The Dark Side Tia Kelly

The skills in shortest supply for the

future workplace are not technical, but behavioural – creativity, problem-solving and critical thinking. Raising Thinkers begins with an exploration of this skills gap in developed countries across the East and West from a national, corporate and educational perspective. In Asia there is growing unhappiness with a school system that is too narrowly focused on rote learning and teaching to test. In the West there is much debate about the efficacy of school systems that either cater largely to the lowest levels of ability or that too blindly strive to top global education rankings. Raising Thinkers provides insight into the future that today's children will inhabit as adults and what public school systems are currently serving up. It covers the mechanics of high-level, critical and creative thinking, problem solving and decision making and proposes a curiosity-based approach to problems that should be taught right from school-going years. School reform will always lag behind the ever evolving needs of the corporate world. For current scholars and parents, change will come too late – therefore Raising Thinkers is also a guide aimed at helping parents and caregivers bridge the skills gap in fun, useful and practical ways.

Star Wars has reached more than three generations of casual and hardcore fans alike, and as a result many of the producers of franchised Star Wars texts (films, television, comics, novels, games, and more) over the past four decades have been fans-turned-creators. Yet despite its dominant

cultural and industrial positions, Star Wars has rarely been the topic of sustained critical work. *Star Wars and the History of Transmedia Storytelling* offers a corrective to this oversight by curating essays from a wide range of interdisciplinary scholars in order to bring Star Wars and its transmedia narratives more fully into the fold of media and cultural studies. The collection places Star Wars at the center of those studies' projects by examining video games, novels and novelizations, comics, advertising practices, television shows, franchising models, aesthetic and economic decisions, fandom and cultural responses, and other aspects of Star Wars and its world-building in their multiple contexts of production, distribution, and reception. In emphasizing that Star Wars is both a media franchise and a transmedia storyworld, *Star Wars and the History of Transmedia Storytelling* demonstrates the ways in which transmedia storytelling and the industrial logic of media franchising have developed in concert over the past four decades, as multinational corporations have become the central means for subsidizing, profiting from, and selling modes of immersive storyworlds to global audiences. By taking this dual approach, the book focuses on the interconnected nature of corporate production, fan consumption, and transmedia world-building. As such, this collection grapples with the historical, cultural, aesthetic, and political-economic implications of the relationship between media franchising and transmedia storytelling as they are seen at work in

the world's most profitable transmedia franchise.

On August 9, 1965, 53 men died in the impoverished hills of rural Arkansas. Their final breaths came in a government facility deep underground

while their loved ones were at home expecting their return. The incident at Launch Complex 373-4 remains the deadliest accident to occur in a U.S. nuclear facility. *The 53: Rituals, Grief, and a Titan II Missile Disaster* analyzes the event. It looks at causes but more importantly at how the mishap has affected daughters and sons for nearly six decades. It gives new sociological insight on technological disasters and the sorrow following them. The book also details how surviving family members managed themselves and each other while benefiting from the support of friends and strangers. It describes how institutions blame the powerless, and how powerful organizations generate distrust and secondary trauma. With an analysis of the event and post-disaster life, their children share stories on what went wrong and how they keep moving forward.
