8 1/2 x 10 Since publication this title has proved to be very popular for both the serious lens user wishing to understand more about his lenses, as well as the Leica enthusiast considering which lens would be suitable to add to his outfit. Do you know

your "Coma from your Aberrations"? If "Yes," then part 2 of Erwin Puts' new book will be of considerable interest to you. Either way you may find this section easier to understand than you expect; the illustrations and diagrams do help. Part 1 goes into the optical history of E. Leitz, Wetzlar and the Leica Camera of Solms in detail with all the personalities involved. This section is well illustrated with some new pictures. The commercial demands are always battling with the perfectionists at Leica who created some of the world's most famous lenses. Part 2 is an optical digression explaining the lens and glass design features, problems and terms and the continual battle to ensure that Leica users end up with the highest possible standard of lens. Part 3 is the largest part of the book. Puts has tested Leica lenses from 1925 to date; each lens, in most cases with diagram, is detailed with its performances at the critical apertures.

The Leica M system has been with us since 1954. It rapidly became, and has remained the favorite instrument of photographers, especially

photojournalists, who, like Henri Cartier-Bresson, seek to "catch life in the act", to record "the decisive moment". In this Leica M Compendium Jonathan Eastland describes the whole Leica M system from his experience as a professional photographer. He explains how to use, enjoy and get the best out of the cameras and lenses, regardless of age. The latest lenses can be used on the earliest cameras, and vice-versa, and the Visoflex, although no longer made, is now much easier to use with the M6 and its TTL metering. Advice on planning and shooting a story with the Leica and extensive tables of technical data complete this ideal companion for the practical Leica M photographer, as well as for the Leica collector and enthusiast.

With an abundance of new features and the promise of producing vastly superior images, photographers of all skill levels are giving Capture One Pro a try. Of course, along with expanded functionality and improved performance, the software has become a challenge to learn efficiently on one's own. Users need a helping hand in order to get up to speed and make sure they are taking full advantage of this powerful software.

In Capture One Pro 10: Mastering RAW Development, Image Processing, and Asset Management, photographer Sascha Erni teaches readers everything they need to know in order to quickly get up and running with Capture One Pro. He also dives deeply into its extensive feature list to allow users to fully explore the capabilities of the software. Whether you 're moving to Capture One Pro from Aperture or Lightroom, or just beginning to learn image-editing with Capture One Pro 10, this book will teach you how to get amazing results while avoiding frustration and wasted time along the way.

Topics include:

- RAW conversion
- Asset management
- Converting to black-and-white
- Eliminating lens errors
- Tethered shooting/live view
- Film grain simulation

- Working with layers

This book presents an overview of our current understanding of the biomineralization mechanisms for shell formation in the pearl oyster *Pinctada fucata*, based on molecular biology, biochemistry, cell biology, structural biology and environmental biology. *Pinctada fucata* is the major pearl-producing shellfish in the South China Sea and is also an established model system for the research on the nacre biomineralization mechanism. Extensive studies on nacre biomineralization have provided valuable

information for novel bionic material design. Discussing the isolation and gene cloning of the matrix proteins involved in the shell formation, as well as the cell signaling pathways, shell microstructures, and the environmental impacts on shell biomineralization, it is a valuable reference resource for researchers working in the field of nacre biomineralization and biomaterials.
