Nostalgic Generations and Media: Perception of Time and Available Meaning argues that the cultural rise in nostalgic media has the multi-generational impact of making the subjective experience of time speed up for those who are nostalgic, as well as create a surrogate nostalgic identity for younger generations by continually feeding them the

content of their elders. This book is recommended for scholars interested in communication, media studies, and memory/nostalgia studies.

"The Astronaut Instruction Manual is a fantastic and vibrant preparatory guide for today's youth — whether their futures are off in space or right here...on Earth." — Lori Garver,

Former NASA Deputy Administrator Endorsed by authors, teachers, and congressman alike, Mike Mongo's Astronaut Instruction Manual excites a new generation of space explorers. The book, designed for

children between the ages of 6 and 13, is a functioning, interactive instruction manual.

Using mad-lib-style fill-in-the-blanks, Mongo encourages his readers to articulate and illustrate their own vision of next-generation space travel.

The Astronaut Instruction Manual captures a new era of enthusiasm for space exploration, driven in part by new space celebrities

(Commander Chris Hadfield, Elon Musk), and in part by a shift in popular interest in space (SpaceX rockets, The Mars Colonial Transporter, Kerbal). Codes & Cheats Spring 2008

Why isn't life everything we expected it to be? And why doesn't our faith resolve our frustrations and problems? Kevin Myers, the founding pastor of 12Stone Church, a congregation of more than 30,000 active attenders near Atlanta, believes the reason we don't experience a transformed life is that we fail to grow up spiritually. We focus on developing physically, intellectually, emotionally, and financially, yet our faith remains immature and anemic. In this powerful new book, Myers offers a deep yet simple roadmap to a grown-up faith through understanding the whole context of the Bible, developing spiritual intimacy with God, and gratefully embracing holy obedience. As you understand the Bible and the big picture of God's story with humanity, you begin to find answers to life's most compelling questions. As you begin to understand God more, your longing and ability to experience

spiritual intimacy with him increases, as does your desire to obey what God asks of you and your ability to follow through. This is the way to the bigger life, a life even better than you expected--or even dreamed possible.

"The right story at the right time. . . . It ' s not just a narrative; it ' s an experience. It ' s the novel we ' ve been waiting for." —The New York Times A boy tries to steer a safe path through the projects in Harlem in the wake of his brother ' s death in this outstanding debut novel that celebrates community and creativity. \*\* WINNER

OF THE CORETTA SCOTT KING – JOHN STEPTOE AWARD FOR NEW TALENT! \*\* MICHAEL B. JORDAN TO DIRECT MOVIE ADAPTATION! SIX STARRED REVIEWS!

It ' s Christmas Eve in Harlem, but twelve-year-old Lolly Rachpaul and his mom aren ' t celebrating. They ' re still reeling from his older brother ' s death in a gang-related shooting just a few months

earlier. Then Lolly ' s mother ' s girlfriend brings him a gift that will change everything: two enormous bags filled with Legos.

Lolly ' s always loved Legos, and he prides himself on following the kit instructions exactly.

Now, faced with a pile of building blocks and no instructions, Lolly must find his own way forward. His path isn ' t clear—and the pressure

to join a " crew, " as his brother did, is always there. When Lolly and his friend are beaten up and robbed, joining a crew almost seems like the safe choice. But building a fantastical Lego city at the community center provides Lolly with an escape—and an

unexpected bridge back to the world. David Barclay Moore paints a powerful portrait of a boy teetering on the edge—of adolescence, of grief, of violence—and shows how Lolly ' s inventive spirit helps him build a life with firm foundations and open

indoors. MORE PRAISE FOR THE STARS BENEATH OUR FEET:

exhaustion carries over right into first jobs. What have traditionally been considered the best years of life have become the beaten-down years of life. Belle Liang and Timothy Klein devote their careers both to counseling individual students and to cutting through the daily pressures to show a better way, a framework, and set of questions to find kids ' " true north " : what really turns them on in life, and how to harness the core qualities that reveal, allowing them to choose a course of study, a college, and a career. Even the gentlest parents and teachers tend to play into pervasive societal pressure for students to PERFORM. And when we take the foot off the gas, we beg the kids to just figure out what their PASSION is. Neither is a recipe for mental or physical health, or, ironically, for performance or passion. How to Navigate Life shows that successful human beings instead tap into their

Ultimate LEGO Star Wars Penguin Since the "Automatic Binding Bricks" that LEGO produced in 1949, and the LEGO "System of Play" that began with the release of Town Plan No. 1 (1955), LEGO bricks have gone on to become a global phenomenon, and the favorite building toy

of children, as well as many an AFOL (Adult Fan of LEGO). LEGO has also become a medium into which a wide number of media franchises, including Star Wars, Harry Potter, Pirates of the Caribbean, Batman, Superman, Lord of the Rings, and others, have adapted their characters, vehicles, props, and settings. The LEGO Group itself has become a multimedia empire, including LEGO books, movies, television shows, video games, board games, comic books, theme parks, magazines, and even MMORPGs. LEGO Studies: Examining the Building Blocks of a Transmedial Phenomenon is the first collection to examine LEGO as both a medium into which other franchises can be adapted and a transmedial franchise of its own. Although each essay looks at a particular aspect of the LEGO phenomenon, topics such as adaptation, representation, paratexts, franchises, and interactivity intersect throughout these essays, proposing that the study of LEGO as a medium and a media empire is a rich vein barely touched upon in Media Studies.

Meet Rush Limbaugh’s really good pal Rush Revere! Okay, okay, my name’s really Rusty—but my friends call me Rush Revere because I’ve always been the #1 fan of the coolest colonial dude ever, Paul Revere. Talk about a rock star—this guy wanted to protect young America so badly, he rode through those bumpy, cobblestone-y streets warning everyone that “the British are coming!” On a horse. Top of his lungs. Wind blowing, rain streaming... Well, you get the picture. But what if you could get the real picture—by actually going back in time and seeing with your own eyes how our great country came to be and meeting the very people who made it all happen? Hold on to your pointy triangle hats, because you can—with me as your tour guide across time. First, we’ll join a shipload of brave families journeying on the

Mayflower in 1620. Then we’ll head to Boston in 1765 as cries for revolution are growing louder and louder. With plenty of fascinating facts and thrilling action, these books are perfect for exceptional young patriots just like you!

Strange Natures John Wiley & Sons

A groundbreaking examination of the implications of synthetic biology for biodiversity conservation Nature almost everywhere survives on human terms. The distinction between what is natural and what is human-made, which has informed conservation for centuries, has become blurred. When scientists can reshape genes more or less at will, what does it mean to conserve nature? The tools of synthetic biology are changing the way we answer that question. Gene editing technology is already transforming the agriculture and biotechnology industries. What happens if synthetic biology is also used in conservation to control invasive species, fight wildlife disease, or even bring extinct species back from the dead?

Conservation scientist Kent Redford and geographer Bill Adams turn to synthetic biology, ecological restoration, political ecology, and de-extinction

studies and propose a thoroughly innovative vision for protecting nature.
