This book introduces readers to the development of Lesson Study (LS) in the UK, making historical connections to the growth of Lesson Study in Japan, East Asia, the US and Europe. It explains how to conduct LS in schools and educational institutions, providing examples of compelling, externally evaluated impact outcomes for both primary learners and teacher learners, and vivid exemplars of LS in action across age ranges and curricular contexts. Each chapter presents international research outcomes that clearly demonstrate how and why LS has a place within teacher learning approaches that have the greatest impact and the greatest capacity building potential for creating outstanding teaching. This is supported by primary research evidence, and linked with contemporary and recent high quality research worldwide into pupil learning, teacher learning, school improvement and system improvement. The book illustrates the diverse application of LS for innovating or transferring highly effective practices in a variety of contexts to boost learning for children with a range of challenges and specific needs. Lesson Study provides a global perspective on the development of LS worldwide, exploring its impact on innovation, creativity, curricula and achievement in a variety of contexts. It will be of key interest to practitioners in schools and teacher education institutions, researchers, and policy and decision-makers at local, national and international levels. The book's explicit focus on the leadership of local authorities will also make it valuable reading for all leaders of professional development and school improvement.

Study Guide including DEMO DOCS and e-Working Papers -- Introductory accounting students consistently tell us, When doing homework, I get stuck trying to solve problems the way they were demonstrated in class. Instructors consistently tell us, I have so much to cover in so little time; I can't afford to go backwards and review homework in class. Those challenges inspired us to develop Demo Docs. Demo Docs are comprehensive worked-through problems available for nearly every chapter of our introductory accounting text to help students when they are trying to solve exercises and problems on their own. The idea is --help students duplicate the classroom experience outside of class. Entire problems that mirror end of chapter material are shown solved and annotated with explanations written in a conversational style, essentially imitating what an instructor might say if standing over a student's shoulder. All Demo Docs will be available in the study guide--in print and on CD in Flash so students can easily refer to them when they need them. choice and short answer questions for students to test their knowledge. Free electronic working papers are included on the accompanying CD.
