The complete works of one of England's greatest Edwardian writers Saki is perhaps the most graceful spokesman for England's 'Golden Afternoon' - the slow and peaceful years before the First World War. Although, like so many of his generation, he died tragically young, in action on the Western Front, his reputation as a writer continued to grow long after his death. His work is humorous, satiric, supernatural, and macabre, highly individual, full of eccentric wit and unconventional situations. With his great gift as a social satirist of his contemporary upper-class Edwardian world, Saki is one of the few undisputed English masters of the short story and one of the great writers of a bygone era. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

Even before the original Frostgrave rulebook landed in players' hands, its artwork, previewed in the run-up to release, attracted widespread attention and acclaim. Today, some eight volumes, two novels, and multiple boxed sets of plastic miniatures later, Dmitry and Kate Burmak have produced more than 85 illustrations, guided by the concepts developed by Frostgrave creator Joseph A. McCullough. Together, these three have breathed life into the Frozen City, depicting the wizards, warriors, and creatures that call it home. With behind-the-scenes content, including concepts, sketches, work-in-progress shots, and commentary from the creators, this lavish volume features all the artwork produced for Frostgrave - from the rulebook that started it all to the Perilous Dark supplement. *Slim by Design* CRC Press

The Raspberry Pi B2 is an inexpensive embedded processor that provides a high-performance Linux development environment. This book is a fast-paced guide that will show you how to use Raspberry Pi technology to build a biped robot that can interact with its environment. We start off by explaining the basics of getting your Raspberry Pi up and running, ready to be mounted on your biped platform. After this, you will be introduced to the art of constructing a mechanism for the biped platform. You will then learn to develop a vision system for your robot, as well as a means by which you can control and monitor it. At the end of this book, you will have learned enough to build a complex biped robot that can walk, turn, find its way, and "see" its environment.

This is a complete "Intro to Airbrushing" course in a workbook form. A classroom in a book! There is only so much an airbrush can do - dots, lines, daggers, and shading. We introduce each skill in a logical and exciting way. In our book, each skill is cumulative, so grasping each technique is easier than tackling them out of order as you would if you were self-taught and left to sift through a cluster of internet information that is not necessarily correct. Our method is successful, because we have taken the entire contents of an Intro to Airbrushing class, and made it into a workbook... yes a WORKBOOK! The skills are introduced in an interesting way, and each lesson has a corresponding workbook page that can be practiced over and over until you are proficient at each skill! There has never been anything like this before! With over 50 lessons, you will master each skill and work up to the four beautiful and challenging final projects. We cover all the basics that you need to know to get set up in airbrushing: types of airbrushes, compressors, paint, substrates, etc... even how to properly hold an airbrush and how to clean it. We are so thorough and innovative, we have earned the endorsement of Anest Iwata-Medea, Inc., the maker of the best, and our favorite, airbrushes! A course like this costs hundreds of dollars just for tuition if you were to attend a workshop. With travel and lodging, you can spend thousands of dollars for just ONE course. With this book, you get the same content but are free to take it at your own pace. This is an excellent way to introduce airbrushing into your skill set and develop a life-long passion and income source.

Selecting Thermoplastics for Engineering Applications, Second Edition, Lakeview Research LLC

A classic mystery from Dick Francis, the champion of English storytellers. Daniel Roke owns a stud farm in Australia. He's young, smart, hard-working and desperate for some excitement - all of which makes him the ideal candidate for the Earl of October, who has come visiting. The Earl is concerned about a horse-doping scandal that is destroying English racing. He wants to pay Daniel to come back with him, pose as a highly corruptible stable lad and discover who is behind it. Unfortunately, when Daniel agrees he doesn't realise how close he'll have to get to find the truth. Nor how determined the criminals will be to prevent him living long enough to tell anyone... Praise for Dick Francis: 'As a jockey, Dick Francis was unbeatable when he got into his stride. The same is true of his crime writing' Daily Mirror 'Dick Francis's fiction has a secret ingredient - his inimitable knack of grabbing the reader's attention on page one and holding it tight until the very end' Sunday Telegraph 'The narrative is brisk and gripping and the background researched with care . . . the entire story is a pleasure to relish' Scotsman 'Francis writing at his best' Evening Standard 'A regular winner . . . as smooth, swift and lean as ever' Sunday Express 'A super chiller and killer' New York Times Book Review Dick Francis was one of the most successful post-war National Hunt jockeys. The winner of over 350 races, he was champion jockey in 1953/1954 and rode for HM Queen Elizabeth, the Queen Mother, most famously on Devon Loch in the 1956 Grand National. On his retirement from the saddle, he published his autobiography, *The Sport of Queens*, before going on to write forty-three bestselling novels, a volume of short stories (*Field of 13*), and the biography of Lester Piggott. During his lifetime Dick Francis received many awards, amongst them the prestigious Crime Writers' Association's Cartier Diamond Dagger for his outstanding contribution to the genre, and three 'best novel' Edgar Allan Poe awards from The Mystery Writers of America. In 1996 he was named by them as Grand Master for a lifetime's achievement. In 1998 he was elected a fellow of the Royal Society of Literature, and was awarded a CBE in the Queen's Birthday Honours List of 2000. Dick Francis died in February 2010, at the age of eighty-nine, but he remains one of the greatest thriller writers of all time.

Building on their breakthrough bestsellers Lean Software Development and Implementing Lean Software Development, Mary and Tom Poppendieck ' s latest book shows software leaders and team members exactly how to drive high-value change throughout a software organization—and make it stick. They go far beyond generic implementation guidelines, demonstrating exactly how to make lean work in real projects, environments, and companies. The Poppendiecks organize this book around the crucial concept of frames, the unspoken mental constructs that shape our perspectives and control our behavior in ways we rarely notice. For software leaders and team members, some frames lead to long-term failure, while others offer a strong foundation for success. Drawing on decades of experience, the authors present twenty-four frames that offer a coherent, complete framework for leading lean software development. You ' ll discover powerful new ways to act as competency leader, product champion, improvement mentor, front-line leader, and even visionary. Systems thinking: focusing on customers, bringing predictability to demand, and revamping policies that cause inefficiency Technical excellence: implementing low-dependency architectures, TDD, and evolutionary development processes, and promoting deeper developer expertise Reliable delivery: managing your biggest risks more effectively, and optimizing both workflow and schedules Relentless improvement: seeing problems, solving problems, sharing the knowledge Great people: finding and growing professionals with purpose, passion, persistence, and pride Aligned leaders: getting your entire leadership team on the same page From the world ' s number one experts in Lean software development, Leading Lean Software Development will be indispensable to everyone who wants to transform the promise of lean into reality—in enterprise IT and software companies alike.

Developers who want to access USB devices from their embedded systems will find a helpful resource in USB Embedded Hosts: The Developer ' s Guide. This new book from the author of USB Complete shows how small systems can take advantage of the same wealth of USB devices available to conventional PCs. The book begins with a review of USB host communication protocols. Readers then learn which USB host requirements are relaxed for embedded systems and what new requirements some embedded systems must meet. To help in selecting a development platform, the book explores available hardware and software for USB host communications in small systems. The heart of the book focuses on communicating with USB devices. The topics (with example code) include USB drives, keyboards, virtual serial ports, network bridges, mics, speakers, video cameras, and printers, plus devices that don ' t fit defined USB classes. Also discussed are systems that support both USB host and device functions. The example code is written for the BeagleBoard-xM open development board using a distribution of Linux targeted to small systems. Also covered is how to use Linux commands and utilities to learn about, monitor, and debug communications with USB devices.
