This book is used in conjunction with The Leica Pocket Book and Leica Price Guide and has been compiled from original Leitz sources. The book has two aims: the first is to act as the constant pocket companion for the Leica Collector in his travels; the second is to help Leica enthusiasts who want to study fascinating accessories in greater depth. It covers the whole period from 1924 to Spring 1996 and will enable the reader to place an individual accessory in its historical context with contemporary Leica models and lenses. Readers wishing to study Leica accessories further and looking for a more suitable bedside companion are referred to the author 's Leica Collectors Guide which also includes comprehensive accounts of Leitz enlargers, projectors and binoculars.

Every photographer using a digital SLR camera needs to master exposure in order to achieve the highest quality results in their photographs. "Mastering Exposure and the Zone System for Digital Photographers" is a complete guide to both the technical and creative aspects of exposure in digital photography. This guide uses a combination of discussion, examples, and hands-on exercises that lead the reader through a progression of skills development covering the full range of photographic lighting situations. Topics covered include basic metering, outdoor and indoor available light photography, fill flash, night, and low-light conditions, as well as advanced topics like action and sports, close-up, high-key and low-key lighting, multiple light sources. In conclusion, the author shows how to use the Zone System, developed by Ansel Adams for film, with today's digital cameras to achieve stunning results with exceptional tonal range and clarity.

"This book exhorts the reader to embrace the materiality of archaeology by recognizing how every step in the discipline's scientific processes involves interaction with myriad physical artifacts, ranging from the camel-hair brush to profile drawings to virtual reality imaging. At the

same time, the reader is taken on a phenomenological journey into various pasts, immersed in the lives of peoples from other times, compelled to engage their senses with the sights, smells, and noises of the publics and places whose remains they study. This is a refreshingly original and provocative look at the meaning of the material culture that lies at the foundation of the archaeological discipline."—Michael Brian Schiffer, author of *The Material Life of Human Beings* "This volume is a radical call to fundamentally rethink the ontology, profession, and practice of archaeology. The authors present a closely reasoned, epistemologically sound argument for why archaeology should be considered the discipline of things, rather than its more commonplace definition as the study of the human past through material traces. All scholars and students of archaeology will need to read and contemplate this thought-provoking book."—Wendy Ashmore, Professor of Anthropology, UC Riverside "A broad, illuminating, and well-researched overview of theoretical problems pertaining to archaeology. The authors make a calm defense of the role of objects against tedious claims of 'fetishism.'"—Graham Harman, author of *The Quadruple Object*

This book presents an overview of our current understanding of the biomineralization mechanisms for shell formation in the pearl oyster *Pinctada fucata*, based on molecular biology, biochemistry, cell biology, structural biology and environmental biology. *Pinctada fucata* is the major pearl-producing shellfish in the South China Sea and is also an established model system for the research on the nacre biomineralization mechanism. Extensive studies on nacre biomineralization have provided valuable information for novel bionic material design. Discussing the isolation and gene cloning of the matrix proteins involved in the shell formation, as well as the cell signaling pathways, shell microstructures, and the environmental impacts on shell

biomineralization, it is a valuable reference resource for researchers working in the field of nacre biomineralization and biomaterials.
