Complete with expert tips on the finest art galleries and boutiques, where to spot sea otters, and how to explore the maritime history of the shore, Moon Monterey & Carmel gives travelers the tools they need to create a more personal and memorable experience

Creating the National Park Service Cengage Learning

Two men played a crucial role in the creation and early history of the National Park Service: Stephen T. Mather, a public relations genius of sweeping vision, and Horace M. Albright, an able lawyer and administrator who helped transform that vision into reality. In *Creating the National Park Service*, Albright and his daughter, Marian Albright Schenck, reveal the previously untold story of the critical "missing years" in the history of the service. During this period, 1917 and 1918, Mather's problems with manic depression were kept hidden from public view, and Albright, his able and devoted assistant, served as acting director and assumed Mather's responsibilities. Albright played a decisive part in the passage of the National Park Service Organic Act of 1916; the formulation of principles and policies for management of the parks; the defense of the parks against exploitation by ranchers, lumber companies, and mining interests during World War I; and other issues crucial to the future of the fledgling park

system. This authoritative behind-the-scenes history sheds light on the early days of the most popular of all federal agencies while painting a vivid picture of American life in the early twentieth century.

Safe, efficient, code-compliant electrical installations are made simple with the latest publication of this widely popular resource. Like its highly successful previous editions, the National Electrical Code 2011 spiral bound version combines solid, thorough, research-based content with the tools you need to build an in-depth understanding of the most important topics. New to the 2011 edition are articles including first-time Article 399 on Outdoor, Overhead Conductors with over 600 volts, first-time Article 694 on Small Wind Electric Systems, first-time Article 840 on Premises Powered Broadband Communications Systems, and more. This spiralbound version allows users to open the code to a certain page and easily keep the book open while referencing that page. The National Electrical Code is adopted in all 50 states, and is an essential reference for those in or entering careers in electrical design, installation, inspection, and safety.

The Compu-mark Directory of U.S. Trademarks Fodor's

The author, a native Australian, covers everything you might want to know about

Australia - guaranteed! The places to stay, from budget to luxury, rentals to B&Bs, the restaurants, from fast food to the highest quality, the beachwalks and bushwalks, the wildlife and how to see it, exploring the country by air, on water, by bike, and every other way. Following are a few excerpts from the guide: The gathering of landscapes within the compact state of Victoria seem as if a giant had taken different pieces from around the continent, squashed them together and shaken them up, and then tossed them to let them fall where they may. The awesome, wave-lashed coastal edges are among the state's classic sights, with crumpled pillars of orange rock stacked tall out in the water. Where the shores aren't rough, the beaches are silky and white, as soft and tame as a kitten, with cold but gentle waters. Behind this edge are thick patches of temperate rainforests leading up into drier locales, including inland deserts, an unmade bed of mountain foothills and folds, and smooth river marshes and plains. You'd never expect that much of the terrain here was once actually volcanic, resulting in wild peaks, bluffs, and valleys throughout the center. There's 227,600 sq km of land in the state, and the Great Dividing Range arches through the

---

center of it, with major collections of peaks in the Dandenongs and Macedons. The highest summits are in the east, at 1,986-m (6,514-ft) Mt. Bogong and 1,922-m (6,304-ft) Mt. Feathertop, and snowfields are found throughout the northeastern Australian Alps from June to September. Hemming in the land are 1,800 km (1,116 mi) of coastlines along the Bass Strait and the Southern Ocean, with Melbourne and Geelong fronting the central cut inland to Port Phillip Bay. This is a cool state, akin to the Pacific Northwest or the lower New England states of the U.S., with warm summers but chilling, wet winters. Some regions do dip below freezing, namely the northeastern mountains, while the Gippsland highlands in the east and the western Otway Ranges see more rain than anywhere else. Skip a couple hours south or west and you'll hit the arid Mallee region, and the Little Desert and Big Desert national park areas. Farmlands fill in the gaps, where orchards and vineyards are filled with apples, grapes, oranges, and other citrus fruits. Main crops are grains and vegetables, the fields fronting huge dairy farms or sheep and cattle ranches. Tasmania is offshore from Victoria. The name "Tasmania" is one of the world's

most intriguing, and it rightfully sounds such as one of the most fascinating places on earth. And, yes, it's a heck of a journey to reach this offshore Australian state - but once you're here, if you're adventurous, you won't want to leave. Indeed, the island state of Tasmania is ripe for adventure. A heart-shaped, mountainous landmass 298 km (185 mi) southeast of the main Australian continent, it's covered with forests, threaded with rivers, and edged by wild, rugged beaches and bays. Its wilderness comprises an international Heritage Site of its own, filled with some of the world's oldest and most unusual plants, animals that are found nowhere else on earth, rock formations that span every geological era, and among the longest underground tunnels ever found. The capital of Hobart, where almost half the island's residents live, is tucked into the southeastern edge, and the sleepy northern ferry town of Devonport brings in visitors from the mainland. No one ventures far, though, which leaves the majority of the island open to exploring and free of crowds, even at the loveliest of national wonders such as Tasman National Park in the southeast, Freycinet National Park in the east, and Franklin-Gordon Wild Rivers National

Park in the west.
