CSV files, and more. If you've ever spent hours renaming files or updating spreadsheet cells, you know how tedious tasks like these can be.

But what if you could have your computer do them for you? *Automate the Boring Stuff with Python, 2nd Edition* teaches even the technically uninclined how to write programs that do in minutes what would take hours to do by hand—no prior coding experience required! This new, fully revised edition of Al Sweigart's bestselling Pythonic classic, *Automate the Boring Stuff with Python*, covers all the basics of Python 3 while exploring its rich library of modules for performing specific tasks, like scraping data off the Web, filling out forms, renaming files, organizing folders, sending email responses, and merging, splitting, or encrypting PDFs. There's also a brand-new chapter on input validation, tutorials on automating Gmail and Google Sheets, tips on automatically updating CSV files, and other recent feats of automations that improve your efficiency. Detailed, step-by-step instructions walk you through each program, allowing you to create useful tools as you build out your programming skills, and updated

practice projects at the end of each chapter challenge you to improve those programs and use your newfound skills to automate similar tasks. Boring tasks no longer have to take to get through—and neither does learning Python!

Create Virtual 3D LEGO Models Using LEGO Software Power Tools
LEGO Master Builders have created a powerful set of tools that are distributed as freeware to the LEGO community to assist LEGO fans in their building adventures. Until now, these tools have been difficult to find, and even more difficult

to configure to work with one another. Here, in one book, readers will find steps for installing and using all of the most popular LEGO freeware applications. Also, all of the applications are consolidated into one simple-to-install program that allows readers to be up and running in minutes. Wide market appeal. This book will appeal to the huge established consumer base of the LEGO community, as well as to children, parents, and teachers who may have been intimidated by the difficulties of bringing all of these applications under one roof. The only book of its kind to cover the wide variety of applications available. Some books in the past have touched on one or two of these LEGO applications, but none has covered them all in such

detail. Ø CD provides all of these freeware applications in one easy to install program. Included CD packs more than 8 applications into one easy-to-use format, making it easy for readers to have access to all of these applications in minutes and avoid the headaches of trying to download, install, configure, set up folder structures, and troubleshoot such a wide variety of loosely related freeware applications. Ø Will coincide with the release of Lpub. This will be the first in-depth look at LPub, the new creation of Kevin Clague, which ties LDraw, MLCad, L3P, and POV-Ray together to allow users to easily create professional quality LEGO instructions for both the printed page and the web.
