sense, learn, reason, and interact with people in new ways to provide insight and advice. In *Smart Machines*, John E. Kelly III, director of IBM Research, and Steve Hamm, a writer at IBM and a former business and technology journalist, introduce the fascinating world of cognitive systems to general audiences and provide a window into the future of computing. Cognitive systems promise to penetrate complexity and assist people and organizations in better decision making. They can help doctors evaluate and treat patients, augment the ways we see, anticipate major weather events, and contribute to smarter urban planning. Kelly and Hamm

comprehensive perspective describes this technology inside and out and explains how it will help us conquer the harnessing and understanding of big data, one of the major computing challenges facing businesses and governments in the coming decades. Absorbing and impassioned, their book will inspire governments, academics, and the global tech industry to work together to power this exciting wave in innovation.

Chromos is one of the true masterpieces of post-World War II fiction. Written in

the 1940s but left unpublished until 1990, it anticipated the fictional inventiveness of the writers who were to come along - Barth, Coover, Pynchon, Sorrentino, and Gaddis. *Chromos* is the American immigration novel par excellence. Its opening line is: "The moment one learns English, complications set in." Or, as the novel illustrates, the moment one comes to America, the complications set in. The cast of characters in this book are immigrants from Spain who have one leg in Spanish

---

culture and the other in the confusing, warped, unfriendly New World of New York City, attempting to meld two worlds that just won't fit together. Wildly comic, Chromos is also strangely apocalyptic, moving towards point zero and utter darkness.

[The 52-Week Low Formula](#)  
 Steck-Vaughn Author Michael Lewis was recently interviewed by Steve Kroft on 60 Minutes and a quote from

---

that interview was the inspiration and influence for Casino Healthcare."If it wasn't complicated, it wouldn't be allowed to happen. The complexity disguises what's happening. If it's so complicated that you can't understand it - then you can't question it." What he was referencing, of course, was high-speed trading on Wall Street, but the quote could just as easily be applied to healthcare. In fact, it's tailor-made. The

statistics prove just how much of a casino the U.S. healthcare system has become.\* As a country, we now spend over \$10,000 per year - for each person - just on healthcare.\* Measured as an economic unit, U.S. Healthcare is now the size of Germany.\* Preventable medical errors are now the 3rd leading cause of death in the U.S. (behind cancer and heart disease). \* Medical debt is the leading cause of personal bankruptcies in

the U.S.\* Hospital pricing is determined by a cabal - in secret - and beyond legal challenge.\* The Pharmaceutical industry - with profit margins that often eclipse tech giants like Apple and Google - paid out a whopping \$15 billion in fines over the last six years - just for off-label drug marketing.\* American healthcare was recently ranked dead last when compared to 10 other countries. The system has become so

---

complex and opaque that most Americans have simply given up on understanding how it works. Whole families are crushed in this casino trying to pay for unanticipated medical expenses, many of which are immediate, unavoidable and life threatening. The huge expense might be defensible if the system delivered exceptional quality, but it doesn't. When the World Health Organization last ranked health systems, the

U.S. came in at #37 - just ahead of #38 (Slovenia) and behind #36 (Costa Rica).Casino Healthcare is not a theoretical policy book for the elite, but a book that penetrates the blanket of fog surrounding a major - and growing - household expense. With the research and style of an investigative journalist, the book is easy to understand and accessible by every American. The U.S. healthcare system was

never designed from whole cloth with a strategic vision or intent, but instead it has evolved through the decades with a host of legislative "patches" and temporary fixes. The reason for this is simple. When a casino is generating profits of this magnitude it's critical to keep the casino humming and almost impossible to close it. Rick Scott - now the Governor of Florida - captured the enormous scale of this challenge

---

with this simple two-sentence quote: "How many businesses do you know that want to cut their revenue in half? That's why the healthcare system won't change the healthcare system."

Americans have a right to be angry with how the U.S. healthcare system has been hijacked for revenue and profits. One analyst recently categorized it as "legalized extortion on a national scale." In the same way that Michael Lewis exposed

the complexity of high-speed trading on Wall Street, Casino Healthcare will expose the U.S. healthcare system for what it really is - a giant casino of epic proportions where the risks are both personal and nothing less than the health of an entire nation. food businesses, between scientists and policy makers to develop successful products, services and policies, it is essential that they understand food consumers and how they decide which products to buy. Food consumer behaviour is the result of various factors, including the motivations of different consumers, the attributes of specific foods, and the environment in which food choices occur. Recognising diversity and marketing, and their views on food preparation and technology. Part three covers cultural and individual differences in food choice as well as addressing potentially influential factors such as age and gender. Important topics such as public health and methods to change consumers' preferences for unhealthy foods are discussed in part four. The final section concludes with advice on developing

coherent safety policies and the consumers ' responsibility for food production and consumption. Understanding consumers of food products is a standard reference for all those in the food industry concerned with product development and regulation.
