An in-depth study of the work of German-born industrial designer Richard Sapper, most famous for designs such as the Tizio lamp and the Brionvega radio. Richard Sapper (1932-2015) a German-born designer who was based in Milan most of his working career, is considered one of the most important designers of his generation. Within his lifetime, he received numerous international design accolades, including ten prestigious Compasso d'Oro awards.

Sapper developed and designed a wide variety of products, ranging from ships and cars, to computers and electronics as well as

furniture and kitchen appliances. His clients included Alessi, Artemide, B&B Italia, Brionvega, FIAT, Heuer, Kartell, Knoll, IBM, Lenovo, Lorenz Milano, Magis, Molteni, Pirelli and many others. This investigation of Sapper's work, based on over forty hours of interviews with the designer Jonathan Olivares, studies his objects, the circumstances that shaped them and the resulting ideals that emerge. The inter-generational conversation explores themes that reoccur throughout Sapper's oeuvre, and which have a particular importance for a younger generation of designers and those with a desire to understand Sapper's work from a fresh perspective. An illustrated timeline, packed with images from Sapper's personal

archives, reveals the incredible variety and technical brilliance of his work. Richard Sapper died in Milan on 31 December 2015. Designed by SM Associati, the agency of Marco Velardi from *Apartamento* magazine, the book opens with an image essay featuring candid commissioned photography by Ramak Fazel.

Briefly, a boot loader is the first software program that runs when a computer starts. It is responsible for loading and transferring control to an operating system kernel software (such as Linux or GNU Mach). The kernel, in turn, initializes the rest of the operating system (e.g. a GNU system). GNU GRUB is a very powerful boot loader, which can load a wide variety of free operating systems, as well as proprietary operating systems with chain-loading. GRUB

is designed to address the complexity of booting a personal computer; both the program and this manual are tightly bound to that computer platform, although porting to other platforms may be addressed in the future. One of the important features in GRUB is flexibility; GRUB understands filesystems and kernel executable formats, so you can load an arbitrary operating system the way you like, without recording the physical position of your kernel on the disk. Thus you can load the kernel just by specifying its file name and the drive and partition where the kernel resides. This

manual is available online for free at gnu.org. This manual is printed in grayscale.

The definitive story of a game so great, even the Cold War couldn't stop it Tetris is perhaps the most instantly recognizable, popular video game ever made. But how did an obscure Soviet programmer, working on frail, antiquated computers, create a product which has now earned nearly 1 billion in sales? How did a makeshift game turn into a worldwide sensation, which has been displayed at the Museum of Modern Art, inspired a

big-budget sci-fi movie, and been played in outer space? A quiet but brilliant young man, Alexey Pajitnov had long nurtured a love for the obscure puzzle game pentominoes, and became obsessed with turning it into a computer game. Little did he know that the project that he labored on alone, hour after hour, would soon become the most addictive game ever made. In this fast-paced business story, reporter Dan Ackerman reveals how Tetris became one of the world's first viral hits, passed from player to player, eventually breaking through the Iron Curtain into the West. British, American, and Japanese moguls waged a bitter fight over the rights, sending their fixers racing around the globe to secure backroom deals, while a secretive Soviet organization named ELORG chased down the game's growing global profits. The Tetris Effect is an homage to both creator and creation, and a must-read for anyone who's ever played the game—which is to say everyone.
