In an age that
prizes political and
personal
transparency, In
Defense of Secrets
champions the
secret as what
permits relation
and ensures our
humanity.
Psychoanalyst and
philosopher Anne
Dufourmantelle
drowned in 2017
in an attempt to
rescue two
children caught in
the ocean. Her
work lives on,
though, in this
provocative and
necessary book.
Through
etymologies and
case studies,

personal history and incisive commentary on contemporary society, In *Defense of Secrets* returns us to the fundamental psychic scene of the secret. The secret, for Dufourmantelle, is not a code to be cracked or a firewall to be penetrated but a dynamic and powerful entity that permits relation and that ensures our humanity. Tracking the secret though art and literature, philosophy, psychoanalysis, and sociology,

from the Inquisition to the present, Dufourmantelle's writing spirals around the question of the secret's value. In our age, when political and personal transparency seem to be prized above all—lives posted on the Internet, information leaked, whistles blown, taboos absent except with respect to the secret itself—In *Defense of Secrets* champions what remains hidden, private, veiled, hushed, just out of sight. The secret is on the side of

nature, not science; organic growth, not technology; love's generosity, not knowledge's grasp. For Dufourmantelle, the secret is a powerful and dynamic thing: deadly if unheard or misused, perhaps, but equally the source of creativity and of ethics. An ethics of the secret, we can hear her say, means listening hard and sensitively, respecting the secret in its secret essence, unafraid of it and open to what it has to say. *Les micro-humains*
Albin Michel

Le Paradis ? Un jour vous aussi vous y viendrez. Alors préparez-vous au Jugement dernier. Il y aura un avocat (votre ange gardien), un procureur (votre démon) et un juge (de préférence impartial). Mais les valeurs au Paradis ne sont pas les mêmes que sur Terre. Anatole Pichon va en faire l'amusante expérience.

BLUE REMEMBERED EARTH is the first volume in a monumental trilogy tracing the Akinya family across more than ten thousand years of future history ... out beyond the solar system, into interstellar space and the dawn of galactic society. One hundred and fifty years from now, in a world where Africa is the dominant technological and economic power, and where crime, war, disease and poverty have been banished to history, Geoffrey Akinya wants only one thing: to be left in peace, so that he can continue his studies into the elephants of the Amboseli basin. But Geoffrey's family, the vast Akinya business empire, has other plans. After the

death of Eunice, Geoffrey's grandmother, erstwhile space explorer and entrepreneur, something awkward has come to light on the Moon, and Geoffrey is tasked - well, blackmailed, really - to go up there and make sure the family's name stays suitably unblemished. But little does Geoffrey realise - or anyone else in the family, for that matter - what he's about to unravel. Eunice's ashes have already been scattered in sight of Kilimanjaro. But the secrets she died with are about to come back out into the open, and they could change everything. Or shatter this near-utopia into shards ... Nightfall The

Floating Press
In this thoughtful and highly readable book, Noël Sturgeon illustrates the myriad and insidious ways in which American popular culture depicts social inequities as “natural” and how our images of “nature” interfere with creating solutions to environmental problems that are just and fair for all. Why is it, she wonders, that environmentalist messages in popular culture so often “naturalize” themes of heroic male violence, suburban nuclear family structures, and U.S. dominance in the world? And what do these patterns of thought mean for how we envision environmental

solutions, like “green” businesses, recycling programs, and the protection of threatened species? Although there are other books that examine questions of culture and environment, this is the first book to employ a global feminist environmental justice analysis to focus on how racial inequality, gendered patterns of work, and heteronormative ideas about the family relate to environmental questions. Beginning in the late 1980s and moving to the present day, Sturgeon unpacks a variety of cultural tropes, including ideas about Mother Nature, the purity of the natural, and the allegedly close relationships of indigenous people

with the natural world. She investigates the persistence of the “myth of the frontier” and its extension to the frontier of space exploration. She ponders the popularity (and occasional controversy) of penguins (and penguin family values) and questions assumptions about human warfare as “natural.” The book is intended to provoke debates—among college students and graduate students, among their professors, among environmental activists, and among all citizens who are concerned with issues of environmental quality and social equality.

Ants came to this

planet long before man. Since then they have developed one of the most intricate civilizations imaginable – a civilization of great richness and technological brilliance. During the few seconds it takes you to read this sentence, some 700 million ants will be born on earth... Edmond Wells had studied ants for years: he knew of the power which existed in their hidden world. On his death, he leaves his apartment to his nephew Jonathan with one proviso: that he must not

descend beyond the cellar door. But when the family's dog escapes down the cellar steps, Jonathan has little alternative but to follow. Innocently he enters the world of the ant, whose struggle for existence forces him to reassess man's place in the cycle of nature. It is an experience that will alter his life for ever... Empire of the Ants is an extraordinary achievement. It takes you inside the ants' universe and reveals it to be a highly organised world, as complex and relentless as human society and

even more brutal. *La trilogie des fourmis* Penguin
On a planet with six suns, night is about to fall for the first time in two thousand years . . . The planet Kalgash is on the brink of chaos—but only a handful of people realize it. Kalgash knows only the perpetual light of day; for more than two millennia, some combination of its six suns has lit up the sky. But twilight is now gathering. Soon the suns will set all at one—and the terrifying splendor of Nightfall will call forth a madness that signals the end of civilization Isaac Asimov's short

story “Nightfall” first appeared in 1941. It has since become recognized as a classic, its author a legend. But the short story isn't the whole story. Now, Dr. Asimov has teamed with multiple Hugo and Nebula Award winner Robert Silverberg to explore and expand one of the most awe-inspiring concepts in the history of science fiction. In this novel, you will witness Nightfall—and much more. You will learn what happens at Daybreak.

Bienvenue au Paradis Sonia Draga Sp. z o.o. 'My most anticipated book of

the year' - Peter F. Hamilton, Britain's no.1 science fiction writer Children of Ruin follows Adrian Tchaikovsky's extraordinary Children of Time, winner of the Arthur C. Clarke award. It is set in the same universe, with new characters and a thrilling narrative. It has been waiting through the ages. Now it's time . . . Thousands of years ago, Earth's terraforming program took to the stars. On the world they called Nod, scientists discovered alien life – but it was their mission to overwrite it with the memory of Earth. Then humanity's great empire fell,

and the program's decisions were lost to time. Aeons later, humanity and its new spider allies detected fragmentary radio signals between the stars. They dispatched an exploration vessel, hoping to find cousins from old Earth. But those ancient terraformers woke something on Nod better left undisturbed. And it's been waiting for them. 'Books like this are why we read science fiction' - Ian McDonald, author of the Luna series All underpinned by great ideas. And it is crisply modern - but with the sensibility of classic science fiction' Stephen

Baxter, author of the Long Earth series (with Terry Pratchett)

Adrian Tchaikovsky's award-winning novel Children of Time, is the epic story of humanity's battle for survival on a terraformed planet. Who will inherit this new Earth? The last remnants of the human race left a dying Earth, desperate to find a new home among the

stars. Following in the footsteps of their ancestors, they discover the greatest treasure of the past age - a world terraformed and prepared for human life. But all is not right in this new Eden. In the long years since the planet was abandoned, the work of its architects has borne disastrous fruit. The planet is not waiting for them, pristine and unoccupied. New masters have turned it from a refuge into mankind's worst nightmare. Now two civilizations are on a collision course, both testing the boundaries of what they will do to survive. As the fate of humanity hangs in the balance, who are the true heirs of this new Earth?

Melville: A Novel
Random House
In the 1910s and 1920s, when circus was the most popular form of entertainment in North America, Mabel Stark made her name in a man's world as the greatest female tiger trainer in history, the centring finale act for the Ringling Brothers Barnum & Bailey Circus. Brazen, courageous, obsessed with tigers and sexually eccentric, Stark survived a dozen severe maulings — and five husbands. Now, at age 80 and about to lose her job, she decides that there is one last thing she needs to do: Mabel Stark wants to confess.
